ABSTRACT

Before the author writes about because paradise is in our bodies, then we can meet directly with the Prophet Muhammad saw's spirit in our bodies, first the author asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of because paradise is in our bodies, then we can meet directly with the Prophet Muhammad saw's spirit in our bodies, based on Deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about because paradise is in our bodies, then we can meet directly with the Prophet Muhammad saw's spirit in our bodies, namely the following verses:

"So when I have perfected the existence of Adam and have breathed into Adam My spirit, then you will bow to Adam by prostrating (Al Hijr: 15: 29).

"Then He perfected and breathed into Adam His spirit and He made for you hearing, sight and hearts, you are very little grateful. (As Sajdah: 32: 9).

"So Mary lifted a veil from them, then We sent Our spirit to Mary, so Our spirit incarnated before Mary a perfect human (Maryam: 19: 17).

"Do not think that those who fall in the way of Allah are dead, they live by their God's side by getting sustenance. (Ali 'Imran : 3: 169).

In an effort to uncover Allah's secret about because paradise is in our bodies, then we can meet directly with the Prophet Muhammad saw's spirit in our bodies, the author uses deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes hypothesis because paradise is in our bodies, then we can meet directly with the Prophet Muhammad saw's spirit in our bodies, based on Deoxyribonucleic acid (DNA).

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on Deoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere.

BECAUSE PARADISE IS IN OUR BODIES, THEN WE CAN MEET DIRECTLY WITH THE PROPHET MUHAMMAD SAW'S SPIRIT IN OUR BODIES

Now, we continue to focus our minds to uncover the secrets contained behind the verses: "*... I... have breathed into Adam My spirit... (Al Hijr: 15: 29).*"

Now, from Allah's declaration "*...I...have breathed into Adam My spirit... (Al Hijr: 15: 29)* revealed the great secret of Allah, namely "*...My spirit...(Al Hijr: 15: 29)* or "*...Allah's spirit...(Al Hijr: 15: 29)* which is in the human body does not die.

This means that humans do not die, humans remain alive "*...they...do not die...they live...(Ali 'Imran: 3: 169).*"

Now the question arises,

Why do humans not die?

The answer lies in the secret behind the verse "*...Our spirit incarnated...a perfect human (Maryam: 19: 17).*"

Well, why "*...Our spirit incarnated...a perfect human (Maryam: 19: 17)?*"

Because the human body is built with **7 000000000 000000000 000000000** atoms, including hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms and other atoms that form blood, flesh, bones and other body cavities.

Likewise "*...Our spirit...(Maryam: 19: 17)* or "*...Allah's spirit...(Maryam: 19: 17)* is built with hydrogen atoms, carbon atoms, nitrogen, oxygen atoms.

So, between humans and "*...Our spirit...(Maryam: 19: 17)* or "*...Allah's spirit...(Maryam: 19: 17)* is the same as being built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms.

So, "*...Our spirit incarnated...a perfect human (Maryam: 19: 17)* refers to hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms that build the human body.

Or it can be said, "...*Our spirit...*(*Maryam: 19: 17*) or "...*Allah's spirit...*(*Maryam: 19: 17*) becomes the building of Deoxyribonucleic acid (DNA), based on human Deoxyribonucleic acid (DNA) is composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. DNA is in blood, flesh, bones, sperm, eggs, saliva, sweat, hair and throughout the human body.

"...*Our spirit...*(*Maryam: 19: 17*) or "...*Allah's spirit...*(*Maryam: 19: 17*) which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms will live up to the age of **10 0000000000 0000000000 0000000000 0000000000 0000000000 0000000000 0000000000 0000000000 0000000000** years.

Well, the DNA in the human body is passed down from father to son, like YDNA which is passed down from father to son and daughter, but only son passes down YDNA which continues until now and beyond.

Likewise, mitochondrial DNA is passed down from mother to daughter and son, but only daughter passes down mitochondrial DNA which continues until now and beyond.

So actually in our body there is "...*Our spirit...*(*Maryam: 19: 17*) or "...*Allah's spirit...*(*Maryam: 19: 17*) in the form of YDNA and mitochondrial DNA which comes from our ancestors.

Well, because our ancestors have died and Allah has put them into paradise, and "...*Our spirit...*(*Maryam: 19: 17*) or "...*Allah's spirit...*(*Maryam: 19: 17*) in the form of YDNA and mitochondrial DNA which comes from our ancestors is in our body, then our ancestors who have died are in our body.

Or in other words, the paradise where our ancestors live is in our bodies.

Or it can also be said, the paradise where our ancestors live is in our bodies on this earth.

Now another question arises,

How about the Prophet Muhammad saw's spirit in our bodies, because the Prophet Muhammad saw's spirit is already in paradise?

The answer is in the secret behind the verse "...*I...have breathed into Adam My spirit...* (*Al Hijr: 15: 29*).

Now, because "... *My spirit...*(*Al Hijr: 15: 29*) or "... *Allah's spirit...*(*Al Hijr: 15: 29*) is in the human body and paradise is in the human body, and the Prophet Muhammad saw's spirit is in paradise, and is in the human body, then human can meet the Prophet Muhammad saw's spirit anytime, anywhere.

Now, this great secret of Allah is still not understood by almost all Muslims in the world.

CONCLUSION

From what is explained above, it can be concluded that the secrets contained behind the verses: "... *I... have breathed into Adam My spirit...* (*Al Hijr: 15: 29*).
