ABSTRACT

Before the author writes about empirical evidence of the Prophet Muhammad saw is not a myth through Abdullah's YDNA, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of empirical evidence of the Prophet Muhammad saw is not a myth through Abdullah's YDNA, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secrets regarding empirical evidence of the Prophet Muhammad saw is not a myth through Abdullah's YDNA, namely the following verses:

"So when I have perfected the existence of Adam and have breathed into Adam My spirit, then you must bow down to him (Shaad: 38: 72)

"Then He perfected and breathed into Adam His spirit and He made for you hearing, sight and heart, you're a handful, be thankful. (As Sajdah : 32: 9)

"Say: I am not the first of the messengers and I do not know what will be done to me and not to you. I am nothing but following what was revealed to me and I am nothing but a warner who explains (Al Ahqaaf: 46 :9)

In an effort to uncover the secret of Allah regarding empirical evidence of the Prophet Muhammad saw is not a myth through Abdullah's YDNA, the author uses the basis of deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes hypothesis empirical evidence of the Prophet Muhammad saw is not a myth through Abdullah's YDNA, based on Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLIC ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules which are composed repeatedly of nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are found in abundance around us and in the atmosphere.

EMPIRICAL EVIDENCE OF THE PROPHET MUHAMMAD SAW IS NOT A MYTH THROUGH ABDULLAH'S YDNA

So now, we still focus our minds on uncovering the secret hidden behind the verses: *"...I breathed into Adam my spirit...(Shaad: 38: 72)*

Well, it turns out, here Allah has declared Allah's great secret about the Prophet Muhammad saw, not a myth with Allah's declaration *"...I breathed into Adam my spirit...(Shaad: 38: 72)*.

So now, the question arises,

Is the relationship between *"...my spirit...(Shaad: 38: 72)* and the Prophet Muhammad saw not a myth?

The answer is in the secret behind the verse: *"...He...breathed into Adam His spirit and He made for you hearing, sight and heart...(As Sajdah: 32: 9)*.

Well, now, the real secret about the relationship between *"...my spirit...(Shaad: 38: 72)* and the Prophet Muhammad saw is not a myth has been revealed.

How was it discovered?

Well, after Allah *"...He...breathed into Adam His spirit and He made for you hearing, sight and heart...(As Sajdah: 32: 9)*.

Meaning, first Allah *"... breathed into Adam His spirit... (As Sajdah: 32: 9)*.

Second, Allah, *"...made...hearing, sight and heart...(As Sajdah: 32: 9)*.

Well, apparently, Allah *"...made...hearing, sight and heart...(As Sajdah: 32: 9)* sourced from *"...His spirit...(As Sajdah: 32: 9)* or *"...Allah's spirit...(As Sajdah: 32: 9)* or *"...my spirit...(Shaad: 38: 72)*.

Well, *"...hearing, sight and heart...(As Sajdah : 32: 9)* are formed with deoxyribonucleic acid (DNA). Human DNA consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms, and 35.59% hydrogen atoms.

Or in other words, *"...His spirit...(As Sajdah: 32: 9)* or *"...Allah's spirit...(As Sajdah: 32: 9)* or *"...my spirit...(Shaad: 38: 72)* which is the source of *"...hearing, sight and heart...(As Sajdah: 32: 9)* are formed from carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms.

So actually, *"...His spirit...(As Sajdah: 32: 9)* or *"...Allah's spirit...(As Sajdah: 32: 9)* or *"...my spirit...(Shaad: 38: 72)* is in every human body, including the body of the Prophet Muhammad saw.

Or in other words, the human body, including the body of the Prophet Muhammad saw, is built with DNA, where human DNA consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms, and 35.59% hydrogen atoms. .

So, now, if human DNA or the DNA of the Prophet Muhammad saw is connected to the Prophet Muhammad saw is not a myth, referring to the YDNA in the body of the Prophet Muhammad saw would be empirical evidence that the Prophet Muhammad saw once lived on earth.

Orthodox, Catholics, Protestants, including the Pope in the Vatican, Bishops, Cardinals, Pastors

throughout the church, Europeans and Americans consider the Prophet Muhammad saw to be just a myth.

