## ABSTRACT

First of all, by asking forgiveness from Allah SWT here I try to reveal the signs of Allah SWT about the angels upholding Allah's 'Arsy above them through photons and quarks based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA)

In the Qur'an, several verses are found which are the key to unlocking the secret of the angels upholding the 'Arsy of Allah above them, namely the following verses:

*"And the angels are in the corners of the sky. And on that day eight angels will uphold the 'Arsy of your Lord above their (heads)." (Al Haaqqah: 69:17)*

*"...the angels circled around the 'Arsy glorifying and praising their Lord;...(Az Zumar: 39:75)*

*"Allah is the light of the heavens and the earth....Light upon light (in layers), Allah guides to His light whom He wills...(An Nuur: 24:35)*

*"And if We made the apostle an angel, We would certainly have made him a man and (if We had made him a man), We would have doubted about them what they doubted about themselves. (Al An'aam: 6: 9)*

In an effort to open the veil about angels upholding the 'Arsy of Allah above them, I based on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## HYPOTHESIS

Here I propose the hypothesis 'The 'Arsy of Allah is a layer of light when viewed from the point of view of photons, quarks and Deoxyribonucleic acid (DNA).

## DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

## QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus.

Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

## THE ANGEL IS A MAN WHOSE HEAD IS ILLUMINATED BY A LAYER OF LIGHT

Let's together uncover the secret behind the verse: *"... if We had made the apostle an angel, We would have made him a man... (Al An'aam: 6: 9)*

It turns out that the angel is a human, whose body contains oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms.

Then if we dig deeper into the secret behind the verse: *"Allah is the light of the heavens and the earth.... Light upon light (in layers),...(An Nuur: 24: 35)*

Now it is becoming clearer that above the head of this angel is a layer of Allah's light. Where is this layer of Allah's light that illuminates our earth *"Allah of light ... the earth.... (An Nuur: 24: 35)*

## ANGELS THAT ARE ALSO HUMANS SURROUNDING UNDER GOD'S LAYER OF LIGHT

Then we also dig deeper into the secret behind the verse: *"...the angels circle around the 'Throne... (Az Zumar: 39: 75)*

It turns out that here it is clearly seen angels who are also humans walking around under the shade of Allah's layer of light, while *"... glorifying while praising their Lord;... (Az Zumar: 39: 75)*

## THE LAYER OF ALLAH'S LIGHT SURROUNDED BY ANGELS IS ON OUR EARTH

Now it was revealed where *"...eight angels held up the Throne of your Lord above (their heads). (Al Haaqqah: 69:17) "...the angels circle around the 'Throne...(Az Zumar: 39:75) where the 'Arasy is "Allah is the light of the heavens and the earth....Light upon light ( layers),...(An Nuur: 24:35)*

It has been revealed that the 'Arasy which is upheld by the angels is a layer of Allah's light that is on our earth today.

## CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"... if We had made the apostle an angel, We would have made him a man... (Al An'aam: 6: 9)*

It turns out that the angel is a human, whose body contains oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms.

Then if we dig deeper into the secret behind the verse: *"Allah is the light of the heavens and the earth.... Light upon light (in layers),...(An Nuur: 24: 35)*

Now it is becoming clearer that above the head of this angel is a layer of Allah's light. Where is this layer of Allah's light that illuminates our earth *"Allah of light ... the earth.... (An Nuur: 24: 35)*

Then we also dig deeper into the secret behind the verse: *"...the angels circle around the 'Throne... (Az Zumar: 39: 75)*

It turns out that here it is clearly seen angels who are also humans walking around under the shade of Allah's layer of light, while *"... glorifying while praising their Lord;... (Az Zumar: 39: 75)*

Now it was revealed where *"...eight angels held up the Throne of your Lord above (their heads). (Al Haaqqah: 69:17) "...the angels circle around the 'Throne...(Az Zumar: 39:75)* where the 'Arsy is *"Allah is the light of the heavens and the earth....Light upon light ( layers),...(An Nuur: 24:35)*

It has been revealed that the 'Arsy which is upheld by the angels is a layer of Allah's light that is on our earth today.
