## ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding the spirit of Allah in the human body based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about Allah's spirit in the human body, namely the following verses:

*"And they ask you about the spirit. Say: "The spirit belongs to the business of my Lord, and knowledge is not given to you but a little." (Al Israa ': 17: 85)*

*"Then He perfected and breathed into it His spirit and He made for you hearing, sight and hearts; you are very little grateful. (As Sajdah: 32: 9)*

*"And (remember the story of) Maryam who kept her honor, then We breathed into her a spirit from Us and We made her and her child a great sign (of Allah's power) for the worlds. (Al Anbiyaa': 21: 91)*

*"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourselves (Al Hijr: 15: 29)*

*"And verily We have created man and know what his heart whispers, and We are closer to him than his jugular vein." (Qaf: 50:16)*

In an effort to open the veil of Allah's secret about Allah's spirit being in the human body, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## HYPOTHESIS

Here I propose the hypothesis that Allah's spirit is a basic particle consisting of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms seen from the basic point of Deoxyribonucleic acid (DNA).

## DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **WE ARE A LITTLE OPENING THE SPIRIT OF ALLAH**

Now we focus again on uncovering the secret hidden behind the verse: *"And they ask you about the spirit. Say: "The spirit belongs to my Lord's business, and knowledge is not given to you but a little." (Al Israa ' : 17: 85)*

Well, it turns out that it's about the spirit of Allah *"...including the business of my Lord...(Al Israa' : 17: 85)*

But it can still be explored, explored, studied and understood about the spirit of Allah even though it is the spirit of Allah because *"... you were not given knowledge but a little." (Al Israa ' : 17: 85)*

Well, here Allah has declared about the spirit of Allah *"... you were not given knowledge ..." (Al Israa ' : 17: 85) "...but a little." (Al Israa ' : 17: 85)*

It turns out that now it has been revealed that with the hole that Allah has given to know the spirit of Allah with Allah's statement *"...but a little." (Al Israa ' : 17: 85)*

Now with the *"...little" knowledge hole (Al Israa': 17: 85)* this is where we will open the secret of Allah's spirit.

## **ALLAH'S SPIRIT**

Now we focus on the secret behind the verse: *"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart;... (As Sajdah: 32: 9)*

Well, now it is clearly seen by us, *"...He perfected and breathed into it His spirit... (As Sajdah: 32: 9)*

Now, what does Allah breathe with His spirit?

The answer is Deoxyribonucleic acid (DNA)

This DNA is the picture of how the human body is built, how the human body must be built so that it becomes a perfect human being.

Well, through this DNA basis *"...He made for you hearing, sight and heart;...(As Sajdah: 32: 9)*

Now more and more proven, ears to hear, eyes to see and heart are some of the building blocks of the human body which is built on the image of the building of DNA.

Or in other words, the building of the human body is built based on the spirit of Allah which is breathed into humans, when the baby branches begin to be formed in the mother's womb.

## **THE SPIRIT OF ALLAH IS BLOWN INTO MARYAM'S BODY**

Now we continue to unravel the secret behind the verse: *"And (remember the story of) Maryam who has kept her honor, then We breathed into her (body) a spirit from Us and We made her and her child a great sign (of Allah's power) for the worlds. (Al Anbiyaa': 21: 91)*

It turns out that now it is increasingly being revealed that the spirit of Allah is DNA that was blown into Maryam so that Maryam conceived and gave birth to Jesus, who as an adult was appointed a prophet.

Now, based on deoxyribonucleic acid (DNA) humans are made up of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere. These atoms are the raw materials for the manufacture of humans, animals, fungi, amoeba, plants, bacteria and archaea.

## THE SPIRIT OF ALLAH IS IN THE HUMAN BODY

Now the secret of Allah's spirit has been revealed with *"...a little" knowledge (Al Israa': 17: 85)* namely the spirit of Allah consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Why is Allah *"...closer to him than his jugular vein, (Qaaf: 50:16)?*

The answer is

Because the spirit of Allah is in the human body.

## CONCLUSION

Based on the description above, we can conclude that the secret hidden behind the verse: *"And they ask you about the spirit. Say: 'The spirit belongs to my Lord's business, and knowledge is not given to you but a little.' (Al Israa' : 17: 85)*

Well, it turns out that it's about the spirit of Allah *"...including the business of my Lord...(Al Israa' : 17: 85)*

But it can still be explored, explored, studied and understood about the spirit of Allah even though it is the spirit of Allah because *"... you were not given knowledge but a little." (Al Israa' : 17: 85)*

Well, here Allah has declared about the spirit of Allah *"... you were not given knowledge ..." (Al Israa' : 17: 85) "...but a little." (Al Israa' : 17: 85)*

It turns out that now it has been revealed that with the hole that Allah has given to know the spirit of Allah with Allah's statement *"...but a little." (Al Israa' : 17: 85)*

Now with the *"...little" knowledge hole (Al Israa': 17: 85)* this is where we will open the secret of Allah's spirit.

Now we focus on the secret behind the verse: *"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart;... (As Sajdah: 32: 9)*
