## **ABSTRACT**

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding how Allah is a witness to all human actions from the point of view of photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

Signs of the greatness of Allah SWT regarding how Allah is a witness to all human actions in the verses:

*"You are not in a situation and do not read a verse from the Qur'an and you do not do a job, but We are witnesses over you when you do it. It does not escape the knowledge of your Lord, even if it is as big as an atom on the earth or in the sky. No there is something smaller and not (also) greater than that, but (all recorded) in a clear book (Lauh Mahfuzh) (Yunus: 10: 61)*

*"And (remember) Maryam bint Imran who kept her honor, so We breathed into her womb some of Our (creation) spirit, and she confirmed the words of her Lord and His Books, and she was one of the obedient ones. (At Tahrir: 66:12)*

In an effort to unveil the greatness of Allah SWT regarding how Allah is witness to all human actions, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

## **HYPOTHESIS**

Here I propose the hypothesis that God is a witness for all human actions through the spirit of God which contains oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms as seen from the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **THE SPIRIT OF ALLAH IS BLOWN**

Now we together focus our minds on uncovering the secret behind the verse: *"... We breathed into her womb a portion of Our (creation) spirit,.. (At Tahrir: 66: 12)*

It turns out that now it has been revealed that Allah's spirit which consists of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms which are the building blocks of deoxyribonucleic acid (DNA) was blown by Allah *"...into her womb part of our (creation) spirit.. (At Tahrir: 66:12)*

Well, Allah's spirit contains oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms which are the building blocks of DNA in sperm.

Where is DNA and chromosomes, where chromosomes are structures in cells where all or part of the genome is located, which build sperm that is inserted into the uterus and then meets the egg that comes from the female side.

So from before humans were created and formed in the womb, the spirit of Allah which contains oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms has been present in the sperm of the male side.

### **THE SPIRIT OF ALLAH IS IN THE HUMAN BODY**

Now, after *"...breathing into her womb some of our (created) spirit.. (At Tahrir: 66:12)* then Allah's spirit which consists of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms becomes a building human body.

### **ALLAH IS A WITNESS OVER ALL HUMAN WORKS**

Then we dig deeper into the secret behind the verse: *"You are not in a situation and do not read a verse from the Qur'an and you do not do a job, but We are witnesses over you when you do it. You do not escape the knowledge of your Lord even if it is as big as zarrah (atom) on the earth or in the heavens. Nothing is smaller and not (also) greater than that, except (all recorded) in a clear book (Lauh Mahfuzh). (Yunus: 10:61)*

It turns out that now it is clearly proven, whatever humans do that is visible or hidden, Allah knows it.

Why does Allah know all human actions visible and invisible?

The answer is,

Because Allah's spirit which contains oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms is the building block of the human body.

Whatever humans do, Allah is a witness.

### **ALL HUMAN ACTIONS ARE WRITTEN IN THE DNA**

Now we continue to disassemble until the root of the secret behind the verse: *"...There is nothing smaller and not (also) greater than that, but (all recorded) in a clear book (Lauh Mahfuzh). (Yunus: 10:61)*

It turned out that now it was revealed that all human deeds are stored in *"...in a real book (Lauh Mahfuzh). (Yunus: 10:61)*

Where this real book is deoxyribonucleic acid (DNA).

## CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"... We breathed into her womb a portion of Our (creation) spirit,.. (At Tahrīm: 66: 12)*

It turns out that now it has been revealed that Allah's spirit which consists of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms which are the building blocks of deoxyribonucleic acid (DNA) was blown by Allah *"...into her womb part of our (creation) spirit.. (At Tahrīm: 66:12)*

Well, Allah's spirit contains oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms which are the building blocks of DNA in sperm.

Where is DNA and chromosomes, where chromosomes are structures in cells where all or part of the genome is located, which build sperm that is inserted into the uterus and then meets the egg that comes from the female side.

So from before humans were created and formed in the womb, the spirit of Allah which contains oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms has been present in the sperm of the male side.

Now, after *"...breathing into her womb some of our (created) spirit,.. (At Tahrīm: 66:12)* then Allah's spirit which consists of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms becomes a building. human body.

Then we dig deeper into the secret behind the verse: *"You are not in a situation and do not read a verse from the Qur'an and you do not do a job, but We are witnesses over you when you do it. You do not escape the knowledge of your Lord even if it is as big as zarrāh ( atom) on the earth or in the heavens. Nothing is smaller and not (also) greater than that, except (all recorded) in a clear book (Lauh Mahfuzh). (Yunus: 10:61)*

It turns out that now it is clearly proven, whatever humans do that is visible or hidden, Allah knows it.

Why does Allah know all human actions visible and invisible?

The answer is,

Because Allah's spirit which contains oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms is the building block of the human body.

Whatever humans do, Allah is a witness.

Now we continue to disassemble until the root of the secret behind the verse: *"...There is nothing smaller and not (also) greater than that, but (all recorded) in a clear book (Lauh Mahfuzh). (Yunus: 10:61)*

It turned out that now it was revealed that all human deeds are stored in *"...in a real book (Lauh Mahfuzh). (Yunus: 10:61)*

Where this real book is deoxyribonucleic acid (DNA).
