ABSTRACT

Before I write down what's wrong with blood, so that Allah forbids eating blood, I first ask forgiveness from Allah SWT. Here I try to open the veil that covers the secret about what is wrong with blood, so that Allah forbids eating blood from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret revealer about what is wrong with blood, so that Allah forbids eating blood, namely the following verses:

"He has created human from a clot of blood. (Al 'Alaq: 96:2)

"Forbidden to you carrion, blood, pork, which is slaughtered in the name of other than Allah, the strangled, the beaten, the fallen, the horned, and the wild beast devoured, except for those that you had time to slaughter, and which were slaughtered for idols... Maa'idah : 5: 3)

"Say: "I did not find in the revelation that was revealed to me, anything that is forbidden for those who want to eat it, unless the food is carrion, or blood that flows or the flesh of pigs - because indeed these are filthy - or animals that are slaughtered in the name of other than Allah. Whoever is in a state of compulsion, while he does not want it and does not exceed the limit, then indeed your Lord is Forgiving, Most Merciful." (Al An'aam: 6:145)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

In an effort to open the veil of Allah's secret about what is wrong with blood, so Allah forbids eating blood, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that blood is forbidden by Allah because blood is the source of human life, seen from the basic point of Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

WHAT'S BEHIND THE BLOOD

Well, now we return to focus our minds to reveal the secret behind the verse: *"He created human from a clot of blood. (Al 'Alaq: 96: 2)*

It turns out, in fact this blood is the source of life for all humans and all animals. Without blood, all humans and all animals would not exist.

Where the blood is what transports various substances and for temperature regulation in the body. Blood goes from the heart to the lungs for oxygen, then returns to the heart and out to the tissues throughout the body.

BLOOD SOURCE OF HUMAN LIFE

Now, let's uncover the secret behind the verse: *"He created human from a clot of blood. (Al 'Alaq: 96: 2)* means that blood is the source of human life.

When the sperm enters the egg and unites to form an embryo, then it becomes a fetus. Where the fetus receives 23 chromosomes from the father and from the mother. These 23 chromosomes are the basis of the genetic code that contains the unique characteristics of the child.

THE SPIRIT OF GOD IS BLOWN ON THE FETUS

Now, let's unveil the secret behind the verse: *"... when I have perfected the event and I breathed into it My spirit... (Shaad: 38: 72)*

It is now revealed that after the sperm enters the egg cell and unites into an embryo, then becomes a fetus *"...I have perfected the event...(Shaad: 38:72)* then *"...I breathed into him my spirit...(Shaad: 38 : 72)*

FETUS IS FILLED BY BLOOD

Now, when the fetus grows up along with it the blood containing blood cells, red blood cells, white blood cells and platelets gives life to the fetus.

So, blood is a source of life for the fetus.

EAT BLOOD PROHIBITED

Now revealed the secret behind the verse: *"He has created human from a clot of blood. (Al 'Alaq: 96:2)*

That is, blood is the source of human life, therefore humans are forbidden to eat blood.

THE SOURCE OF ANIMAL LIFE IS BLOOD

Now, let's unveil the secret behind the verse: *"Forbidden to you a carcass...that strangled, hit, fell, horned, and was devoured by wild animals, except for those you had time to slaughter...(Al Maa'idah: 5:3)*

It turned out that it was already revealed that *"...the carcasses... of the strangled, the hit, the fallen, the horned, and the wild beast devoured... (Al Maa'idah: 5:3)* has something to do with blood.

Why does it have anything to do with blood?

The answer is

The secret is kept in the verse: *"..carcasses...that were strangled, beaten, fallen, horned, and "...was pounced on by a wild animal...(Al Maa'idah: 5:3)* meaning that when the animals died their blood did not bleed out *"...except for the one you had time to slaughter...(Al Maa'idah: 5:3)*

So, if an animal that *"...was pounced on by a wild animal...(Al Maa'idah: 5:3)* we still have time to *"...slaughter it...(Al Maa'idah: 5:3)* then we can eat it, the flesh, because the source of the animal's life or blood has been removed from the animal's body.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: ***"He created human from a clot of blood. (Al 'Alaq: 96: 2)***

It turns out, in fact this blood is the source of life for all humans and all animals. Without blood, all humans and all animals would not exist.

Where the blood is what transports various substances and for temperature regulation in the body. Blood goes from the heart to the lungs for oxygen, then returns to the heart and out to the tissues throughout the body.

Now, let's uncover the secret behind the verse: ***"He created human from a clot of blood. (Al 'Alaq: 96: 2)*** means that blood is the source of human life.

When the sperm enters the egg and unites to form an embryo, then it becomes a fetus. Where the fetus receives 23 chromosomes from the father and from the mother. These 23 chromosomes are the basis of the genetic code that contains the unique characteristics of the child.

Now, let's unveil the secret behind the verse: *"... when I have perfected the event and I breathed into it My spirit... (Shaad: 38: 72)*

It is now revealed that after the sperm enters the egg cell and unites into an embryo, then becomes a fetus *"...I have perfected the event...(Shaad: 38:72)* then *"...I breathed into him my spirit...(Shaad: 38 : 72)*

Now, when the fetus grows up along with it the blood containing blood cells, red blood cells, white blood cells and platelets gives life to the fetus.

So, blood is a source of life for the fetus.

Now revealed the secret behind the verse: ***"He has created human from a clot of blood. (Al 'Alaq: 96:2)***

That is, blood is the source of human life, therefore humans are forbidden to eat blood.

Now, let's unveil the secret behind the verse: ***"Forbidden to you a carcass...that strangled, hit, fell, horned, and was devoured by wild animals, except for those you had time to slaughter...(Al Maa'idah: 5:3)***

It turned out that it was already revealed that ***"...the carcasses... of the strangled, the hit, the fallen, the***

horned, and the wild beast devoured... (Al Maa'idah: 5:3) has something to do with blood. Why does it have anything to do with blood?

The answer is

The secret is kept in the verse: "*..carcasses...that were strangled, beaten, fallen, horned, and "...was pounced on by a wild animal...(Al Maa'idah: 5:3)* meaning that when the animals died their blood did not bleed out "*...except for the one you had time to slaughter...(Al Maa'idah: 5:3)*

So, if an animal that "*...was pounced on by a wild animal...(Al Maa'idah: 5:3)* we still have time to "*...slaughter it...(Al Maa'idah: 5:3)* then we can eat it, the flesh, because the source of the animal's life or blood has been removed from the animal's body.
