ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding the secret about, Allah is closer than the jugular vein, what is Allah's form, from the point of view of photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

The signs of Allah's greatness regarding, Allah is closer than the jugular vein, what is Allah's form, are found in several verses, namely:

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And Mary, the daughter of Imran, who kept her honor, so We breathed into her some of Our spirits, and she confirmed the words of her Lord and His Books, and she was one of the obedient ones. (At Tahrir: 66:12)

"Allah is the light of the skys and the earth...Light upon light...(An Nuur: 24:35)

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when they ask Me, then let them fulfill (all My commands) and let them believe in - Me, that they may always be in the truth (Al Baqarah: 2: 186)

"... We are closer to him than his jugular vein, (Qaf: 50:16)

"He is Allah, Who made all that is on earth for you and He willed the skys, then He made seven skys. And He is All-Knowing of all things. (Al Baqarah: 2:29)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)

"And they do not glorify Allah with proper exaltation when the whole earth is in His hands on the Day of Resurrection and the heavens are rolled up with His right hand. Glory be to God and exalted is He above what they associate. (Az Zumar: 39: 67) Indeed, the Day of Judgment will surely come, there is no doubt about it, but most people do not believe (Al Mu'min: 40: 59)

In an effort to unmask the greatness of Allah SWT regarding, Allah is closer than the jugular vein, what is Allah's form, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose a hypothesis, Allah is closer than the jugular vein because "*... my spirit... (Al Hijr: 15: 29)* is in the form of Allah's energy, seen from photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA)." ?

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms which is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

ALLAH IS CLOSER THAN THE JUGULAR VEIN, IN THE FORM OF ALLAH'S ENERGY

Now, we are still concentrating on uncovering the secret behind the verse: "*... We are closer to him than his jugular vein, (Qaaf: 50:16)*

Now the question arises,

What exactly is meant by "*... We are closer to him than his jugular vein, (Qaaf: 50:16)*?

The answer is

Hidden secret behind the verse: "*...I breathed into him my spirit...(Shaad: 38: 72)*

Well, it turns out, Allah is "*...closer to him than his jugular vein, (Qaaf: 50:16)* because Allah has declared: "*...I breathed into him my spirit...(Shaad: 38:72)*

Now, if Allah is closer than the jugular vein, how do humans actually know the existence of Allah?

The answer is

Hidden behind the secret of the verse: *"He is Allah, who made all that is on earth for you and He willed the heavens, then He made seven skys... (Al Baqarah: 2: 29)*

Well, it turns out that Allah made *"... the seven skys... (Al Baqarah: 2: 29)* , meaning that the seven skys describe the room, which is called the universe, above which there are billions of galaxies, each galaxy consists of billions of galaxies. -billions of stars, planets and moons.

So, before becoming *"...the seven skys...(Al Baqarah: 2:29)* as it is today, it started with something invisible, something that became the core, of all that is in this universe.

Now, what is that thing called the core, of this universe?

The answer is

Quark

So, these quarks are the origin of the formation of this universe. Where the universe is filled with atoms. Hydrogen atoms, helium atoms, carbon atoms, oxygen atoms, nitrogen atoms, neon atoms.

Now, the question arises, how are quarks formed?

The answer is

Energy

So, where does the energy come from?

The answer is

Hidden behind the verse: *"...To Him belongs whatever is in the skys and the earth... (Al Baqarah: 2:255)*

That is, the energy of Allah, Allah who gives rise to energy.

Or in other words, Allah is the energy that gives birth to quarks, and eventually becomes atoms, and becomes *"...the seven skys...(Al Baqarah: 2:29)*

So, Allah's energy, which comes from Allah, within 0.0000000000 0000000000 0000000000 0000000000 001 seconds, creates quarks, which will become the nucleus of the atom.

This means that 1 second is divided by the number of digits 10000000000 0000000000 0000000000 0000000000 000 . The human mind cannot imagine how short time is, created by quarks through the energy of Allah.

Now, the secret behind the verse has been revealed: *"... We are closer to him than his jugular vein, (Qaaf: 50:16)*

That is, Allah's energy is a form of Allah that is closer than the human jugular vein.

So, actually, if humans want to understand about the form of Allah, then humans must understand about the energy of Allah that is in the human body.

That is, Allah's energy is in the entire human body, and that is the form of Allah, but humans do not

understand.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"... We are closer to him than his jugular vein, (Qaaf: 50:16)*

Now the question arises,

What exactly is meant by *"... We are closer to him than his jugular vein, (Qaaf: 50:16)*?
