ABSTRACT

Firstly, by asking forgiveness from Allah SWT, here I try to reveal the signs of Allah SWT's greatness regarding angels lifting the 'throne, receiving Allah's light, lifting my spirit, based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

In the Qur'an, several verses are found that are the key to unlocking Allah's secret regarding angels lifting the 'throne, receiving Allah's light, lifting my spirit, namely the following verses:

"It is Allah Who raised the sky without a pillar that you can see, then He resides above the 'Throne, and subdues the sun and the moon. Each circulates until a certain time. Allah arranges affairs, explains the signs, so that you believe in meeting with your Lord.(Ar Ra'd: 13:2)

"Allah is the light of the skys and the earth...Light upon light...(An Nuur: 24: 35)

"And you will see angels circling around the 'Throne glorifying and praising their Lord; and judged among the servants of Allah with justice and saying: "Praise be to Allah, Lord of the worlds." (Az Zumar: 39:75))

"And if We made the apostle an angel, We would certainly have made him a man and, of course, We would have doubted about them what they doubted about themselves." (Al An'aam: 6:9)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"And the angels are in the corners of the sky. And on that day eight angels will uphold the 'Throne of your Lord above them. (Al Haaqqah: 69:17)

In an effort to open the veil of angels lifting the 'throne, receiving Allah's light, lifting my spirit, I based on photons, quarks and deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that the angel raised the 'throne, received the light of Allah, raised my spirit, is the 'throne is a layer of light from my spirit, seen from the angle of photons, quarks and Deoxyribonucleic acid (DNA)?

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1

phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

THE SKY IS A STRETCH OF SPACE WHERE THE SUN, EARTH, MOON, STARS AND THE ARSY ARE

Now, we are still concentrating on uncovering the secret behind the verse: *"It is Allah Who raised the sky without the pillars that you see, then He resides above the 'Throne,... (Ar Ra'd: 13: 2)*

Apparently, the sky is a space, above this space spreads *"... the sun and the moon... (Ar Ra'd: 13: 2)*

Above this space or sky there is also *"... 'Throne,...(Ar Ra'd: 13:2)* where Allah *"...resides above 'Throne,...(Ar Ra'd: 13: 2)*

That is, from this 'arsh *"Allah the light of the skys and the earth ... (An Nuur: 24: 35)* illuminates the skys and the earth.

So, through this 'arsh out *"... the light of the skys and the earth... (An Nuur: 24: 35)*

WHERE COMES THE LIGHT OF THE SKY AND EARTH

Now, let's unveil the secret that is hidden behind the verse: *"...the angels circled around the 'Throne praising their Lord... (Az Zumar: 39: 75)*

Well, the *"...angel...(Al An'aam : 6: 9)* which is also *"...a man...(Al An'aam : 6: 9)* *"...circling around the 'Throne glorifying while praising his Lord....(Az Zumar: 39: 75)*

Apparently, these angels are illuminated by layers of Allah's light *"... the light of the skys and the earth... (An Nuur: 24: 35)*

Now, the question arises, where did this *"...light of the skys and the earth...(An Nuur: 24:35)* come from?

The answer is

Hidden in the secret behind the verse: *"... I... have blown into it my spirit... (Al Hijr: 15: 29)*

So, actually, *"Allah is the light of the skys and the earth... (An Nuur: 24: 35)* comes from *"... my spirit... (Al Hijr: 15: 29)*

How can it be *"Allah, the light of the skys and the earth...(An Nuur: 24: 35)* comes from *"... my spirit...*

(Al Hijr: 15: 29)?

The answer is

Because in *"... my spirit... (Al Hijr: 15: 29)* stored Deoxyribonucleic acid (DNA) , which based on DNA, humans are composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78 % oxygen atoms and 35.59 % hydrogen atoms.

So, because in *"... my spirit... (Al Hijr: 15: 29)* which contains carbon atoms, hydrogen atoms, oxygen atoms and nitrogen atoms, when the hydrogen atoms present in the stars and the sun collide with each other , then gamma rays appear.

These gamma rays are carried by photons, to all corners of the heavens and earth, and reach us here on earth.

It also reaches the 'arsh, the place where the angels *"...circle around the 'throne glorifying and praising their Lord....(Az Zumar: 39: 75)*

Likewise to the place *"...eight angels uphold the 'Throne of your Lord above them (Al Haaqqah: 69:17)*

So, the secret contained behind the verse has been revealed: *"...the angels circled around the 'Throne glorifying and praising their Lord... (Az Zumar: 39: 75)*

Namely, the *"...angel...(Al An'aam : 6: 9)* which is also *"... a man...(Al An'aam : 6: 9)*
"...to uphold the Throne of your Lord above them. (Al Haaqqah: 69:17) which is illuminated by layers of Allah's light *"... the light of the skys and the earth... (An Nuur: 24: 35)* which comes from *"... my spirit... (Al Hijr: 15 :29)*

"... my spirit... (Al Hijr: 15: 29) contains carbon atoms, hydrogen atoms, oxygen atoms and nitrogen atoms, when the hydrogen atoms in the stars and the sun collide with each other, light rays arise. gamma.

These gamma light rays are carried by photons, to all corners of the skys and earth, and reach us here on earth.

So, all that is in the skys and the earth, and in this universe, comes from *"... my spirit... (Al Hijr: 15: 29)* which comes from Allah.

CONCLUSION

Based on the description above, we can conclude that the verse: *"It is Allah Who raised the sky without the pillars that you see, then He resides above the 'Throne,... (Ar Ra'd: 13: 2)*
