ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of Allah SWT regarding the secret of Allah regarding the beginning in paradise created by angels, humans, jin and devils are one type based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (deoxyribonucleic acid). DNA)

In the Qur'an found several verses that are the key to unlocking the secret of Allah's secret about the beginning in heaven created by angels, humans, jin and devils are one type of verses:

"And that there are some men among mankind asking for protection from some men among the jinn, then the jin add to their sins and mistakes. (Al Jin: 72: 6)

"And if We made the apostle an angel, We would certainly have made him a man and (if We had made him a man), We would have doubted about them what they doubted about themselves. (Al An'aam : 6: 9)

"And We created the jin before (Adam) from a very hot fire. (Al Hijr: 15: 27)

"And verily We created man (Adam) from dry clay (derived) from black mud which was given shape. (Al Hijr: 15: 26)

"The devil said: "I am better than him, because You created me from fire, while you created him from clay." (Shaad: 38:76) "... He is from the jin group, ... (Al Kahf: 18:50)

"(And Allah said): "O Adam, dwell you and your wife in Paradise and both of you eat (fruit) wherever you like, and do not both of you approach this tree, then both of you become of those who unjust." (Al A'raaf: 7: 19)

In an effort to open the veil about the beginning in paradise created angels, humans, jin and demons are one type based on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that angels, humans, jin and demons are one type, made up of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms when viewed from the point of view of photons, quarks and Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

To find out quarks, we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

ANGELS, HUMANS, JIN AND DEVIL CREATED IN PARADISE WHERE ADAM AND HIS WIFE WAS CREATED

Let us now together focus our minds to uncover the secret behind the verse: *"(And Allah said): "O Adam, dwell you and your wife in Paradise and both of you eat (fruit) wherever you like, and do not both of you approach this tree, then both of you become of those who unjust." (Al A'raaf: 7: 19)*

Well, the circumstances and situations described in the verse above are the conditions and situations in heaven. Where Adam and his wife lived and lived.

IN THE BODY OF ANGELS, HUMANS, JIN AND DEVIL CONTAIN OXYGEN ATOM, HYDROGEN ATOM, NITROGEN ATOM AND CARBON ATOM

Now we see and notice *"And if We made the apostle an angel, We would certainly have made him a man and (if We made him a man) .. (Al An'aam: 6: 9)*

It turned out that the angel was a man.

Then *"And We created the jinn before (Adam) from a very hot fire. (Al Hijr: 15: 27)*

Well, even here the jin were created from a very hot fire.

That very hot fire is atomic oxygen.

Then *"Iblis said: "I am better than him, because You created me from fire, while you created him from clay." (Shaad: 38:76) "... He is from the jinn group, ... (Al Kahf :18:50)*

Open now demons are created from fire, while in fire there are oxygen atoms.

Also we pay attention now *"And verily We have created man (Adam) from dry clay (derived) from black mud which was given shape. (Al Hijr: 15: 26)*

Now it is complete, where Adam was created from soil, where in the soil contains carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms.

So now it has been revealed that angels, humans, jinn and devils are one kind.

Because in their bodies they contain carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: ***"(And Allah said): "O Adam, dwell you and your wife in Paradise and both of you eat (fruit) wherever you like, and do not both of you approach this tree, then both of you become of those who unjust." (Al A'raaf: 7: 19)***

Well, the circumstances and situations described in the verse above are the conditions and situations in heaven. Where Adam and his wife lived and lived.

Now we see and notice ***"And if We made the apostle an angel, We would certainly have made him a man and (if We made him a man) .. (Al An'aam: 6: 9)***

It turned out that the angel was a man.

Then ***"And We created the jinn before (Adam) from a very hot fire. (Al Hijr: 15: 27)***

Well, even here the jin were created from a very hot fire.

That very hot fire is atomic oxygen.

Then ***"Iblis said: "I am better than him, because You created me from fire, while you created him from clay." (Shaad: 38:76) "... He is from the jinn group, ... (Al Kahf :18:50)***

Open now demons are created from fire, while in fire there are oxygen atoms.

Also we pay attention now ***"And verily We have created man (Adam) from dry clay (derived) from black mud which was given shape. (Al Hijr: 15: 26)***

Now it is complete, where Adam was created from soil, where in the soil contains carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms.

So now it has been revealed that angels, humans, jinn and devils are one kind.

Because in their bodies they contain carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms.
