ABSTRACT

Before the author writes about Allah's spirit that leaves the body of a dead human weighing 1.755 grams entering paradise or hell, while the other Allah's spirit weighing 2.025 grams incarnates as a human, animal, plants, fungi, bacteria, amoebas, viruses, first ask forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of Allah's spirit that leaves the body of a dead human weighing 1.755 grams entering paradise or hell, while the other Allah's spirit weighing 2.025 grams incarnates as a human, animal, plants, fungi, bacteria, amoebas, viruses, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about Allah's spirit that leaves the body of a dead human weighing 1.755 grams entering paradise or hell, while the other Allah's spirit weighing 2.025 grams incarnates as a human, animal, plants, fungi, bacteria, amoebas, viruses, namely the following verses:

"So when I have perfected the events of Adam and breathed into Adam My spirit, then you will fall down and prostrate to him." (Shaad: 38: 72).

"So Mary created a veil from them, then We sent Our spirit to Maryam, then Our spirit incarnated before Mary as a perfect human. (Maryam : 19: 17).

"Then He perfected and breathed into Adam His spirit and He made for you hearing, sight and heart, you are very few, grateful. (As Sajdah: 32: 9).

In an effort to uncover Allah's secret about Allah's spirit that leaves the body of a dead human weighing 1.755 grams entering paradise or hell, while the other Allah's spirit weighing 2.025 grams incarnates as a human, animal, plants, fungi, bacteria, amoebas, viruses, the author uses the basis of deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes hypothesis Allah's spirit that leaves the body of a dead human weighing 1.755 grams entering paradise or hell, while the other Allah's spirit weighing 2.025 grams incarnates as a human, animal, plants, fungi, bacteria, amoebas, viruses, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interaction.

QUARK

If we want to know about quarks, then we have to look at one of the hydrogen atoms, which is the

building block of the human body, animals, plants and fruits, as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLEATED ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 atom of phosphorus, 4 atoms of oxygen and 2 atoms of hydrogen. A 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on Deoxyribonucleic acid (DNA) humans are composed of 32.20 % atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere.

ALLAH'S SPIRIT THAT LEAVES THE BODY OF A DEAD HUMAN WEIGHING 1.755 GRAMS ENTERING PARADIS OR HELL, WHILE THE OTHER ALLAH'S SPIRIT WEIGHING 2.025 GRAMS INCARNATES AS A HUMAN, ANIMAL, PLANTS, FUNGI, BACTERIA, AMOEBAS, VIRUSES

So now, we still continue to concentrate our minds on uncovering the secrets contained behind the verses: "*...I breathed into Adam My spirit...(Shaad : 38: 72)*" "*...Our spirit incarnated...a perfect human being . (Maryam : 19: 17).*"

Well, in Allah's declaration about "*...my spirit...(Shaad: 38: 72)*" or "*...Allah's spirit...(Shaad: 38: 72)*" or "*...His spirit...(As Sajdah: 32: 9)*" which "*...breathed into Adam...(Shaad: 38: 72)*" has revealed Allah's great secret about "*...my spirit...(Shaad: 38: 72)*" or "*...Allah's spirit...(Shaad: 38: 72)*" or "*...His spirit...(As Sajdah: 32: 9)*" which "*...incarnated...a perfect human. (Maryam : 19: 17).*"

Now the question arises,

How exactly is "*...my spirit...(Shaad: 38: 72)*" or "*...Allah's spirit...(Shaad: 38: 72)*" or "*...His spirit...(As Sajdah: 32: 9)*" "*...incarnated...a perfect human. (Maryam : 19: 17)?*"

The answer is in the secret behind the verse: "*...He...breathed into Adama His spirit and He made for you hearing, sight and heart...(As Sajdah: 32: 9).*"

So apparently, "*...my spirit...(Shaad: 38: 72)*" or "*...Allah's spirit...(Shaad: 38: 72)*" or "*...His spirit...(As Sajdah: 32: 9)*" is the source of creation "*...hearing, sight and heart...(As Sajdah: 32: 9).*" Source of creation "*...hearing, sight and heart...(As Sajdah: 32: 9)*" is Deoxyribonucleic acid (DNA). Where human DNA consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6, 78% oxygen atoms and 35.59% hydrogen atoms.

