ABSTRACT

Before the author writes about Arsy is not Allah's place, but a symbol that refers to the place of Allah's spirit which contains hydrogen atom, carbon atom, nitrogen atom, oxygen atom, the source of life in the universe, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of Arsy is not Allah's place, but a symbol that refers to the place of Allah's spirit which contains hydrogen atom, carbon atom, nitrogen atom, oxygen atom, the source of life in the universe, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about Arsy is not Allah's place, but a symbol that refers to the place of Allah's spirit which contains hydrogen atom, carbon atom, nitrogen atom, oxygen atom, the source of life in the universe, namely the following verses:

"Indeed, your God is Allah Who created the sky and the earth in six days, then Allah sat on Arsy. He closed the night to the day that followed quickly, and the sun, moon and stars submitted to His command. Remember, creating and rule only by Allah. Glory be to Allah, God of the worlds (Al A'raaf: 7: 54).

"And you will see the angels circled around Arsy exalting while praising their God and being given a verdict between the servants of Allah fairly and saying: "Praise be to Allah, God of the worlds." (Az Zumar: 39: 75).

"So when I have perfected the existence of Adam and have breathed into Adam my spirit, then you will submit to him by prostrating (Al Hijr: 15: 29).

"And the angels were in all corners of the sky. And on that day eight angels held up Arsy of your God above them. (Al Haaqqah: 69: 17).

In an effort to open the veil, Arsy is a storage place for hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms as a source of life in the universe, the author bases it on deoxyribonucleic acid.

HYPOTHESES

Here the author proposes hypothesis Arsy is a storage place for hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms as a source of life in the universe, based on Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a storage place for genetic information which has a double structure that forms a double helix and which contains polynucleotide macromolecules which are composed repeatedly of nucleotide polymers. This nucleotide consists of folate, a 5 carbon sugar and one of the nitrogen

bases. The nitrogen bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T). Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARKS

If we want to know quarks then we pay attention to one of the hydrogen atoms which is a building element of the human body, animals, plants and fruit as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are found in abundance around us and in the atmosphere.

ARSY IS A STORAGE PLACE FOR HYDROGEN ATOMS, CARBON ATOMS, NITROGEN ATOMS, OXYGEN ATOMS AS A SOURCE OF LIFE IN THE UNIVERSE

So now, we are still trying to concentrate our minds in order to uncover the secrets contained in the verses: "*...Allah Who created the sky and the earth in six days, then Allah sat on Arsy...(Al A'raaf: 7 : 54)*" "*...the angels circled around Arsy...(Az Zumar: 39: 75)*" "*...eight angels held up Arsy...(Al Haaqqah: 69: 17)*).

Well, apparently, Allah declared "*...Allah Who created the sky and the earth in six days, then Allah sat on Arsy...(Al A'raaf: 7 : 54)*).

Well, "*...the sky and the earth...(Al A'raaf: 7: 54)* were created with "*...my spirit...(Al Hijr: 15: 29)* or "*...Allah's spirit... (Al Hijr : 15: 29)*, which is built with hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

So, in fact, "*...the sky and the earth...(Al A'raaf: 7: 54)* were created with hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms as well as other atoms.

Now, the question arises,

Why "*...Allah sat on Arsy...(Al A'raaf: 7 : 54)*, what does this have to do with "*...the sky and the earth...(Al A'raaf: 7: 54)* which were created with "*...my spirit...(Al Hijr: 15: 29)* or "*...Allah's spirit... (Al Hijr : 15: 29)*?

The answer is in the secret behind the verse: "*...the angels circled around Arsy...(Az Zumar: 39: 5)*" "*...eight angels held up Arsy...(Al Haaqqah: 69: 17)*).