So, to empirically prove that the Prophet Muhammad saw was not a myth through the YDNA which was in the body of the Prophet Muhammad saw and the Prophet Muhammad saw once lived on earth.

So now, the empirical evidence regarding the existence of the Prophet Muhammad saw from YDNA is, if seen from YDNA, because the three sons of the Prophet Muhammad saw, Al-Qasim, Abdullah, and Ibrahim died before marriage, then from the three sons of the Prophet Muhammad saw no YDNA inherited, because YDNA is passed down through sons.

Now, because YDNA is passed down through sons, the YDNA of the Prophet Muhammad saw could not be passed on to the sons of the Prophet Muhammad saw, because the sons of the Prophet Muhammad saw, Al-Qasim, Abdullah, and Ibrahim died before getting married.

So, because the sons of the Prophet Muhammad saw, Al-Qasim, Abdullah, and Ibrahim died before they were married, to find out the YDNA of the Prophet Muhammad saw, you can look and examine it through the YDNA of the father of the Prophet Muhammad saw, Abdullah bin Abdul Muttalib.

So, through the YDNA of the Prophet Muhammad's father, Abdullah bin Abdul Muttalib, it will be confirmed that the Prophet Muhammad saw once lived on earth.

The problem now is, how to find YDNA Abdullah bin Abdul Muttalib?

So, now we have to find where Abdullah bin Abdul Muttalib's grave is, to have the bones of Abdullah bin Abdul Muttalib examined. It is estimated that Abdullah bin Abdul Muttalib died in 569 AD when the Prophet Muhammad saw was 2 months old in the womb of his mother, Siti Aminah.

Abdullah bin Abdul Muttalib died in Medina at the age of 25, at the residence of his uncle from Bani Najjar.

So, if Abdullah bin Abdul Muttalib's grave is found in Medina, around the Prophet's Mosque, then it can be researched and examined for YDNA which is still in Abdullah bin Abdul Muttalib's bones.

So, if Abdullah bin Abdul Muttalib's YDNA haplogroup has been found, then it can be confirmed that the Prophet Muhammad's YDNA haplogroup is the same as Abdullah bin Abdul Muttalib's YDNA haplogroup.

So now, the big problem is that Abdullah bin Abdul Muttalib's grave is not marked and there is no information stating that it is Abdullah bin Abdul Muttalib's grave. So all the graves in Saudi Arabia were razed to the ground, except for the grave of the Prophet Muhammad saw in the Prophet's Mosque in Medina.

Why are graves razed to the ground in Saudi Arabia?

Because according to Wahhabi or Salafi teachings, if the grave is not leveled to the ground, then people will come who will ask for the bones in the grave, and this act is an act of ascribing partners to Allah.

In fact, Allah cannot be associated with anything, and in the grave there is no *"...His spirit...(As Sajdah: 32: 9)* or *"...Allah's spirit...(As Sajdah: 32: 9)* or *"...my spirit...(Shaad: 38: 72)*, there are only bones which still contain mtDNA and YDNA.

Well, most people, including most Muslims in the world, don't understand.

Now, to empirically prove that the Prophet Muhammad saw is not a myth, we can look for the grave of the Prophet Muhammad's father, Abdullah bin Abdul Muttalib, near the Prophet's mosque in Medina. Then Abdullah bin Abdul Muttalib's bones were taken for YDNA research.

Also looking for the graves of one of the sons of the Prophet Muhammad saw, Al-Qasim, Abdullah and Ibrahim to examine their YDNA.

If YDNA can be proven empirically from the bones of Abdullah bin Abdul Muttalib and from the bones of Al-Qasim or the bones of Abdullah or the bones of Ibrahim and there are similarities, then the assumption is that Orthodox, Catholics, Protestants, including the Pope in the Vatican, Bishops, Cardinals, Pastors throughout the church, Europeans and Americans, that the Prophet Muhammad was just a myth, is a big mistake.

CONCLUSION

Based on the description above, we can conclude that the secret hidden behind the verses: *"...I breathed into Adam my spirit...(Shaad: 38: 72)*

Well, it turns out, here Allah has declared Allah's great secret about the Prophet Muhammad saw, not a myth with Allah's declaration *"...I breathed into Adam my spirit...(Shaad: 38: 72)*.
