ABSTRACT

Before I write down the problem because hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms are very lacking in these seven heavens, then some of the atoms from the human body that die are reused, first I ask forgiveness from Allah SWT. Here I try to open the veil that covers the secret about because hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms are very lacking in these seven heavens, then some of the atoms from the human body that die are reused, from the point of view of the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about because hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms are very lacking in these seven heavens, then some of the atoms from the human body that die are reused, namely the following verses:

"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And if We made the apostle an angel, We would certainly have made him a man and, of course We would have doubted about them what they doubted about themselves (Al An'aam: 6:9)

"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Verily, He is Most High, Most Wise. (Ash Shuura: 42: 51)

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when they ask Me, then let them fulfill (all My commands) and let them believe in - Me, that they may always be in the truth.(Al Baqarah: 2:186)

"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)

"And We made a wall before them and behind them a wall, and We covered them so that they could not see." (Yaasiin: 36:9)

"Allah holds the soul when it dies and the soul that has not died in its sleep; so He holds the soul which He has appointed death and He releases another soul until the appointed time. Verily in that are signs of Allah's power for a people who think (Az Zumar : 39: 42)

"Angels and spirits ascend to God in a day the measure of which is fifty thousand years (Al Ma'aarij: 70: 4)

"That is, for verily Allah, He is the Truth, and verily He is the One who gives life to all that dies, and verily Allah has power over all things." (Al Hajj: 22:6)

"On the day the earth will be replaced with another earth and sky, and they will all gather before the presence of Allah, the One, the All-Mighty (Ibrahim: 14:48)

"He arranges affairs from the skys to the earth, then they ascend to Him in one day whose measure is a thousand years according to your reckoning (As Sajdah: 32: 5)

"Who has created the seven skys in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look over and over again, do you see anything that is not balanced? (Al Mulk: 67: 3)

"Didn't We create you from despicable water (Al Mursalaat: 77:20)

"Then We made the essence of semen in a solid place. (Al Mu'minuun: 23:13)

"And verily We have created man from an essence from clay. (Al Mu'minuun: 23:12)

"And does man not notice that We created him from a drop of water, then suddenly he becomes a real challenger (Yaasiin: 36: 77)

"And it is Allah Who has brought you to life, then caused you to die, then brought you to life, verily the human being is very much denying the favor. (Al Hajj: 22: 66)

"Those who when disaster strikes, they say: "Inna lillahi wa innaa ilaihi raaji'uun" (Indeed we belong to Allah and to Him we shall return) (Al Baqarah: 2: 156)

"... so We bring out because of the rain various kinds of fruit. That is how We raise the dead..." (Al A'raaf: 7: 57)

"Did We not make the earth gathered together, (Al Mursalaat: 77: 25) "the living and the dead (Al Mursalaat: 77: 26)

"Read your book, it is enough for yourself at this time as a remembrance against you." (Al Israa': 17: 14)

"Those who when disaster strikes, they say: "Inna lillahi wa innaa ilaihi raaji'uun" (Indeed we belong to Allah and to Him we shall return) (Al Baqarah: 2: 156)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

In an effort to open the veil of Allah's secret about because hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms are very lacking in these seven skys, so some atoms from the human body that die are reused, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or molecular structure nucleic acid.

HYPOTHESIS

Here I put forward the hypothesis that hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms are very lacking in these seven skys, then some of the atoms from the human body that die are reused, from the point of view of Deoxyribonucleic acid (DNA).

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on deoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

IN OUR SKY THAT HUMAN EYES SEE VERY LACK OF OXYGEN ATOMS, CARBON ATOMS, NITROGEN ATOMS, WHILE ENOUGH HYDROGEN ATOMS

Now, we are still concentrating on uncovering the secrets contained behind the verse: *"...the dead (Al Mursalaat: 77: 26)*

It turns out that in the sky we currently lack oxygen atoms, carbon atoms, nitrogen atoms, so it is necessary to use these atoms efficiently.

What is happening on our earth today, anywhere, anytime, from anywhere, if possible oxygen atoms, carbon atoms and nitrogen atoms are used efficiently.

Now what happens to humans who die and are buried in the ground.

After the dead man is buried in the ground, 30 days later comes out *"... my spirit... (Shaad: 38: 72)*

Not all 70 000000000 000000000 000000000 atoms that come out of the dead body is the building *"...my spirit...(Shaad : 38: 72)* but most of the atoms are reused for the life of living humans, animals , vegetation, energy.

FOR HUMAN GROWTH FROM THE WOMB TO THE BIRTH OF THE WORLD AND DIE NEED HYDROGEN ATOM, CARBON ATOM, NITROGEN ATOM, OXYGEN ATOM

Now we uncover the secret behind the verse: *"... He perfected and breathed into it His spirit and He made for you hearing, sight and heart... (As Sajdah: 32: 9)*

It turns out that for the needs of human growth from the time they are still in the womb until they are born into the world and die, it takes 70 000000000 000000000 000000000 atoms, where do these atoms come from?

Of course, some of the oxygen atoms, carbon atoms, nitrogen atoms, hydrogen atoms are taken from food, but also the atoms that come out of dead human bodies buried in the ground are used by living humans, animals, plants, even babies who are still breastfeeding need oxygen atoms.

So, actually, whatever is in the seven skys and nothing is lost in its contents, everything is stored in these seven skys and returns to the energy of Allah.

THE BUILDING OF MY SPIRIT WHICH IS BUILT FROM HYDROGEN ATOMS, CARBON ATOMS, NITROGEN ATOMS AND OXYGEN ATOMS, JUST A SMALL PART.

Well, most of the atoms that come out of the human body when it is dead and buried in the ground are used for the life of other living things, plants, energy, fungi, amoeba, bacteria, all of which require hydrogen atoms, nitrogen atoms, oxygen atoms and atoms. carbon.

So, actually humans and other living things and animals live on the loan of hydrogen atoms, nitrogen atoms, oxygen atoms and carbon atoms. When it dies, all the atoms in the body are returned to be used by other living beings.

PARADISE AND HELL NEED OXYGEN ATOM, HYDROGEN ATOM, CARBON ATOM AND NITROGEN ATOM

Hell needs hydrogen atoms fuel, paradise needs oxygen atoms, carbon atoms, nitrogen atoms and hydrogen atoms.

Of course, the oxygen atoms, carbon atoms, nitrogen atoms and hydrogen atoms that come out of the dead human body, are partly taken up by hell like hydrogen atoms for hell's fuel. Also paradise needs oxygen atoms, carbon atoms, nitrogen atoms and hydrogen atoms from the bodies of people who are dead and buried in the ground.

So, actually, living in these seven skys is all just borrowed material from others. Nothing made by myself. The atoms in the seven skys are borrowed atoms that must be returned.

Now the secret hidden behind the verse has been revealed: *"Inna lillahi wa innaa ilaihi raaji'uun" (Indeed we belong to Allah and to Him we shall return) (Al Baqarah: 2: 156)*

All material in the seven skys is borrowed material, *(Indeed we belong to Allah and to Him we return) (Al Baqarah: 2: 156)*

CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verse: *"...the dead (Al Mursalaat: 77: 26)*

It turns out that in the sky we currently lack oxygen atoms, carbon atoms, nitrogen atoms, so it is necessary to use these atoms efficiently.
