ABSTRACT

First of all, by asking forgiveness from Allah SWT here I try to reveal the signs of Allah SWT about how people in paradise talk to people in hell based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about how people in paradise talk to people in hell, namely the following verses:

"And between the two (the inhabitants of paradise and hell) there is a limit; and above A'raaf there are people who know each of the two groups by their signs. And they call out to the people of paradise: "Salaamun 'alaikum "They haven't entered it yet, while they want to (enter it). (Al A'raaf: 7: 46)

"And the inhabitants of Paradise will cry out to the dwellers of Hell (saying): "Indeed, we have actually obtained what our Lord promised us. So have you actually obtained what (punishment) your Lord promised (to you)?" They (the people of Hell) replied: "Yes." Then a caller (angel) announced between the two groups: "The curse of Allah is upon the people. - the wrongdoers, (Al A'raaf: 7: 44)

"And the inhabitants of Hell call upon the inhabitants of Paradise: "Spread us some of the water or food which Allah has provided for you." They (the inhabitants of heaven) replied: "Verily Allah has forbidden both of them to the disbelievers, (Al A'raaf: 7: 50)

"When the sun is rolled up, (At Takwiir: 81: 1)

"And give good tidings to those who believe and do good, that for them there will be gardens where rivers flow. Every time they are given sustenance of fruits in those paradises, they say: "This is what was given to us in the past." They are given similar fruits and for them are pure wives and they will abide therein forever. (Al Baqarah: 2:25)

Allah says: *"Enter all of you into hell with the jinn and humans who went before you... (Al A'raaf: 7: 38)*

In trying to unmask God's secret about how people in paradise talk to people in hell I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that people in paradise talk to people in hell using light frequency vibrations from the basic point of Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

HUMAN SPIRIT IN PARADISE

Now, let's return now to continue to focus our minds to reveal the secrets that are hidden behind the verse: *"When the sun is rolled up, (At Takwiir: 81: 1)*

Apparently, when the sun has been rolled up, then the sun has reached its end because it runs out of hydrogen atoms as fuel and survival of the sun.

What happens when the sun is rolled up?

The answer is

Heaven can't exist, why can't heaven exist when the sun is rolled up?

The answer is

Because life in heaven is the same as life on our earth today. Where in *"...paradise in which rivers flow....fruits...holy wives...(Al Baqarah: 2:25)*

Now, if life in heaven is like life on our earth, then a layer of God's light is needed through the photon rays that come from the sun. Without the light of photons coming from the sun, life in heaven would not exist.

So the human spirit which consists of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms, which is in heaven with all its pleasures is dependent on the light rays of photons coming from the sun.

The age of the sun from now until the sun is rolled up is about **2 500 000 000** years.

HUMAN SPIRIT AND JIN SPIRIT IN HELL

Now the human spirit that is in hell is combined with the spirit of the jinn." *Allah says: "Enter all of you into hell with the jinn and humans who were before you... (Al A'raaf: 7: 38)*

The human spirit and the spirit of the jinn in hell are composed of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms. Where the hydrogen atom is used as a hellfire.

THE HUMAN SPIRIT IN PARADISE TALKED TO THE HUMAN SPIRIT IN HELL

Now, the conversation that the human spirit in paradise has with the human spirit in hell is not the same as the conversation they had when they were still alive on our earth.

When they were alive on earth, they talked to each other using sound vibrations.

But now, humans are in the form of spirits made up of oxygen atoms, hydrogen atoms, nitrogen

atoms and carbon atoms, when they talk to each other using the light frequency vibration of photons.

Even though the distance between paradise and hell is thousands of kilometers, they can talk by using the vibrations of the light frequency of photons.

As described in the verse: *"And the inhabitants of Paradise cry out to the inhabitants of Hell (saying): 'Indeed, we have actually obtained what our Lord promised us. So have you actually obtained what (punishment) your Lord promised (to you)?' They (the people of hell) replied: 'That's right.' (Al A'raaf: 7: 44)*

But the conversation is like the contents of this verse: *"And the inhabitants of hell call on the inhabitants of heaven: 'Spread us a little water or food that Allah has provided for you.' They (the inhabitants of heaven) replied: 'Verily Allah has forbidden both of them to the disbelievers, (Al A'raaf: 7: 50)* is not possible.

Why?

Because water and food only exist in heaven, where water consists of two hydrogen atoms and one oxygen atom. As for food, it contains hydrogen atoms.

Now, because hydrogen atoms are used as fuel for the fire of hell, it is impossible for water to be drunk and food to be eaten by the spirits of humans and the spirits of jinn in hell. *"... 'Indeed, Allah has forbidden both of them to the disbelievers, (Al A'raaf: 7: 50)*

It means *"... Allah has forbidden both of them to the disbelievers, (Al A'raaf: 7: 50)* because the hydrogen atoms in water and in food are used as fuel to burn the human spirit and the spirit of the jinn in the hell.

CONCLUSION

Based on the description above, we can conclude that the secrets that are hidden behind the verse: *"When the sun is rolled up, (At Takwiir: 81: 1)*

Apparently, when the sun has been rolled up, then the sun has reached its end because it runs out of hydrogen atoms as fuel and survival of the sun.

What happens when the sun is rolled up?

The answer is

Heaven can't exist, why can't heaven exist when the sun is rolled up?

The answer is

Because life in heaven is the same as life on our earth today. Where in *"...paradise in which rivers flow...fruits...holy wives...(Al Baqarah: 2:25)*

Now, if life in heaven is like life on our earth, then a layer of God's light is needed through the photon rays that come from the sun. Without the light of photons coming from the sun, life in heaven would not exist.

So the human spirit which consists of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon

atoms, which is in heaven with all its pleasures is dependent on the light rays of photons coming from the sun.

The age of the sun from now until the sun is rolled up is about **2 500 000 000** years.

Now the human spirit that is in hell is combined with the spirit of the jinn." *Allah says: "Enter all of you into hell with the jinn and humans who were before you... (Al A'raaf: 7: 38)*

The human spirit and the spirit of the jinn in hell are composed of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms. Where the hydrogen atom is used as a hellfire.

Now, the conversation that the human spirit in paradise has with the human spirit in hell is not the same as the conversation they had when they were still alive on our earth.

When they were alive on earth, they talked to each other using sound vibrations.

But now, humans are in the form of spirits made up of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms, when they talk to each other using the light frequency vibration of photons.

Even though the distance between paradise and hell is thousands of kilometers, they can talk by using the vibrations of the light frequency of photons.