Well, apparently, "*...angel...(Az Zumar: 39: 75)* were built with "*...my spirit...(Al Hijr: 15: 29)* or "*...Allah's spirit... (Al Hijr : 15: 29)*, which is in the form of hydrogen atoms, carbon atoms, nitrogen

atoms and oxygen atoms, *"...circled around Arsy...(Az Zumar: 39: 75)* and *"... held up Arsy...(Al Haaqqah: 69: 17).*

Another question arises,

Why did *"...the angels circled around Arsy...(Az Zumar: 39: 75)* and *"...held up Arsy...(Al Haaqqah: 69: 17).?*

Because, what is in the form of *"...angel...(Az Zumar: 39: 75)* and what is in *"...Arsy...(Az Zumar: 39: 75)* is *"...my spirit...(Al Hijr: 15: 29)* or *"...Allah's spirit... .(Al Hijr : 15: 29)*, which is in the form of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

So, actually, Arsy is a storage place for hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms for the needs of life in *"...the sky and the earth...(Al A'raaf: 7: 54).* Everything on earth requires hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Because, hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms are very necessary for life on earth and also for life in sky, because sky is on earth, then Arsy, which is a storage place for hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms must be guarded by *"...angels...(Az Zumar: 39: 75).*

This is the secret of Allah, which almost all Muslims in the world do not understand.

Muslims in the world consider Arsy to be the nature of Allah, because Muslims in the world do not understand the real Allah.

CONCLUSION

Based on the description above we can conclude that the secrets contained in the verses: *"...Allah Who created the sky and the earth in six days, then Allah sat on Arsy...(Al A'raaf: 7 : 54)* *"...the angels circled around Arsy...(Az Zumar: 39: 75)"* *"...eight angels held up Arsy...(Al Haaqqah: 69: 17).*

Well, apparently, Allah declared *"...Allah Who created the sky and the earth in six days, then Allah sat on Arsy...(Al A'raaf: 7 : 54).*

Well, *"...the sky and the earth...(Al A'raaf: 7: 54)* were created with *"...my spirit...(Al Hijr: 15: 29)* or *"...Allah's spirit... .(Al Hijr : 15: 29)*, which is built with hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

So, in fact, *"...the sky and the earth...(Al A'raaf: 7: 54)* were created with hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms as well as other atoms.

Now, the question arises,

Why *"...Allah sat on Arsy...(Al A'raaf: 7 : 54)*, what does this have to do with *"...the sky and the earth...(Al A'raaf: 7: 54)* which were created with *"...my spirit...(Al Hijr: 15: 29)* or *"...Allah's spirit... .(Al Hijr : 15: 29)?*

The answer is in the secret behind the verse: *"...the angels circled around Arsy...(Az Zumar: 39: 5)"* *"...eight angels held up Arsy...(Al Haaqqah: 69: 17).*

Well, apparently, *"...angel...(Az Zumar: 39: 75)* were built with *"...my spirit...(Al Hijr: 15: 29)* or *"...Allah's spirit... .(Al Hijr : 15: 29)*, which is in the form of hydrogen atoms, carbon atoms, nitrogen

atoms and oxygen atoms, "...circled around Arsy...(Az Zumar: 39: 75) and "... held up Arsy...(Al Haaqqah: 69: 17).

Another question arises,

Why did "...the angels circled around Arsy...(Az Zumar: 39: 75) and "...held up Arsy...(Al Haaqqah: 69: 17).?

Because, what is in the form of "...angel...(Az Zumar: 39: 75) and what is in "...Arsy...(Az Zumar: 39: 75) is "...my spirit...(Al Hija: 15: 29) or "...Allah's spirit... (Al Hija : 15: 29), which is in the form of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

So, actually, Arsy is a storage place for hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms for the needs of life in "...the sky and the earth...(Al A'raaf: 7: 54). Everything on earth requires hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Because, hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms are very necessary for life on earth and also for life in sky, because sky is on earth, then Arsy, which is a storage place for hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms must be guarded by "...angels... (Az Zumar: 39: 75).

This is the secret of Allah, which almost all Muslims in the world do not understand.

Muslims in the world consider Arsy to be the nature of Allah, because Muslims in the world do not understand the real Allah.
