ABSTRACT

Firstly, by asking forgiveness from Allah SWT, here I try to reveal the signs of Allah SWT's greatness regarding Allah's secret about what the seven heavens are connected with mi'raj from the point of view of photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

The signs of Allah's greatness regarding Allah's secret about what the seven skys are associated with mi'raj are in the verses:

"He is Allah, Who created all that is on earth for you and He willed (created) the skys, then He made the seven skys. And He is Knower of all things." (Al Baqarah: 2:29)

"So He made it seven skys in two periods. He revealed in each sky its affairs. And We adorn the near sky with bright stars and We take care of it as well as possible. That is the provision of the Mighty, All-Knowing. : 41:12)

"And verily Muhammad saw Gabriel at another time, (An Najm: 53:13) in Sidratil Muntaha (An Najm: 53:14) Nearby there was a paradise where he lived, (An Najm: 53:15) when Sidratil Muntaha (An Najm: 53:16) His sight does not turn away from what he sees and does not go beyond it (An Najm: 53:17)

In an effort to unveil the greatness of Allah SWT regarding Allah's secret about what the seven skys are associated with mi'raj the author uses the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose the hypothesis that the seven skys are seven universes seen from photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

WHAT IS THE SEVEN SKY

Now, we are still continuing to unravel the secret behind the verse: *"...He made the seven skys in two times. He revealed in each sky his affairs. And We adorned the near sky with bright stars...(Fushshilat : 41:12)*

Well, it turns out that here it is seen that *"... the seven skys ..."* are seven universes or seven symmetrical universes. Where is our universe now in *"...decorate the sky near with bright stars...(Fushshilat: 41:12)*

Our universe is the universe that is visible to our eyes. While the other six universes are invisible

Why is this universe only seven?

The answer is

Our present universe that is visible to our eyes is only 5% of the mass consisting of atoms of the existing mass. Where these 5% atoms can be further divided according to the division based on gases and chemicals consisting of 74% hydrogen gas, 23% helium gas, 1% oxygen gas, 0.5% carbon, 0.5% neon gas, 0.1% iron and 0.9% other elements.

While the other mass consists of mass in the form of dark matter which amounts to 23%. Where this dark matter is still not widely known and understood but this dark matter functions as a gravitational force that binds objects around it. And also this dark matter is a large part of the mass that exists in galaxies, collections of galaxies and in the universe as a whole.

The remaining 72% is in the form of dark energy which until now is still not widely known and understood. Where this dark energy causes the universe to accelerate, meaning that the speed of the universe is increasing.

Now, we focus our attention only on the mass in our universe which is 5% of the mass consisting of atoms and the mass is dark matter which is 23%.

THE SEVEN UNIVERSE ARE SYMMETRY

Now, let's unpack the secret behind the verse: *"...He made it seven skys...(Fushshilat: 41:12)*

It turns out that if we add up the mass that is 5% of our universe with the mass of 23% dark matter, the number becomes 28% of the mass.

Then we divide the 28% of that time by 7 universes, then each universe has the same 4% of the time.

Now the secret behind the verse is answered *"...He made seven skys...(Fushshilat: 41:12)*. Allah created 7 universes which have the same mass, that is, each universe has 4% time which makes the 7 universes become symmetry.

Or in other words, the 7 universes created by Allah are balanced with each other.

ONE OF OUR UNIVERSE IS VIEWED BY EYES WHILE THE SIX OTHER WORLDS ARE INVISIBLE

Now, let's unveil the secret behind the verses: *"And indeed Muhammad saw Gabriel at another time,*

(An Najm: 53:13) in Sidratil Muntaha (An Najm: 53:14) Nearby there is a paradise to live in, (An Najm: 53:15)

It turns out that now the secret has been revealed, how exactly did the Prophet Muhammad perform mi'raj?

