## ABSTRACT

Before the author writes about Allah's spirit in Paradise feeling pleasure through the human bodies that are still alive on earth, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of Allah's spirit in Paradise feeling pleasure through the human bodies that are still alive on earth, based on Deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about Allah's spirit in Paradise feeling pleasure through the human bodies that are still alive on earth, namely the following verses:

*"So when I have perfected the existence of Adam and have breathed into Adam My spirit, then you will bow to Adam by prostrating (Al Hijr: 15: 29).*

*"Then He perfected and breathed into Adam His spirit and He made for you hearing, sight and hearts, you are very little grateful. (As Sajdah: 32: 9).*

*"So Mary lifted a veil from them, then We sent Our spirit to Mary, so Our spirit incarnated before Mary a perfect human (Maryam: 19: 17).*

*"Do not think that those who fall in the way of Allah are dead, they live by their God's side by getting sustenance. (Ali 'Imran : 3: 169).*

In an effort to uncover Allah's secret about Allah's spirit in Paradise feeling pleasure through the human bodies that are still alive on earth, the author uses deoxyribonucleic acid.

## HYPOTHESIS

Here the author proposes hypothesis Allah's spirit in Paradise feeling pleasure through the human bodies that are still alive on earth, based on Deoxyribonucleic acid (DNA).

## PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

## QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

## DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and

contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on Deoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere.

### **ALLAH'S SPIRIT IN PARADISE FEELING PLEASURE THROUGH THE HUMAN BODIES THAT ARE STILL ALIVE ON EARTH**

Now, we continue to focus our minds to uncover the secrets contained behind the verses: *"... I... breathed into Adam My spirit... (Al Hijr: 15: 29) "...Our spirit incarnated...a perfect human (Maryam: 19: 17).*

Now, Allah has declared *"... I... breathed into Adam My spirit... (Al Hijr: 15: 29).*

It turns out that *"...My spirit...(Al Hijr: 15: 29)* or *"...Allah's spirit...(Al Hijr: 15: 29)* that is in the human body does not die.

Now the question arises,

Why *"...My spirit...(Al Hijr: 15: 29)* or *"...Allah's spirit...(Al Hijr: 15: 29)* that is in the human body does not die?

Because first, the human body is built with 7 000000000 000000000 000000000 atoms, including hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms and other atoms that form blood, flesh, bones and other body cavities.

Second, when the blood, flesh, bones and other body cavities that make up the human body are no longer functional, and human die, then 7 000000000 000000000 000000000 atoms including *"...My spirit...(Al Hijr: 15: 29)* or *"...Allah's spirit...(Al Hijr: 15: 29)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms that are in the human body come out of the body.

Where *"...My spirit...(Al Hijr: 15: 29)* or *"...Allah's spirit...(Al Hijr: 15: 29)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms will live up to the age of 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 years.

Now, another question arises,

How does Allah's spirit who lives in paradise feel pleasure through the human body that is still alive on earth?

The answer lies in the secret behind the verse: *"...He...breathed into Adam His spirit and made for you*

*hearing, sight and heart...(As Sajdah: 32: 9).*

Well, it turns out that the source of "*...hearing, sight and heart...(As Sajdah: 32: 9)* is "*...His spirit...(As Sajdah: 32: 9)* or "*...Allah's spirit...(As Sajdah: 32: 9)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms, where hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms become the building blocks of Deoxyribonucleic acid (DNA), based on human Deoxyribonucleic acid (DNA) consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Where DNA is in blood, flesh, bones, sperm, eggs, saliva, sweat, hair and throughout the human body.

So, actually "*...Allah's spirit...(As Sajdah: 32: 9)* is a Deoxyribonucleic acid (DNA) building.

Well, the DNA in the human body is passed down from father to son, such as YDNA which is passed down from father to son and daughter, but only sons pass down YDNA which continues until now and so on.

Likewise mitochondrial DNA which is passed down from mother to daughter and to son, but only daughters pass down mitochondrial DNA which continues until now.

So actually in our bodies there is "*...Allah's spirit...(As Sajdah: 32: 9)* in the form of YDNA and mitochondrial DNA which come from our ancestors.

Well, because our ancestors have died and "*...Allah's spirit...(As Sajdah: 32: 9)* in the form of YDNA and mitochondrial DNA that comes from our ancestors is in our bodies, then our ancestors who have died will feel pleasure through "*...Allah's spirit...(As Sajdah: 32: 9)* in the form of YDNA and mitochondrial DNA that is in our bodies.

Or in other words, Allah's spirit who lives in paradise feels pleasure through the bodies of humans who are still alive on earth.

Or it can also be said that the reward of our ancestors who have died in paradise is obtained through "*...Allah's spirit...(As Sajdah: 32: 9)* in the form of YDNA and mitochondrial DNA that is in our bodies.

Whatever we enjoy on earth, will also be enjoyed by our ancestors who have died in paradise.

Now this is what is not understood by all humans including all Muslims in the world.

## CONCLUSION

From what is explained above, it can be concluded that the secrets contained behind the verses: "*... I... breathed into Adam My spirit... (Al Hijr: 15: 29)* "*...Our spirit incarnated...a perfect human (Maryam: 19: 17).*

Now, Allah has declared "*... I... breathed into Adam My spirit... (Al Hijr: 15: 29).*
