ABSTRACT

Previously I asked forgiveness from Allah SWT regarding here I tried to reveal the signs of Allah SWT about what prompted Moses to see Allah based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA)

There is one verse from the entire Qur'an that can be used as a basis for revealing God's secret about what prompted Moses to see God, namely the verse:

"And when Moses came to (munajat with Us) at the time We had determined and Allah had said (directly) to him, Moses said: "O my Lord, show me (yourself) so that I can see You." Allah said: "You will never be able to see Me, but look up at the hill, so if it remained where it was (as before) you would be able to see Me." When his Lord appeared to the mountain, he made the mountain crumble and Moses fell unconscious. So after Moses regained consciousness, he said: "Glory be to You, I repent to You and I am the first to believe." (Al A'raaf: 7: 143)

Allah said: "O Moses, verily I chose (excessive) you and other humans (in your time) to carry My message and to speak directly with Me, therefore hold fast to what I have given you and be of the grateful people." (Al A'raaf: 7:144)

In an effort to reveal the secret of Allah what prompted Moses to see Allah I use a tool called deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here the author proposes the hypothesis that Moses saw Allah through the hydrogen atom from the point of view of Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PROPHET MOSES USED THE WAY OF HIS MIND TO SEE ALLAH

Well, now we are back to revealing the secret hidden behind the verse: *"Allah said: "O Moses, indeed I have chosen (exceeded) you...and to speak directly with Me,...(Al A'raaf: 7: 144)*

It turns out that here it is clearly seen the secret behind the verse (*Al A'raaf: 7: 144*)

Namely Allah has chosen Prophet Moses and to speak directly with Allah.

TWO FACTORS, CHOOSE AND DIRECT SPEAKING, ARE TWO FACTORS THAT DRIVED THE PROPHET MOSES TO WANT TO SEE THE TRUE ALLAH

Now, with two factors, *"...choosing (exceeding) you...and to speak directly to Me..." (Al A'raaf: 7: 144)* which Allah has declared to Moses , prompting Prophet Moses to want to know more about who this ALLAH really is .

"... Moses said: "O my Lord, show me (yourself) so that I can see you." (Al A'raaf: 7: 143)

So here Moses did not immediately believe in Allah, before Moses asked Allah to appear before him *"...show (yourself) to me so that I can see you." (Al A'raaf: 7:143)*

So, why did Moses ask Allah to make Allah appear to Moses?

The answer is,

Based on the way of thinking of the Prophet Moses that anything that exists in this universe must have a form, whether it is a supernatural form that is invisible to the human eye or a form that can be seen by the human eye.

So according to the way of thinking of the Prophet Moses, of course Allah has chosen and to speak directly to the Prophet Moses, there must be a form.

Now, with two factors, the factor of choosing Moses as a Prophet and the factor of talking directly to Allah, was the impulse that arose in Moses to see the real Allah.

ALLAH IN THE FORM OF PHOTON AND QUARK

Because the Prophet Musa used his mind, when Allah said: *"... " You can never see Me, but look at the hill, so if it stays where it was (as before) you will surely see Me." When his Lord appeared to the mountain, he made the mountain crumble and Moses fell unconscious... (Al A'raaf: 7: 143)*

It turns out that it was revealed here that Allah's form cannot be seen by the eye, but must go through deepening *"... the mountain was crushed..."* meaning that the mountain became dust that flew and in the dust contained atoms, one of which was a hydrogen atom. (H)

Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

This hydrogen atom is the building block of the human body, animals, plants and fruits and inanimate objects.

THE PROPHET MOSES HAS PROVEN THAT ALLAH' FORM IS INVISIBLE BUT CAN BE SEEN THROUGH THE SPIRIT OF ALLAH IN QUARK

Now revealed the secret behind the verse: *"...So after Moses regained consciousness, he said: "Glory to You, I repent to You and I am the first to believe." (Al A'raaf: 7:143)*

Now, the Prophet Moses has proven that to see Allah directly through the eyes is an impossible thing, but through "*...the mountain was crushed...*" meaning that the mountain became dust that flew and in the dust contained atoms, one of the atoms is a hydrogen atom (H)

If we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark.

Well, by examining the hydrogen atom, we will arrive at the quark, which is the true form of Allah.

CONCLUSION

Based on what has been described above, we can conclude that the secret hidden behind the verse: "*Allah said: "O Moses, indeed I have chosen (exceeded) you...and to speak directly with Me,...(Al A'raaf: 7: 144)*"

It turns out that here it is clearly seen the secret behind the verse (*Al A'raaf: 7: 144*)
