## ABSTRACT

First of all, by asking forgiveness from Allah SWT here I try to reveal the signs of Allah SWT about making love in paradise the same as making love on earth based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA)

In the Qur'an found several verses that are the key to unlocking the secret about making love in paradise the same as making love on earth, namely the following verses:

*"And We said: "O Adam, dwell in this paradise for you and your wife, and eat from its abundant good food wherever you like, and do not approach this tree, which causes you to be among the wrongdoers. (Al Baqarah: 2:35)*

*"(And Allah said): "O Adam, dwell you and your wife in Paradise and both of you eat (fruit) wherever you like, and do not both of you approach this tree, then be both of you of those who unjust." (Al A'raaf: 7:19)*

*"Then the devil whispered evil thoughts to him, saying: "O Adam, will I show you the tree of khuldi and the kingdom that will not perish?" (Thaahaa: 20: 120)*

*"So both of them ate from the fruit of the tree, then their nakedness became visible to both of them and they began to cover them with leaves (which were in) Paradise, and Adam disobeyed God and went astray (Thaahaa: 20:121)*

In an effort to unmask about making love in paradise the same as making love on earth, I based on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## HYPOTHESIS

Here I propose a hypothesis that making love in paradise is no different from making love on earth from the point of view of photons, quarks and deoxyribonucleic acid (DNA).

## DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **PARADISE IS NO DIFFERENT THAN ON EARTH**

Now we are back to revealing the secret behind the verse: *"And We said: "O Adam, dwell in this paradise with you and your wife, and eat more and more good food wherever you like, .. (Al Baqarah: 2: 35)*

Well, here it is clearly seen by us that paradise is on our earth.

Why?

Because Adam and his wife have the same Deoxyribonucleic acid (DNA) as human DNA now on this earth.

So, because Adam and his wife share the same DNA as ours, then paradise is a place no different from any place on earth.

## **ADAM IN LOVE WITH HIS WIFE IS NOT MUCH DIFFERENT FROM HUSBAND AND WIFE IN LOVE ON THIS EARTH.**

Next, we dig deeper into the secret behind the verse: *"... the devil whispered evil thoughts to him, saying: "O Adam, will I show you the khuldi tree and the kingdom that will not perish?" (Thaahaa: 20: 120 )*

Now, the lustful impulses that exist in every human being, are the same as the lustful impulses of Adam and his wife in paradise.

With the description of seduction and persuasion *"... the devil whispered evil thoughts to him, saying: "O Adam, will I show you the tree of khuldi and the kingdom that will not perish?"*

Where this shaitan is also in human form which encourages and stimulates Adam and his wife towards the urge to make love.

Well, the urge to make love in paradise is not much different from the urge to make love between husband and wife on this earth.

## **LOVE WITH DREAMS FULL OF ENJOYMENT IS A FALSE PLEASURE**

Here it is described in the verse: *"...O Adam, will I show you the tree of khuldi and the kingdom that will not perish?..."*

Well, the picture that we can take from the verse above is the encouragement and stimulation of making love that is full of passion and never ends.

After all, it was just a fleeting pleasure. The impulses and stimuli that arise from within Adam and his wife are also the same as those that arise from within husbands and wives on this earth.

## **NOT BEING ABLE TO CONTROL THE INSIDE OF ADAM AND HIS WIFE DRIVES AND STIMULI RESULTING IN THEIR SLIPING INTO A DEEP ABYSS**

Now, what is the secret behind the verse: *"So both of them ate from the fruit of the tree, then their private parts appeared to them and they both began to cover them with leaves (which were in) Paradise, and Adam disobeyed God and went astray (Thaahaa) : 20:121)*

It turned out that, as a result of Adam and his wife following the impulse and stimulation of making

love beyond limits, making love that knows no boundaries and time, making love as if life is just for making love, finally Adam and his wife fell into a deep abyss and **"...including people the unjust. (Al Baqarah: 2: 35) and ... Adam disobeyed God and went astray (Thaahaa: 20: 121)**

The state of Adam and his wife making love in this paradise is not much different from the state of love on this earth between husband and wife which is excessive and beyond normal limits.

## CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: **"And We said: "O Adam, dwell in this paradise with you and your wife, and eat more and more good food wherever you like, .. (Al Baqarah: 2: 35)**

Well, here it is clearly seen by us that paradise is on our earth.

*Baqarah: 2: 35) and ... Adam disobeyed God and went astray (Thaahaa: 20: 121)*

The state of Adam and his wife making love in this paradise is not much different from the state of love on this earth between husband and wife which is excessive and beyond normal limits.
