ABSTRACT

Before I write down the problem on what basis, Isa son of Maryam, whom Allah breathed His spirit, is considered the son of God, I first ask Allah SWT. Here I try to open the veil to reveal the secret of what basis, Isa son of Maryam, whom Allah breathed His spirit, is considered the son of God from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool on what basis, Isa son of Maryam, whom Allah breathed His spirit, is considered the son of God, namely the verses:

"... We made apostles as angels, ... a man ... (Al An'aam: 6: 9)

When the Angels said: "O Maryam, indeed Allah delights you with words from Him, his name is Al Masih Isa, son of Maryam, a prominent person in this world and in the hereafter and among those who are brought near, (Ali 'Imran: 3:3

"So put up a veil from them; Then We sent our spirit to him, and he appeared before him a perfect human being. (Maryam: 19:17) "Maryam said: "Indeed I seek refuge from God, the most merciful, if you are pious. "to give you a holy son." (Maryam: 19:19) "Maryam said:" How can there be a son, when no human has ever touched me and I am not an adulteress! (Mary: 19:20)

"O People of the Book, do not transgress in your religion, and do not say against Allah except the truth. So believe in Allah and His messengers and do not say: "three", stop. It is better for you. - Allah is Sufficient for His Sustainer (An Nisaa': 4:171)

"Then he perfected and perfected into him his spirit and made for you visions and sights and hearts; you are a little grateful. (As Sajdah: 32: 9)

"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Verily, He is Most High, Most Wise. (Ash Shuura: 42:51)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38:72)

"And We put before their walls and behind their walls, and We covered them so that they could not see. (Yasin: 36:9)

Allah is the light of the sky and the earth... Light upon light (An Nuur: 24:35)

"And verily We have created man and know what the heart whispers, and We are nearer than his jugular vein (Qaf: 50:16)

"If you want to get married, you can do it now, and if you want it's over. And He is Mighty, Most Forgiving (Al Mulk: 67:2)

"Then he perfected and perfected into him his spirit and made for you visions and sights and hearts; you are a little grateful. (As Sajdah: 32: 9)

Jibril said: "So it is." Your Lord said: "That is easy for Me; and that We may use a sign for mankind and as a mercy from Us; and it is a matter that has been decided." (Maryam: 19:21)

In an effort to open the veil of Allah's secret on what basis, Jesus son of Mary, whom Allah breathed His spirit, is considered as the son of my god the basic trick of deoxyribonucleic acid or deoxyribonucleic acid or molecular structure.

HYPOTHESIS

Here I present the hypothesis that Allah's spirit is breathed into all humans on this earth, not only to Jesus the son of Mary, seen from the basic point of Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. The nucleotides in this group are derived from folate, a 5-carbon sugar and are obtained from nitrogen. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) has a yield of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms of carbon, 5 atoms of nitrogen and 5 atoms of hydrogen. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

HUMANS BORN INTO THE WORLD, THE SPIRIT OF GOD IS BLOWED INTO HIS BODY

Now, we still continue to focus our minds to reveal the secret hidden behind the verse: ***"...So when I have perfected the event and I have breathed into it My spirit... (Shaad: 38: 72)*** and the verse: ***"...Indeed Al Masih, Isa, the son of Maryam, is the messenger of Allah and His words which He conveyed to Mary, and a spirit from Him... (An Nisaa ': 4: 171)***

It turns out that it is not only Isa, the son of Maryam, whom Allah breathed ***"...spirit from Him...(An Nisaa' : 4: 171)*** or ***"... My spirit...(Shaad : 38: 72)*** but also to all humans born into this world

Why is ***"...my spirit...(Shaad: 38:72)*** blown by Allah to all humans who are born into the world?

The answer is

The secret is hidden behind the verse: ***"... so that He may test you, which of you is better in deed... Al Mulk: 67: 2)***

So, by going through ***"...my spirit...(Shaad: 38:72)*** , then Allah will ***"...test you, which of you is better in deed... Al Mulk: 67:2)***

Where ***"... My spirit... (Shaad: 38: 72)*** is what will return to Allah, after humans die.

WHAT IS THE SPIRIT OF ALLAH

Now, we continue to unravel the secret behind the verse: ***"Then he perfected and breathed into him his spirit and made for you hearing and sight and hearts; you are very grateful. (As Sajdah: 32: 9)***

Apparently, now it was revealed, that *"...my spirit...(Shaad: 38:72)* is what will become *"...hearing, seeing and heart...(As Sajdah: 32:9)*

It means, *"... My spirit... (Shaad: 38: 72)* is what makes a perfect human being.

Or in other words, *"... my spirit...(Shaad : 38: 72)* is Deoxyribonucleic acid (DNA).

Based on deoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Where carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms exist all around us and in the atmosphere.

Deoxyribonucleic acid (DNA) is a long strand that wraps around chromosomes.

Where Chromosomes are structures in a cell where all or part of the genome is located. Humans have 23 pairs of chromosomes

So, now, it's all open, that *"...my spirit...(Shaad: 38:72)* is Deoxyribonucleic acid (DNA), a long strand that wraps around chromosomes, which forms a perfect human being.

ISA SON OF MARYAM CONTAINS THE SPIRIT OF ALLAH, LIKE OTHER HUMANS

Now, let's unveil the secret behind the verse: *"...Isa the son of Maryam,...His words which He conveyed to Maryam, and the spirit from Him...(An Nisaa ': 4: 171)*

Apparently, Isa son of Maryam is no different from all humans born into the world who have been blown *"...spirit from Him...(An Nisaa': 4: 171)* or *"...My spirit...(Shaad :38:72)* into his body.

That is, Isa son of Maryam is a human being whose body contains Deoxyribonucleic acid (DNA) just like Deoxyribonucleic acid (DNA) in the body of all humans born into the world.

ISA THE SON OF MARYAM IS NOT THE SON OF GOD

Now, let's continue to unravel the secret that is hidden behind the verse: *"...We sent our spirit to him, so he incarnated before him a perfect human being. (Mary: 19:17)*

Where *"...Our spirit...(Maryam: 19:17)* is Jibril, who is in the form of *"...a perfect human. (Maryam: 19:17)*

Jibril said: *"So it is." Your Lord said: "This is easy for Me; and that We may make it a sign for mankind and as a mercy from Us...(Maryam: 19:21)*

It turns out that now it has been revealed, that Isa the son of Maryam is not the son of God, but an ordinary human being, whom Allah has *"...blowed into him his spirit...(As Sajdah: 32: 9)*

CONCLUSION

Based on the description above, we can conclude that the secret hidden behind the verse: *"...So when I have perfected the event and I have breathed into it My spirit... (Shaad: 38: 72)* and the verse: *"...Indeed Al Masih, Isa, the son of Maryam, is the messenger of Allah and His words which He conveyed to Mary, and a spirit from Him... (An Nisaa ': 4: 171)*

It turns out that it is not only Isa, the son of Maryam, whom Allah breathed *"...spirit from Him...(An Nisaa' : 4: 171)* or *"... My spirit...(Shaad : 38: 72)* but also to all humans born into this world

The answer is

The secret is hidden behind the verse: *"... so that He may test you, which of you is better in deed... Al Mulk: 67: 2)*
