ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding what it actually means, Allah resides above the 'Arsy, based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

In the Qur'an, several verses are found which are the key to unlocking Allah's secret regarding what it actually means, Allah is residing above the 'Arsy, namely the following verses:

"Verily your Lord is Allah Who created the skys and the earth in six days, then He resided above the 'Arsy. He closed the night to the day which followed quickly, and the sun, moon and stars submit to His command. Remember, creating and ruling is only Allah's right. Glory be to Allah, Lord of the worlds. (Al A'raaf: 7: 54)

"It is Allah Who raised the sky without a pillar that you can see, then He resided above the 'Arsy, and subdued the sun and the moon. Each circulates until a certain time. Allah arranges affairs, explains the signs, so that you believe in meeting with your Lord.(Ar Ra'd: 13:2)

"Allah, there is no god to be worshiped except Him, the Lord of the Great Throne." (An Naml: 27:26)

"Allah is the light of the skys and the earth...Light upon light...(An Nuur: 24: 35)

"And you will see angels circling around the 'Arsy glorifying and praising their Lord; and being judged among the servants of Allah with justice and saying: "Praise be to Allah, Lord of the worlds." (Az Zumar: 39:75))

"Who has created the seven skys in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look over and over again, do you see anything that is not balanced? (Al Mulk: 67: 3)

"And if We made the apostle an angel, We would certainly have made him a man and, of course We would have doubted about them what they doubted about themselves (Al An'aam: 6:9)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"And the angels are in the corners of the sky. And on that day eight angels will uphold the Throne of your Lord above them. (Al Haaqqah: 69:17)

In an effort to open the veil, the angels guard the 'Throne because 'Throne is a place full of oxygen atoms, atoms, hydrogen, nitrogen atoms and carbon atoms, I based on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESES

Here I propose the hypothesis that God resides above the 'throne because 'the Throne contains

hydrogen atoms, nitrogen atoms, carbon atoms, oxygen atoms, from the point of view of photons, quarks and Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

TO CREATE THE SEVEN SKYS WITH LAYER OF HYDROGEN, NITROGEN, CARBON AND OXYGEN ATOMS

Now, we are still trying to focus our minds to reveal the secret contained in the verse: *"Who created the seven skys in layers... (Al Mulk: 67: 3)*

Apparently, Allah *"...has created the seven skys in layers...(Al Mulk: 67:3)* which requires hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Where do the hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms come from?

The answer is

Hidden in the secret behind the verse: *"...He resides on the 'Arsy...(Al A'raaf: 7: 54)*

It turns out that the 'Arsy is a place full of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms which are indispensable for the creation of *"...the seven skys in layers...(Al Mulk: 67: 3)*. The stars, sun, earth, moon and other planets need hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

ANGELS SURROUNDING TO CONTROL WHETHER HYDROGEN ATOM, NITROGEN ATOM, CARBON ATOM AND OXYGEN ATOM DO NOT LEAVE OUT OF CONTROL

Now, because hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms are indispensable in the creation of "*...the seven skys in layers...(Al Mulk: 67:3)* , the angels go around to control whether the atoms it doesn't come off and it doesn't spread everywhere.

Hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms are indispensable for humans, animals, plants, and other creatures of Allah on this earth. So that the 'Arsy must be really guarded "*...the angels circle around the 'Arsy...(Az Zumar: 39: 75)*

The angels who "*... are in the corners of the sky... (Al Haaqqah: 69: 17)* continue to control if carbon atoms, nitrogen atoms and oxygen atoms come out of the ' Throne,

In high places it is continuously controlled by the angels in case carbon atoms, nitrogen atoms and oxygen atoms come out of the 'Arsy "*...(angel)-angels uphold the 'Arsy...(Al Haaqqah: 69:17)*

THE STARS, SUN, EARTH, MOON AND OTHER PLANETS NEED HYDROGEN ATOMS, OXYGEN ATOMIES, NITROGEN ATOMS AND CARBON ATOMS

Well, without hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms is impossible stars, sun, earth, moon and other planets could be created.

Now revealed, the secret hidden behind the verse: "*...He resides above the 'Arsy...(Al A'raaf: 7: 54)*

Where the 'Arsy is a place full of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms which are indispensable for the creation of "*...the seven skys in layers...(Al Mulk: 67: 3)*. The stars, sun, earth, moon and other planets need hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

CONCLUSION

Based on the description above, we can conclude that the secret contained in the verse: "*Who created the seven skys in layers... (Al Mulk: 67: 3)*
