ABSTRACT

Before the author writes about Adam is the first human, believed by Jews, Christians, Muslims in teh world, even though Adam refers to a living organism that has one cell, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of Adam is the first human, believed by Jews, Christians, Muslims in teh world, even though Adam refers to a living organism that has one cell, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about Adam is the first human, believed by Jews, Christians, Muslims in teh world, even though Adam refers to a living organism that has one cell, namely the following verses:

"He created you from a single self and from him He created his wife, so that she would be pleased with him...(Al A'raaf: 7:189).

"Then He perfected the body of Adam and breathed into Adam His spirit and He made for you hearing, sight and heart, you are very little grateful. (As Sajdah: 32: 9).

"Who has created the seven skies in layers. You never see in the creation of God the Most Gracious something that is not balanced. So look again and again, do you see anything that is not balanced (Al Mulk: 67: 3).

In an effort to uncover Allah's secret veil about Adam is the first human, believed by Jews, Christians, Muslims in teh world, even though Adam refers to a living organism that has one cell, the author uses the basis of deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes hypothesis Adam is the first human, believed by Jews, Christians, Muslims in teh world, even though Adam refers to a living organism that has one cell, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interaction.

QUARK

If we want to know about quarks, then we have to look at one of the hydrogen atoms, which is the building element of the human body, animals, plants and fruits, as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLEATED ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 atom of phosphorus, 4 atoms of oxygen and 2 atoms of hydrogen. A 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human Deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere.

ADAM IS THE FIRST HUMAN, BELIEVED BY JEWS, CHRISTIANS, MUSLIMS IN THE WORLD, EVEN THOUGH ADAM REFERS TO A LIVING ORGANISM THAT HAS ONE CELL

Now, we are still concentrating on dismantling the secrets contained behind the verses "*He created you from a single self...*(*Al A'raaf: 7:189*).

Well, it turns out here, Allah or Jahve or Adonai has revealed the real secret about how human was created with the declaration "*He created you from a single self...*(*Al A'raaf: 7:189*).

Now, the question arises,

What exactly does Allah or Jahve or Adonai mean by "*...a single self...*(*Al A'raaf: 7:189*)?

It turns out, the secret of "*...a single self...*(*Al A'raaf: 7:189*) is in the secret behind the verse "*...He...breathed into Adam His spirit and He made for you hearing, sight and heart...*(*As Sajdah: 32: 9*).

Well it turns out, "*...His spirit...*(*As Sajdah: 32: 9*) or "*...Allah's spirit...*(*As Sajdah: 32: 9*) or Jahve's spirit or Adonai's spirit is Deoxyribonucleic acid (DNA) which is the source of "*...hearing, sight and heart...*(*As Sajdah: 32: 9*).

So, actually, what Allah or Jahve or Adonai means by "*...a single self...*(*Al A'raaf: 7:189*) is Deoxyribonucleic acid (DNA) which contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Or in other words, the creation of human from "*...a single self...*(*Al A'raaf: 7:189*) is from hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Where the creation of human is the same as the creation of "*...seven skies...*(*Al Mulk: 67: 3*) which initially came from quark, then from hydrogen atoms, until they became "*...seven skies...*(*Al Mulk: 67: 3*) as they are now.

So, the creation of human is a series of creations of "*...seven skies...*(*Al Mulk: 67: 3*) which still continues until now and beyond.

Now, to find traces of the creation of human from *"...a single self...(Al A'raaf: 7:189)*, we can use the genetic code contained in the molecular structure of nucleic acid or DNA (Deoxyribonucleic acid) and through RNA (Ribonucleic acid) which has a role in synthesizing proteins and carrying out catalytic activities.

This genetic code is used by almost all types of living organisms from archaea, bacteria, plants, amoeba, fungi, animals to humans today. Because the genetic code applies universally, the same genetic code applies to all types of living organisms. With the similarity of this genetic code, we can say that humans living today have similarities in their genetic code with all other types of living organisms.

In other words, human including Adam and his wife have family relationships with all types of living organisms from archaea, bacteria, plants, amoeba, fungi to animals.

Living organisms that first appeared on earth several billion years ago inherited their traits to their descendants. Examples of this genetic code or codon are CAA and CAG which are amino acids or glutamine amino acids.

With the existence of a family relationship between humans and all other types of living organisms, this proves the truth of Allah's secret behind the verse *"He created you from a single self...(Al A'raaf: 7:189)*. Where Allah created human from *"...a single self...(Al A'raaf: 7:189)*, meaning from the beginning of a type of living organism that only has one cell.

So, the creation of human is a continuation of the creation of *"...seven skies...(Al Mulk: 67: 3)* which initially came from quark, then from hydrogen atoms, until they became *"...seven skies...(Al Mulk: 67: 3)*.

So actually, what Allah or Jahve or Adonai means by *"...a single self...(Al A'raaf: 7:189)* is Deoxyribonucleic acid (DNA) which contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Or in other words, the creation of human from *"...a single self...(Al A'raaf: 7:189)* is not from Adam and his wife, but from hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

This is empirical evidence, how human was created from *"...a single self...(Al A'raaf: 7:189)* namely from a living organism that only has one cell.

Now this is what most Jews, Christians and Muslims in the world do not understand.

CONCLUSION

Based on the explanation above we can conclude that the secrets contained behind the verses *"He created you from a single self...(Al A'raaf: 7:189)*.

Well, it turns out here, Allah or Jahve or Adonai has revealed the real secret about how human was created with the declaration *"He created you from a single self...(Al A'raaf: 7:189)*.

Well it turns out, "...*His spirit...*(As *Sajdah: 32: 9*) or "...*Allah's spirit...*(As *Sajdah: 32: 9*) or Jahve's spirit or Adonai's spirit is Deoxyribonucleic acid (DNA) which is the source of "...*hearing, sight and heart...*(As *Sajdah: 32: 9*).

So, actually, what Allah or Jahve or Adonai means by "...*a single self...*(*Al A'raaf: 7:189*) is Deoxyribonucleic acid (DNA) which contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.
