ABSTRACT

Before the author writes about after 4,6 billion years paradise and hell will be moved from earth to another earth which still has oxygen atoms, hydrogen atoms, carbon atoms and nitrogen atoms, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil covering the secret after 4,6 billion years paradise and hell will be moved from earth to another earth which still has oxygen atoms, hydrogen atoms, carbon atoms and nitrogen atoms, from the point of view of deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about after 4,6 billion years paradise and hell will be moved from earth to another earth which still has oxygen atoms, hydrogen atoms, carbon atoms and nitrogen atoms, namely the following verses:

"Angels and spirits ascend to God in a day whose levels are fifty thousand years (Al Ma'aarij: 70:4).

"Who has created the seven skys in layers. You do not see in the creation of the Most Gracious God anything that is not balanced. So look again and again, do you see something that is not balanced? (Al Mulk: 67: 3).

" When the sun is rolled up (At Takwiir: 81: 1).

"On the day the earth was replaced by another earth and the sky, and they all gathered to face the presence of Allah, the Almighty. (Ibrahim: 14: 48)

"And hasten to forgiveness from your God and to paradise as wide as the sky and the earth prepared for the pious (Ali 'Imran: 3: 133)

"It is Allah who sent down the book with truth and balance. And do you know you, maybe the Day of Judgment is near? (Asy Syuura: 42:17)

In an effort to reveal the secret of Allah about how after 4,6 billion years paradise and hell will be moved from earth to another earth which still has oxygen atoms, hydrogen atoms, carbon atoms and nitrogen atoms, the author uses the basis of deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes a hypothesis after 4,6 billion years paradise and hell will be moved from earth to another earth which still has oxygen atoms, hydrogen atoms, carbon atoms and nitrogen atoms, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARKS

If we want to know quarks then we pay attention to one of the hydrogen atoms which is a building element of the human body, animals, plants and fruit as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules which are composed repeatedly of nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where Carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere.

AFTER 4,6 BILLION YEARS PARADISE AND HELL WILL BE MOVED FROM EARTH TO ANOTHER EARTH WHICH STILL HAS OXYGEN ATOMS, HYDROGEN ATOMS, CARBON ATOMS AND NITROGEN ATOMS

Now, we are still concentrating on uncovering the secrets contained behind the verses: *"Who has created the seven skys in layers... (Al Mulk: 67: 3)" "When the sun is rolled up (At Takwiir: 81: 1) "...the earth was replaced by another earth and the sky...(Ibrahim: 14:48)" "...paradise whose breadth is as wide as the sky and the earth...(Ali 'Imran: 3:133)" "...do you know you, maybe the Day of Judgment is near? (Asy Syuura: 42:17).*

Now, here Allah has declared, that **4600000000** years from now, according to human calculations, Allah will roll up *"...the sun...(At Takwiir : 81:1)* and will replace *"...the earth is replaced with the earth another and the (other) skys...(Ibrahim: 14:48).*

So, now the question arises,

How long will the sun be rolled up according to human calculations?

The answer is

Hidden in the secret behind the verse: *"Angels and spirits ascend to God in a day whose levels are fifty thousand years (Al Ma'aarij: 70:4).*

Apparently, Allah counts at the speed of light according to Allah. That is, the speed of light according to Allah is 1 day equal to **18 262 980** days according to human calculations.

CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verses: *"Who has created the seven skys in layers... (Al Mulk: 67: 3)" "When the sun is rolled up (At Takwiir: 81: 1) "...the earth was replaced by another earth and the sky...(Ibrahim: 14:48)" "...paradise whose breadth is as wide as the sky and the earth...(Ali 'Imran: 3:133)" "...do you know you, maybe the Day of Judgment is near? (Asy Syuura: 42:17).*

Now, here Allah has declared, that **4600000000** years from now, according to human calculations, Allah will roll up *"...the sun...(At Takwiir : 81:1)* and will replace *"...the earth is replaced with the earth another and the (other) skys...(Ibrahim: 14:48).*

So, now the question arises,

How long will the sun be rolled up according to human calculations?

The answer is

Hidden in the secret behind the verse: *"Angels and spirits ascend to God in a day whose levels are fifty thousand years (Al Ma'aarij: 70:4).*

Apparently, Allah counts at the speed of light according to Allah. That is, the speed of light according to Allah is 1 day equal to **18 262 980** days according to human calculations.

So, if calculated according to humans, at the speed of light according to human calculations, the sun will be rolled up about **4600000000** years from now.

Well, according to human calculations, hydrogen atoms as fuel in the sun will run out in about **4600000000** years.

So, during that time *"...my spirit...(Shaad : 38:72)* or *"...Allah's spirit...(Shaad : 38:72)* that already exists and lives in paradise and hell, must wait **4600000000** years to be transferred to another earth that still has oxygen atoms and hydrogen atoms. .

Because if the sun runs out of hydrogen atoms, then the sun will die, or in other words *"... the sun is rolled up (At Takwiir: 81: 1)*

So, now the question arises again, how many other suns are there in the Milky Way galaxy, which are the same degree as our sun today?

The answer is,

If the sun or any other star had the same mass as our sun today, when our sun is rolled up, then most likely there is no sun or star like our sun.

The problem is, the sun or other stars that have the same mass as our sun, **4600000000** years from now, will run out of hydrogen atoms as fuel.

Well, here is the problem.

Most likely there is no sun or other star that has the same model and mass as our sun in this Milky Way galaxy.

Now, if there was a sun or a star that was bigger or smaller than our sun, then there would not be an earth similar to our present earth model, which revolves around that big or small star, which can be made a new place for paradise and hell.

Well, now, until now, there has not been found a sun model like our sun today, in the Andromeda galaxy, if there is, then it is certain that the sun or star has run out of hydrogen atoms, just as our sun has run out of hydrogen atoms for fuel.

In other galaxies that are billions of billions in number, similarly, if you want to look for a sun or a star like our sun today, the sun or star will also run out of hydrogen atoms.

Well, the problem is, if you want to get oxygen atoms, hydrogen atoms, nitrogen atoms, carbon atoms like on our earth, then you have to look for a sun or star similar to our sun. The distance between the sun and the earth must be the same, no more, no less.

Of course, "*... the earth is replaced with another earth and (other) sky... (Ibrahim: 14: 48)* although it is not exactly the same as the earth and the sun today, it does not matter, because those who live in paradise and hell is "*...my spirit...(Shaad : 38:72)* or "*...Allah's spirit...(Shaad : 38:72)*.

Whatever the circumstances in paradise and hell, "*...my spirit...(Shaad : 38:72)* will live to an age 10 00000000 00000000 00000000 00000000 00000000 00000000 00000000 00000000 00000000 00000000 years.
