ABSTRACT

Before the author writes about Allah's spirit is eternal in the afterlife until all atoms and the universe disappear and return to Allah's energy, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret Allah's spirit is eternal in the afterlife until all atoms and the universe disappear and return to Allah's energy, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about Allah's spirit is eternal in the afterlife until all atoms and the universe disappear and return to Allah's energy, namely the following verses:

"Allah, there is no God but He Who lives eternally and continues to care, does not slumber or sleep. To Him belongs what is in the sky and the earth. No one can intercede with Allah without His permission. Allah knows what is before them and behind them, and they know nothing from the knowledge of Allah except what is desired by God. His seat covers the sky and the earth. And Allah does not find it difficult to maintain them, and Allah is Most High and Most Great (Al Baqarah: 2: 255). Ma'aarij (70: 4).

"Those who believe and do pious deeds, We will later enter them into paradise with rivers flowing in them, they will abide therein forever. Allah has made a true promise. And who is more truthful in his words than Allah? (An Nisaa': 4: 122).

"Angels and spirits ascend to God in a day that is worth fifty thousand years (Al Ma'aarij: 70: 4).

In an effort to reveal the greatness of Allah SWT regarding Allah's spirit is eternal in the afterlife until all atoms and the universe disappear and return to Allah's energy, the author uses deoxyribonucleic acid (DNA).

HYPOTHESIS

Here the author proposes hypothesis Allah's spirit is eternal in the afterlife until all atoms and the universe disappear and return to Allah's energy, based on deoxyribonucleic acid (DNA).

PHOTON

Photon is an elementary particle of the boson type and carrier of electromagnetic interactions.

QUARK

If we want to know quarks, we look at one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Furthermore, if this proton is split, we will find two upper quarks and one lower quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a place to store genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. These nucleotides consist of folate, 5-carbon sugars and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. As for 5-carbon sugar, it has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms, and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are abundant around us and in the atmosphere.

ALLAH'S SPIRIT IS ETERNAL IN THE AFTERLIFE UNTIL ALL ATOMS AND THE UNIVERSE DISAPPEAR AND RETURN TO ALLAH'S ENERGY

Now, we are still continuing to focus our minds to uncover the secret behind the verse: *"...in Paradise...they will abide therein forever...(An Nisaa': 4: 122).*

It turns out, here Allah has described to humans that *"...My spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* who lives in paradise *".. they will abide therein forever...(An Nisaa': 4: 122)* based on human calculations *"...a day that is worth fifty thousand years (Al Ma'aarij: 70: 4).*

Because only Allah is *"...Eternally alive... (Al Baqarah: 2: 255).*

Well, because only Allah is *"...Eternally alive and continuously taking care of...(Al Baqarah: 2: 255),* then the life of *"...My spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* who comes out of the body of a dead human, who lives in paradise and in hell, does not live forever.

"...My spirit...(Shaad: 38: 72) or *"...Allah's spirit...(Shaad: 38: 72)* which is built by hydrogen atoms, nitrogen atoms, carbon atoms and oxygen atoms after reaching the age of **10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000** years from now, then the atoms in *"...My spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* will disappear, because the nuclear energy that binds the quarks in the atoms is gone.

This means that the nuclear power that holds the quarks in the atom is lost, because the seven skys are getting wider and wider due to the push of dark energy, which can no longer be controlled by nuclear power, because nuclear power is getting weaker, finally disappears, and the quarks are released from the protons, protons are in every atom. What remains is the quark, where this quark is the nucleus of the atom.

Well, after the seven skys and all their contents die and disappear, they return to Allah's energy which is the source of life for the seven skys and all their contents. Allah's energy returns to Allah.

So, paradise, hell and *"...My spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* are not eternal, but are lost and return to Allah's energy. Allah's energy returns to Allah.

Or in other words, Allah's spirit is eternal in the afterlife until all atoms and the universe are lost and return to Allah's energy.

Allah and Allah's energy cannot be separated. There is Allah's energy, so there is Allah.

CONCLUSION

From what is described above we can now draw the conclusion that the secret behind the verse: *"...in Paradise...they will abide therein forever...(An Nisaa': 4: 122).*

It turns out, here Allah has described to humans that *"...My spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* who lives in paradise *".. they will abide therein forever...(An Nisaa': 4: 122)* based on human calculations *"...a day that is worth fifty thousand years (Al Ma'aarij: 70: 4).*

Because only Allah is *"...Eternally alive... (Al Baqarah: 2: 255).*

Well, because only Allah is *"...Eternally alive and continuously taking care of...(Al Baqarah: 2: 255),* then the life of *"...My spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* who comes out of the body of a dead human, who lives in paradise and in hell, does not live forever.

"...My spirit...(Shaad: 38: 72) or *"...Allah's spirit...(Shaad: 38: 72)* which is built by hydrogen atoms, nitrogen atoms, carbon atoms and oxygen atoms after reaching the age of **10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000** years from now, then the atoms in *"...My spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* will disappear, because the nuclear energy that binds the quarks in the atoms is gone.

This means that the nuclear power that holds the quarks in the atom is lost, because the seven skys are getting wider and wider due to the push of dark energy, which can no longer be controlled by nuclear power, because nuclear power is getting weaker, finally disappears, and the quarks are released from the protons, protons are in every atom. What remains is the quark, where this quark is the nucleus of the atom.

Well, after the seven skys and all their contents die and disappear, they return to Allah's energy which is the source of life for the seven skys and all their contents. Allah's energy returns to Allah.

So, paradise, hell and *"...My spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* are not eternal, but are lost and return to Allah's energy. Allah's energy returns to Allah.

Or in other words, Allah's spirit is eternal in the afterlife until all atoms and the universe are lost and return to Allah's energy.

Allah and Allah's energy cannot be separated. There is Allah's energy, so there is Allah.