The answer is,

The Prophet Muhammad did not ascend to the 7th sky, but through a symmetrical universe, which is invisible, in which there are "*Sidratil Muntaha (An Najm: 53:14)* and "*Nearby is a paradise to live in, (An Najm: 53: 15)* brought closer by Allah with our universe.

Well, the meeting place of our universe with the transparent symmetrical space of the universe in which there is "*Sidratil Muntaha (An Najm: 53: 14)* is around the Al Masjidil Aqsa place.

So, one night on the 27th of Rajab in the 11th year of the prophethood coincided with the 8th of March 620 AD the Prophet Muhammad mi'raj.

But the Prophet Muhammad did not ascend to the 7th sky, but directly by foot entered the universe with invisible symmetry in which there was "*Sidratil Muntaha (An Najm: 53: 14)* which "*Nearby is a paradise to live in, (An Najm: 53:14) Najm : 53:15)* also Prophet "...*Muhammad has seen Jibril...(An Najm : 53:13) in Sidratil Muntaha (An Najm : 53:14)*

Because Gabriel is a type of human "... *We made the apostle an angel, ... he was a man ... (Al An'aam: 6: 9)* who cannot fly, of course Gabriel and Prophet Muhammad can enter the transparent universe of symmetry, there is no need to fly, in which there is "*Sidratil Muntaha (An Najm: 53: 14)* which is "*nearby" there is a heaven to live in, (An Najm: 53:15)*

Now finally it is revealed how Prophet Muhammad mi'raj and met Jibril in a transparent symmetrical universe in which there is "*Sidratil Muntaha (An Najm: 53: 14)* which "*Nearby is a paradise to live in, (An Najm: 53 : 15)*

Prophet Muhammad "...*has seen some of the greatest signs (power) of his Lord". (An Najm: 53: 13-18)* by being entered into a invisible universe of symmetry, no need to fly, in which there is "*Sidratil Muntaha (An Najm: 53: 14)* which "*Nearby is a paradise to live in, (An Najm: 53: 14) Najm : 53:15)*

CONCLUSION

From what has been described above we can now conclude that the secret behind the verse: "...*He made the seven skys in two times. He revealed in each sky his affairs. And We adorned the near sky with bright stars...(Fushshilat : 41:12)*

Well, it turns out that here it is seen that "... *the seven skys ...*" are seven universes or seven symmetrical universes. Where is our universe now in "...*decorate the sky near with bright stars...(Fushshilat: 41:12)*

Our universe is the universe that is visible to our eyes. While the other six universes are invisible

Why is this universe only seven?

The answer is

Our present universe that is visible to our eyes is only 5% of the mass consisting of atoms of the

existing mass. Where these 5% atoms can be further divided according to the division based on gases and chemicals consisting of 74% hydrogen gas, 23% helium gas, 1% oxygen gas, 0.5% carbon, 0.5% neon gas, 0.1% iron and 0.9% other elements.

While the other mass consists of mass in the form of dark matter which amounts to 23%. Where this dark matter is still not widely known and understood but this dark matter functions as a gravitational force that binds objects around it. And also this dark matter is a large part of the mass that exists in galaxies, collections of galaxies and in the universe as a whole.

The remaining 72% is in the form of dark energy which until now is still not widely known and understood. Where this dark energy causes the universe to accelerate, meaning that the speed of the universe is increasing.

Now, we focus our attention only on the mass in our universe which is 5% of the mass consisting of atoms and the mass is dark matter which is 23%.

Now, let's unpack the secret behind the verse: *"...He made it seven skys...(Fushshilat: 41:12)*

It turns out that if we add up the mass that is 5% of our universe with the mass of 23% dark matter, the number becomes 28% of the mass.

Then we divide the 28% of that time by 7 universes, then each universe has the same 4% of the time.

Now the secret behind the verse is answered *"...He made seven skys...(Fushshilat: 41:12)*. Allah created 7 universes which have the same mass, that is, each universe has 4% time which makes the 7 universes become symmetry.

Or in other words, the 7 universes created by Allah are balanced with each other.