So, "*...my spirit...(Shaad: 38: 72)*" or "*...Allah's spirit...(Shaad: 38: 72)*" or "*...His spirit...(As Sajdah: 32:*"

9) which "...incarnated... a perfect human. (Maryam : 19: 17) built with carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms. Where carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms were built with quark, quark was built with the energy of Allah.

Now, since the human body is built with **7000000000 000000000 000000000** atoms including carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms, then "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) united with the human body.

Or in other words, "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) is human.

Well, it turns out that "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) which forms a neural network of **65000000000** nerve cells, where 1 nerve cell = **0.000000000027** grams. So **65000000000** nerve cells in the human brain weighs **65 x 0.027** grams = **1.755** grams.

Well, each 1 cell consists of **93333333** atoms.

So, **65000000000** nerve cells in the human brain consist of **65000000000 x 93333333** atoms = **6066666645000000000** atoms.

While the atom "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) which is outside the brain is **7000000000 000000000 000000000 - 6066666645000000000** = **6999999993933333355** atoms. The weight is $(6999999993933333355 : 93333333) \times 0.000000000027 = 2.025$ grams.

Now, when a human dies, as many as **6066666645000000000** atoms that build "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) come out of the human body after **30** days of burial, entering paradise or entering hell.

While **6999999993933333355** atoms that also build "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) that are outside the brain that come out of the human body that dies after **30** days of burial incarnation as humans, animals, plants, fungi, amoeba, bacteria, viruses.

Well, **6999999993933333355** atoms that also build "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) that is outside the brain that comes out of the dead human body becomes a source of life for humans, animals, plants, fungi, amoeba, bacteria, viruses.

Now this is still not understood by all Muslims in the world.

CONCLUSION

Based on the explanation above we can conclude that the secrets contained behind the verses: "...I breathed into Adam My spirit...(Shaad : 38: 72) "...Our spirit incarnated...a perfect human being . (Maryam : 19: 17).

Well, in Allah's declaration about "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) which "...breathed into Adam...(Shaad: 38: 72) has revealed Allah's great secret about "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) which "...incarnated...a perfect human. (Maryam : 19: 17).

Now the question arises,

How exactly is "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) "...incarnated...a perfect human. (Maryam : 19: 17)?

The answer is in the secret behind the verse: "...He...breathed into Adama His spirit and He made for you hearing, sight and heart...(As Sajdah: 32: 9).

So apparently, "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) is the source of creation "...hearing, sight and heart...(As Sajdah: 32: 9). Source of creation "...hearing, sight and heart...(As Sajdah: 32: 9) is Deoxyribonucleic acid (DNA). Where human DNA consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6, 78% oxygen atoms and 35.59% hydrogen atoms.

So, "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) which "...incarnated... a perfect human. (Maryam : 19: 17) built with carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms. Where carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms were built with quark, quark was built with the energy of Allah.

Now, since the human body is built with 7000000000 000000000 000000000 atoms including carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms, then "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) united with the human body.

Or in other words, "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) is human.

Well, it turns out that "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) which forms a neural network of 65000000000 nerve cells, where 1 nerve cell = 0.000000000027 grams. So 65000000000 nerve cells in the human brain weighs 65 x 0.027 grams = 1.755 grams.

Well, each 1 cell consists of 93333333 atoms.

So, 65000000000 nerve cells in the human brain consist of 65000000000 x 93333333 atoms = 6066666645000000000 atoms.

While the atom "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) which is outside the brain is 7000000000 000000000 000000000 - 6066666645000000000 = 6999999993933333355 atoms. The weight is (6999999993933333355 : 93333333) x 0.000000000027 = 2.025 grams.

Now, when a human dies, as many as 6066666645000000000 atoms that build "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) come out of the human body after 30 days of burial, entering paradise or entering hell.

While 6999999993933333355 atoms that also build "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) that are outside the brain that come out of the human body that dies after 30 days of burial incarnation as humans, animals, plants, fungi, amoeba, bacteria, viruses.

Well, 6999999993933333355 atoms that also build "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) or "...His spirit...(As Sajdah: 32: 9) that is outside the brain that comes out of the dead

human body becomes a source of life for humans, animals, plants, fungi, amoeba, bacteria, viruses.

Now this is still not understood by all Muslims in the world.
