ABSTRACT

First, by asking forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding the secret of Allah creating the wife of Prophet Adam from the Prophet Adam from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

Signs of the greatness of Allah SWT about Allah creating the wife of Prophet Adam from the Prophet Adam in the verses:

"...Allah created Adam from clay, then Allah said to him: "Be" (a human being), so he was. (Ali 'Imran: 3:59)

"(O mankind, fear your Lord, who created you from a single person, and from him Allah created his wife; and from both of them Allah gave birth to many males and females...(An Nisaa ': 4:4) 1)

In an effort to unveil the greatness of Allah SWT about Allah creating the wife of Prophet Adam from Prophet Adam, I used the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose the hypothesis that Allah created the wife of the Prophet Adam with the same DNA as the DNA of the Prophet Adam, seen from the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on deoxyribonucleic acid (DNA) humans are composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere. These atoms are the raw materials for the manufacture of humans, animals, fungi, amoeba, plants, bacteria and archaea.

DEOXYRIBONUCLEIC ACID (DNA) THE PROPHET OF ADAM IS THE SAME AS THE DNA OF THE PROPHET ADAM'S WIFE

Well, let's dig deeper into the secret behind the verse: *"... Allah created Adam from clay,... (Ali 'Imran: 3:59)*

Now it is revealed that the soil actually contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

So actually Allah created Adam from carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms which based on human deoxyribonucleic acid (DNA) consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

THE PROPHET ADAM'S WIFE CREATED FROM THE SAME DNA WITH THE PROPHET ADAM'S DNA

We uncover the secret behind the verse: *"(...and from him Allah created his wife;...(An Nisaa ': 4: 1)*

Well now, the question is

What did Allah create Prophet Adam's wife from?

The answer is

Because the wife of the Prophet Adam was created from the Prophet Adam himself, then that means the wife of the Prophet Adam was created from the same DNA as the DNA of the Prophet Adam.

Or in other words, the wife of Prophet Adam was created from the Prophet Adam, whether it be from the ribs, or from the bones of the hands, or from the bones of the feet of the Prophet Adam, it is the same as the DNA of the Prophet Adam. Because the bones of the Prophet Adam contain DNA.

Now revealed the secret behind the verse: *"(...and from him Allah created his wife;...(An Nisaa ': 4: 1)* Namely, the wife of the Prophet Adam was created by Allah from the same deoxyribonucleic acid (DNA) as the DNA of the Prophet Adam.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"... Allah created Adam from clay,... (Ali 'Imran: 3:59)*

Now it is revealed that the soil actually contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

So actually Allah created Adam from carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms which based on human deoxyribonucleic acid (DNA) consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

We uncover the secret behind the verse: *"(...and from him Allah created his wife;...(An Nisaa ': 4: 1)*

Well now, the question is

What did Allah create Prophet Adam's wife from?

The answer is

Because the wife of the Prophet Adam was created from the Prophet Adam himself, then that means the wife of the Prophet Adam was created from the same DNA as the DNA of the Prophet Adam.

Or in other words, the wife of Prophet Adam was created from the Prophet Adam, whether it be from the ribs, or from the bones of the hands, or from the bones of the feet of the Prophet Adam, it is the same as the DNA of the Prophet Adam. Because the bones of the Prophet Adam contain DNA.

Now revealed the secret behind the verse: "*(...and from him Allah created his wife;...(An Nisaa ': 4: 1)* Namely, the wife of the Prophet Adam was created by Allah from the same deoxyribonucleic acid (DNA) as the DNA of the Prophet Adam.
