## ABSTRACT

Before I write down the problem, do angels really have wings to fly, I first ask forgiveness from Allah SWT. Here I try to open the veil that covers the secret about whether angels really have wings to fly from the point of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about whether angels really have wings to fly, namely the following verses:

*"Angels and spirits ascend to Allah in a day whose measure is fifty thousand years (Al Ma'aarij: 70: 4)*

*"Allah is the light of the sky and the earth....Light upon light...(An Nuur: 24:35)*

*"And if We made the apostle an angel, We would certainly have made him a man and, of course, We would have doubted about them what they doubted about themselves." (Al An'aam: 6:9)*

*"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Verily, He is Most High, Most Wise. (Ash Shuura: 42: 51)*

*"Praise be to Allah, the Creator of the heavens and the earth, Who made the angels as messengers with wings, two, three and four, respectively. Allah adds to His creation what He wills. Verily, Allah has power over all things (Faathir: 35: 1)*

*"who has intelligent mind; and appear in the original form (An Najm: 53: 6)*

*"And indeed Muhammad saw Jibril at another time, (An Najm: 53: 13) in Sidratil Muntaha (An Najm: 53:14) Nearby there was a paradise where he lived (An Najm: 53:15) when Sidratil Muntaha was overwhelmed by something that covers it. (An Najm: 53:16) His sight did not turn away from what he saw and did not go beyond it. (An Najm: 53:17)*

*"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)*

*"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)*

In an effort to open the veil of Allah's secret about whether angels really have wings to fly, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## HYPOTHESIS

Here I propose the angel hypothesis is a man who uses the frequency vibrations of the light layer to relate either to God or to humans and other creatures from the basic point of Deoxyribonucleic acid (DNA).

## DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

## QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

## ANGELS AND JIBRIL A MAN, IN THEIR BODY IS THE SPIRIT OF ALLAH

Now, we are still focusing our minds on uncovering the secrets stored in the verse: *"Angels and spirits ascend to Allah in a day whose levels are fifty thousand years (Al Ma'aarij: 70: 4)*

Well, it turns out that the secret stored in the verse (*Al Ma'aarij: 70: 4*) is *"Angels and spirits ascend to Allah ... (Al Ma'aarij: 70: 4)*

That is, the angels and the spirit, namely *"... the spirit...(Al Ma'aarij: 70: 4)* is Jibril, which is when the angel was created by Allah, *"...I breathed into him my spirit...( Shaad : 38:72)*

So what is in the body of the angels is *"...my spirit...(Shaad: 38:72)* just like that which is in the body of Adam, humans and jinn.

Well, because in the body of an angel there is *"...my spirit...(Shaad: 38:72)* just as in the body of Adam, humans and jinn.

So, actually angels are no different from humans because they have *"... My spirit... (Shaad: 38: 72)* and a man *"... We made the apostle an angel... a man... (Al An'am: 6: 9)*

## WHAT DOES IT MEAN ANGELS HAVE WINGS

Now, we continue to unravel the secret of the verse: *"...Those who make angels as messengers who have wings, two, three and four respectively... (Faathir: 35: 1)* and the verse *"Angels and spirits ascend to Allah in a day the amount of which is fifty thousand years (Al Ma'aarij: 70: 4)*

Now, it turns out that now what is meant by *"...angels as messengers who have wings, two, three and*

*four each... (Faathir: 35: 1) is the light of Allah "Allah is the light of the heavens and the earth ....Light upon light...(An Nuur: 24:35)*

So, the wings are "...*Light upon light...(An Nuur: 24:35)*

Therefore, Allah has declared: "*Angels and spirits ascend to Allah in a day whose measure is fifty thousand years (Al Ma'aarij: 70: 4)*

It means, "*Angels and spirits ascend to Allah in a day whose levels are fifty thousand years (Al Ma'aarij: 70: 4)* is to use "...*Light on light...(An Nuur: 24: 35)* , namely "*Allah is the light of the heavens and the earth ... (An Nuur: 24: 35)* in the form of photons, namely elementary particles of the boson type and carriers of electromagnetic interactions.

So, when "*Angels and spirits ascend to Allah in a day whose content is fifty thousand years (Al Ma'aarij: 70:4)*, it is to use "*God the light of the heavens and the earth...(An Nuur: 24:35)* in the form of photon

It means "*Angels and spirits ... (Al Ma'aarij: 70: 4)* which in their bodies is "... *My spirit ... (Shaad: 38: 72)* which contains oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms, like the atoms in the human body, so when "*Angels and spirits ascend to Allah...(Al Ma'aarij: 70: 4)* is to use "*Allah the light of the heavens and the earth.. .(An Nuur: 24: 35)* in the form of photons.

Because "*Angels and spirits ... (Al Ma'aarij: 70: 4)* are men who can not fly.

So actually the wings are "*Allah, the light of the heavens and the earth ... (An Nuur: 24: 35)* in the form of photons.

Now it is clear that "*Angels and spirits ascend to God ... (Al Ma'aarij: 70: 4)* do not use wings, but send frequency vibrations through "*Allah the light of the heavens and the earth ... (An Nuur: 24 : 35)* in the form of a photon, with a speed "*Allah is the light of the heavens and the earth ... (An Nuur: 24: 35)* according to human calculations one second the speed of light is 299 792 km.

Where one light year is 9 460 730 472 580 800 meters.

While the distance between the earth and the place where Allah is located is 50 000 light years.

This means that the place where Allah is located is 50 000 light years is a picture of "*Allah is the light of the sky and the earth ... (An Nuur: 24: 35)* which illuminates the sky and the earth including lighting into our bodies "... *We are closer to him than the veins his neck, (Qaf: 50:16)*

## CONCLUSION

Based on the description above, we can conclude that the secrets stored in the verse: "*Angels and spirits ascend to Allah in a day whose levels are fifty thousand years (Al Ma'aarij: 70: 4)*

Well, it turns out that the secret stored in the verse (*Al Ma'aarij: 70: 4)* is "*Angels and spirits ascend to Allah ... (Al Ma'aarij: 70: 4)*
