## ABSTRACT

Before the author writes about Allah's spirit makes human dead, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of Allah's spirit makes human dead based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about Allah's spirit makes human dead namely the following verse:

*"Allah holds the soul when it dies and the soul that has not yet died in its sleep, He holds the soul whose death He has determined and He releases the other soul until the appointed time. Verily in that there are signs of Allah's power for a people who think. (Az Zumar : 39: 42)*

*"So when I have perfected the existence of Adam and breathed into Adam my spirit, then you will fall down and prostrate to him (Shaad: 38: 72)*

*"He regulates interests from sky to earth, then ascends to Him in one day which is worth a thousand years according to your calculations (As Sajdah: 32: 5)*

*"What if the angel took their lives while striking their faces and their backs? (Muhammad: 47: 27)*

In an effort to uncover the truth about Allah's spirit makes human dead the author relies on deoxyribonucleic acid.

## HYPOTHESIS

Here the author proposes hypothesis Allah's spirit makes human dead, based Deoxyribonucleic acid (DNA)

## PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

## QUARKS

If we want to know quarks then we pay attention to one of the hydrogen atoms which is a building element of the human body, animals, plants and fruit as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

## DEOXYRIBONUCLEIC ACID (DNA)

DNA is a storage place for genetic information which has a double structure that forms a double helix and which contains polynucleotide macromolecules which are composed repeatedly of

nucleotide polymers. This nucleotide consists of folate, a 5 carbon sugar and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine(A), Cytocine(C) and Thyminine (T). Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thyminine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are found in abundance around us and in the atmosphere.

## **ALLAH'S SPIRIT MAKES HUMAN DEAD**

So now, we are still concentrating our minds on uncovering the secret stored in the verse: *"Allah holds the soul when it dies and the soul that has not yet died in its sleep, He holds the soul whose death He has determined and He releases the other soul until the appointed time...(Az Zumar : 39: 42) "...the angel took their lives...Muhammad : 47: 27)*

Well, here Allah reveals the real secret, about how *"Allah holds the soul when...its sleep... (Al An'aam: 6: 9)*

So now the question arises,

What does Allah actually mean by *"...soul...(Al An'aam: 6: 9)?*

The answer is in the secret behind the verse: *"...I breathed into Adam my spirit...(Shaad : 38: 72)*

Well, it turns out that what Allah means by *"...soul...(Al An'aam: 6: 9)* is *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)*, which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms, where hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms are formed with quarks, quarks are formed with Allah's energy.

So, what is the process of *"Allah holds the soul when...its sleep... (Al An'aam: 6: 9)?*

It turns out, *"Allah holds the soul when it dies...(Al An'aam: 6: 9)* refers to oxygen atoms, which are needed by millions of cells in the human body, being stopped. Without oxygen atoms, in just a few minutes, human will dead.

Well, what is meant by

So *"Allah holds the soul...(Az Zumar : 39: 42)* is the same as oxygen atoms, being stopped, entering the human body.

Or in other words, *"Allah holds the soul when it dies...(Al An'aam: 6: 9).*

So, in fact, *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* is what makes human die.

So now another question arises,

What about *"...the angel took their lives...(Muhammad: 47: 27)?*

Well here, it's also the same, because "...angel...(Muhammad: 47: 27) is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which form the nervous system, so when a human who has been determined to die, "...angel...(Muhammad : 47: 27) which are built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which form the nervous system make contact with "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad : 38: 72) which is in the body of a human who has been determined to die, and commands "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad : 38: 72) which is in the body of a human who has been determined to die to stop oxygen atoms from entering the nose and mouth of a human who has been determined to die.

So, now the question arises,

How "...angel...(Muhammad : 47: 27) which are built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which form the nervous system make contact with "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad : 38: 72) which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which form the nervous system in the human brain and in the human body which has determined to die?

