ABSTARCT

First of all, by asking for forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding the secrets about animals, birds and humans are the same DNA viewed from the point of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

The signs of Allah's greatness regarding animals, birds and humans are the same DNA written in the verse:

"And there are no animals on the earth and birds that fly with their wings, but people (also) like you. We have not forgotten anything in the Book, then to Allah they are brought together. (Al An'aam: 6 :38)

In an effort to unveil the greatness of Allah SWT regarding the secret that animals, birds and humans are the same DNA, I use the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I put forward the hypothesis that animals, birds and humans are the same DNA, seen from the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

ANIMALS, BIRDS AND HUMANS HAVE THE SAME DNA

Let's together uncover the secret behind the verse: *"...there are no animals on earth and birds that fly with two wings, but people (also) like you...(Al An'aam: 6 :38)*

It turns out that now it is clearly revealed that animals and birds are *"...people (also) like you...(Al An'aam: 6:38)*

Why are animals and birds like humans?

The answer is Because it is based on the genetic code contained in the molecular structure of nucleic acids or DNA (Deoxyribonucleic acid) and through RNA (Ribonucleic acid) which has a role to synthesize proteins and carry out catalytic activities it is used by almost all types of living organisms including animals, birds and humans.

Since this genetic code is universal, the same genetic code applies to animals, birds and humans.

For example, the genetic code or codons CAA and CAG which are amino acids or glutamine amino acids.

So now the secret behind the verse has been revealed: *"...there are no animals on earth and birds that fly with two wings, but people (also) like you...(Al An'aam: 6:38)* describes Humans, animals and birds have the same DNA.

HUMANS, ANIMALS AND BIRDS SHOULD RESPECT EACH OTHER

Well, because animals and birds are *"...people (also) like you...(Al An'aam: 6:38)*, then we as humans must respect all animals and birds.

We should not assume that the animal has no self-respect, so we treat it as we please.

We slaughter as we please ourselves, we eat the meat as we like. Because the animal was created by God for humans.

Well here, humans have forgotten themselves.

Why do people forget themselves?

The answer is Because humans do not understand, do not explore and do not appreciate that *"...there are no animals on earth and birds that fly with two wings, but people (also) like you... (Al An'aam: 6 : 38)*

So, now we as humans who are given a mind have to understand and explore that animals and birds also have the same dna as human DNA.

We as humans must respect and respect these animals and birds.

CONCLUSION

Based on the description above we can conclude that the secret behind the verse: *"...there are no animals on earth and birds that fly with both wings, but people (also) like you... (Al An'aam: 6:38)*

Now it is clearly revealed that animals and birds are *"...people (also) like you...(Al An'aam: 6:38)*

Why are animals and birds like humans?

The answer is Because it is based on the genetic code contained in the molecular structure of nucleic acids or DNA (Deoxyribonucleic acid) and through RNA (Ribonucleic acid) which has a role to synthesize proteins and carry out catalytic activities it is used by almost all types of living organisms including animals, birds and humans.

Since this genetic code is universal, the same genetic code applies to animals, birds and humans.

For example, the genetic code or codons CAA and CAG which are amino acids or glutamine amino acids.

Now revealed the secret behind the verse: *"...there are no animals on earth and birds that fly with two wings, but people (also) like you...(Al An'aam: 6:38)* describes humans , animals and birds have the same DNA.

Because animals and birds are *"...people (also) like you...(Al An'aam: 6:38)*, then we as humans must respect all animals and birds.

We should not assume that the animal has no self-respect, so we treat it as we please. We slaughter as we please ourselves, we eat the meat as we like. Because the animal was created by Allah for humans.

This is where people have forgotten themselves.

Why do people forget themselves?

The answer is Because humans do not understand, do not explore and do not appreciate that *"...there are no animals on earth and birds that fly with two wings, but people (also) like you... (Al An'aam: 6 : 38)*

So, now we as humans who are given a mind have to understand and explore that animals and birds also have the same dna as human DNA.

We as humans must respect and respect these animals and birds.
