### ABSTARCT

I ask forgiveness from Allah SWT before continuing to reveal the secrets contained in the verse concerning Allah's secret about the creation of man from a lump of blood from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

Where are the signs of Allah's greatness regarding Allah's secret about the creation of man from a lump of blood in the verse:

*"He has created man from a lump of blood. (Al 'Alaq: 96: 2)*

*"Then We made cum a lump of blood, then We made the lump of blood into a lump of flesh, and We made the lump of flesh into bones, then We wrapped the bones with meat... (Al Mu'minuun: 23:14)*

In an effort to unveil the greatness of Allah SWT regarding Allah's secret about the creation of humans from a lump of blood, I use the basic molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

### HYPOTHESIS

Here I propose the hypothesis that the creation of man from a blood lump is from DNA according to the basic molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

### DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on deoxyribonucleic acid (DNA) humans are composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere. These atoms are the raw materials for the manufacture of humans, animals, fungi, amoeba, plants, bacteria and archaea.

### A LUMP OF BLOOD IS MILLIONS OF DNA

Let us together uncover the secret behind the verse: *"He has created humans from a lump of blood.*

*(Al 'Alaq: 96: 2)*

Well, it turns out that if we examine the roots, a lump of blood is made up of millions of DNA.

Then if we dig deeper to reveal the secret behind the verse: *"Then We made cum a lump of blood,...*  
*(Al Mu'minuun: 23:14)*

Well apparently, the blood comes from *"... cum... (Al Mu'minuun: 23:14)*

Then what is *"...cum..."* ?

The answer is sperm which consists of millions of DNA from the male side.

So this DNA is the building block of that blood lump.

### **DNA FROM MEN MEETS DATA FROM WOMEN**

Then we uncover the secret behind the verse: *"... We set in the womb, .. (Al Hajj: 22: 5)*

Now, it is increasingly being revealed that DNA from the male side meets DNA from the female side where the results of the meeting of this DNA are stored *"...in the womb,..."*

Now it was revealed that actually the secret behind the verse: *"Then We made cum a lump of blood, ... (Al Mu'minuun: 23:14)* meaning a lump of blood consisting of millions of DNA from the male and female side stored in the womb.

So, actually humans were created from DNA.

### **CONCLUSION**

Based on the description above, we can conclude that the secret behind the verse: *"He has created humans from a lump of blood. (Al 'Alaq: 96: 2)*

Well, it turns out that if we examine the roots, a lump of blood is made up of millions of DNA.

Then if we dig deeper to reveal the secret behind the verse: *"Then We made cum a lump of blood,...*  
*(Al Mu'minuun: 23:14)*

Well apparently, the blood comes from *"... cum... (Al Mu'minuun: 23:14)*

Then what is *"...cum..."* ?

The answer is sperm which consists of millions of DNA from the male side.

So this DNA is the building block of that blood lump.

Then we uncover the secret behind the verse: *"... We set in the womb, .. (Al Hajj: 22: 5)*

Now, it is increasingly being revealed that DNA from the male side meets DNA from the female side where the results of the meeting of this DNA are stored *"...in the womb,..."*

Now it was revealed that actually the secret behind the verse: *"Then We made cum a lump of blood, ...*

*(Al Mu'minuun: 23:14)* meaning a lump of blood consisting of millions of DNA from the male and female side stored in the womb.

So, actually humans were created from DNA.