Well, the answer is between "...angel...(Muhammad: 47: 27) which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which form the nervous system making contact with "...my spirit... (Shaad : 38: 72) or "...the spirit of Allah...(Shaad : 38: 72) which exists in the human body and brain at a speed greater than the speed of light **109 502 073 292.0968** km per second "... one day is worth a thousand years...(As Sajdah: 32: 5)

Or in other words, "...angel...(Muhammad: 47: 27) which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which form a nervous system that uses electromagnetic waves which have a speed greater than the speed of light **109 502 073 292.0968** km per second.

So, this is the secret of Allah that is still unknown to almost all Muslims in the world.

## CONCLUSION

Based on the description above, we can conclude that the secret stored in the verse: *"Allah holds the soul when it dies and the soul that has not yet died in its sleep, He holds the soul whose death He has determined and He releases the other soul until the appointed time...(Az Zumar : 39: 42) "...the angel took their lives...Muhammad : 47: 27)*

Well, here Allah reveals the real secret, about how *"Allah holds the soul when...its sleep... (Al An'aam: 6: 9)*

So now the question arises,

What does Allah actually mean by "...soul...(Al An'aam: 6: 9)?

The answer is in the secret behind the verse: *"...I breathed into Adam my spirit...(Shaad : 38: 72)*

Well, it turns out that what Allah means by "...soul...(Al An'aam: 6: 9) is *"...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad : 38: 72)*, which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms, where hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms are formed with quarks, quarks are formed with Allah's energy.

So, what is the process of *"Allah holds the soul when...its sleep... (Al An'aam: 6: 9)?*

It turns out, "*Allah holds the soul when it dies...*(*Al An'aam: 6: 9*) refers to oxygen atoms, which are needed by millions of cells in the human body, being stopped. Without oxygen atoms, in just a few minutes, human will dead.

Well, what is meant by

So "*Allah holds the soul...*(*Az Zumar : 39: 42*) is the same as oxygen atoms, being stopped, entering the human body.

Or in other words, "*Allah holds the soul when it dies...*(*Al An'aam: 6: 9*).

So, in fact, "*...my spirit...*(*Shaad: 38: 72*) or "*...Allah's spirit...*(*Shaad : 38: 72*) is what makes human die.

So now another question arises,

What about "*...the angel took their lives...*(*Muhammad: 47: 27*)?

Well here, it's also the same, because "*...angel...*(*Muhammad: 47: 27*) is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which form the nervous system, so when a human who has been determined to die, "*...angel...*(*Muhammad : 47: 27*) which are built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which form the nervous system make contact with "*...my spirit...*(*Shaad: 38: 72*) or "*...Allah's spirit...*(*Shaad : 38: 72*) which is in the body of a human who has been determined to die, and commands "*...my spirit...*(*Shaad: 38: 72*) or "*...Allah's spirit...*(*Shaad : 38: 72*) which is in the body of a human who has been determined to die to stop oxygen atoms from entering the nose and mouth of a human who has been determined to die.

So, now the question arises,

How "*...angel...*(*Muhammad : 47: 27*) which are built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which form the nervous system make contact with "*...my spirit...*(*Shaad: 38: 72*) or "*...Allah's spirit...*(*Shaad : 38: 72*) which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which form the nervous system in the human brain and in the human body which has determined to die?

Well, the answer is between "*...angel...*(*Muhammad: 47: 27*) which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which form the nervous system making contact with "*...my spirit...*(*Shaad : 38: 72*) or "*...the spirit of Allah...*(*Shaad : 38: 72*) which exists in the human body and brain at a speed greater than the speed of light **109 502 073 292.0968** km per second "*... one day is worth a thousand years...*(*As Sajdah: 32: 5*)

Or in other words, "*...angel...*(*Muhammad: 47: 27*) which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which form a nervous system that uses electromagnetic waves which have a speed greater than the speed of light **109 502 073 292.0968** km per second.

So, this is the secret of Allah that is still unknown to almost all Muslims in the world.
