UNLOCKING ALLAH'S SECRETS ABOUT HOW ALLAH FERTILIZES THE EARTH SO THAT VARIOUS TREE AND PLANTS LIVE

ABSTARCT

First of all, by asking forgiveness from Allah SWT here I try to reveal the signs of Allah SWT about how Allah fertilizes the earth so that various trees and plants live based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

In the Qur'an there is a verse that is the key to unlocking the secret of how Allah fertilizes the earth so that various trees and plants live, namely the verse:

"...and He sends down rain from the sky, then gives life to the earth with water after it dies. Verily in that are signs for a people who use their minds. (Ar Ruum: 30: 24)

"Allah is the light of the heavens and the earth....Light upon light (in layers), Allah guides to His light whom He wills...(An Nuur: 24:35)

In an effort to unmask how God enriched the earth so that various trees and plants live, I use photons, quarks and deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that water contains hydrogen atoms and oxygen atoms that nourish the earth so that various trees and plants live based on photons, quarks and Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

As for if we want to know quarks, then we look at one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the

body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

RAINWATER GRAINS CONTAINS MILLIONS OF OXYGEN (O) AND HYDROGEN (H) ATOMS

Let us together uncover the secret behind the verse: *"...and He sends down rain from the sky,...(Ar Ruum: 30: 24)*

Well, if we unpack what is in the rainwater, the H₂O, which falls from the sky, turns out to be gathering millions of oxygen atoms and hydrogen atoms.

TURNING EARTH WITH HYDROGEN (H) AND OXYGEN (O) ATOMS

This is the secret behind the verse: *"... revives the earth with water after it dies... (Ar Ruum: 30: 24)*

Because with the rain that falls from the sky which consists of hydrogen atoms and oxygen atoms, H₂O, the earth becomes alive and fertile which was previously arid, so that trees, plants and all flowers thrive.

Trees, plants and all flowers need food which is glucose or sugar formed from the arrangement of carbon atoms (C), oxygen atoms and hydrogen atoms, where carbon atoms are in the soil while oxygen atoms and hydrogen atoms are obtained from rain water, which decomposed with the help of Allah's light layer in the form of energy-carrying photons.

ALLAH'S LAYER OF LIGHT THAT ARE PHOTON GIVES ENERGY

By being illuminated by a layer of Allah's light in the form of photons that provide energy or energy to all living organisms, including humans, trees, plants, plants and flowers so that they live fertile. It turns out that with *"Allah the light of the heavens and the earth.... Light on the light (in layers),... (An Nuur: 24: 35) "... revives the earth with water after its death...(Ar Ruum : 30:24)*

Now Allah's secret is revealed behind the verse: *"...and He sends down rain from the sky, then gives life to the earth with water after its death. Indeed, in that there are indeed signs for a people who use their minds. :24)*

All of that is due to the presence of hydrogen atoms, oxygen atoms, carbon atoms and photons.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"...and He sends down rain from the sky,...(Ar Ruum: 30: 24)*

Well, if we unpack what is in the rainwater, the H₂O, which falls from the sky, turns out to be gathering millions of oxygen atoms and hydrogen atoms.

This is the secret behind the verse: *"... revives the earth with water after it dies... (Ar Ruum: 30: 24)*

Because with the rain that falls from the sky which consists of hydrogen atoms and oxygen atoms, H₂O, the earth becomes alive and fertile which was previously arid, so that trees, plants and all flowers thrive.

Trees, plants and all flowers need food which is glucose or sugar formed from the arrangement of carbon atoms (C), oxygen atoms and hydrogen atoms, where carbon atoms are in the soil while oxygen atoms and hydrogen atoms are obtained from rain water, which decomposed with the help of Allah's light layer in the form of energy-carrying photons.

By being illuminated by a layer of Allah's light in the form of photons that provide energy or energy to all living organisms, including humans, trees, plants, plants and flowers so that they live fertile. It turns out that with "*Allah the light of the heavens and the earth.... Light on the light (in layers),... (An Nuur: 24: 35) "... revives the earth with water after its death...(Ar Ruuum : 30:24)*

Now Allah's secret is revealed behind the verse: "*...and He sends down rain from the sky, then gives life to the earth with water after its death. Indeed, in that there are indeed signs for a people who use their minds. :24)*

All of that is due to the presence of hydrogen atoms, oxygen atoms, carbon atoms and photons.
