ABSTRACT

Before the author writes about empirical evidence, the skys are seven and balanced, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of empirical evidence, the skys are seven and balanced, based on Deoxyribonucleic acid (DNA)

There are several verses that reveal Allah's secrets regarding empirical evidence, the skys are seven and balanced, namely the following verses:

"Who has created the seven skys in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look again and again, do you see anything that is not balanced? (Al Mulk: 67: 3)

"And to Allah belongs the east and the west, so wherever you turn there is the face of Allah. Indeed, Allah is All-Encompassing, All-Knowing. (Al Baqarah: 2: 115)

"Indeed, We have decorated the nearest sky with stars, and We have made these stars tools for throwing satan, and We have prepared for satan the torment of a fiery hell. (Al Mulk: 67: 5)

"And We did not create the sky and the earth and everything between them by playing around (Al Anbiyaa' : 21: 16)

"So He made seven skys in two days. He revealed in each sky its affairs. And We decorated the nearest sky with brilliant stars and We looked after them as well as possible. That is the decree of the Almighty, the All-Knowing. (Fushshilat :41:12)

"Allah created the sky and the earth with haq (right). Verily in these are the signs of Allah's power for the believers (Al 'Ankabuut: 29: 44)

"Those who, when a disaster strikes them, say Inna lillaahi wa innaa ilaihi raaji'uun (Indeed, we belong to Allah and to Allah we will return) (Al Baqarah: 2: 156)

"And everything they have done is recorded in notebooks (Al Qamar: 54: 52)

In an effort to reveal the secret of Allah regarding empirical evidence, the skys are seven and balanced, the author uses the basis of deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes hypothesis empirical evidence, the skys are seven and balanced, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARKS

If we want to know quarks then we pay attention to one of the hydrogen atoms which is a building element of the human body, animals, plants and fruit as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules which are composed repeatedly of nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere.

EMPIRICAL EVIDENCE, THE SKYS ARE SEVEN AND BALANCED

Now, we are still concentrating on dismantling the secrets contained behind the verses: *"...He made the seven skys in two days...(Fushshilat: 41: 12)"...we belong to Allah and to Allah we return (Al Baqarah: 2: 156).*

Well, here, Allah has declared *"...He made seven skys in two days...(Fushshilat: 41: 12)"...we belong to Allah and to Allah we return (Al Baqarah: 2: 156).*

So now, the question arises,

What is actually called a lanite?

The answer is, the sky is an expanse of space above which there are the sun, stars, earth, planets and moon.

This, is Allah's secret that was opened to all people in the world, *"... He made the seven skys...(Fushshilat: 41: 12)" ...we belong to Allah and to Allah we return (Al Baqarah: 2: 2: 156).*

Now, with Allah's declaration *"...seven skys...(Fushshilat: 41: 12)"...to Allah we return (Al Baqarah: 2: 156) proves that whatever is in "...the nearest sky...(Al Mulk : 67: 5) not lost, everything "...to Allah...return (Al Baqarah: 2: 156).*

Well, *"...the nearest sky...(Al Mulk : 67: 5) is "...the sky...(Al Mulk : 67: 5) that exists "...the stars... (Fushshilat : 41: 12)*

Or in other words, *"...the nearest sky...(Al Mulk : 67: 5) is the sky that has 100 000 000 000 galaxies,*

each galaxy consists of **150 100 000** stars.

Well, "*...the nearest sky... (Al Mulk : 67: 5)* is skys 1, which has the Milky Way galaxy, in which there are the sun, earth, moon and other planets that surround the sun.

Now the question arises,

Why did Allah "*...create seven skys... (Fushshilat: 41: 12)* is it not enough for "*...the nearest sky... (Al Mulk : 67: 5)* that there are **100 000 000 000** galaxies, each galaxy consists of **150 100 000** stars ?

The answer is in the secret behind the verse: "*... we belong to Allah and to Allah we return (Al Baqarah: 2: 156)*

Well, because whatever is in "*...the nearest sky... (Al Mulk : 67: 5)* or sky 1, comes from Allah's energy "*...wherever you turn there is the face of Allah... (Al Baqarah: 2: 115)*, then it will return "*...to Allah's energy... (Al Baqarah: 2: 156)*

So, whatever is in "*...the nearest sky... (Al Mulk : 67: 5)* or sky 1 does not disappear, but returns again to become Allah's energy "*...wherever you turn there is the face of Allah... (Al Baqarah : 2: 115)*

Now another question arises,

What about information from anything in "*...the nearest sky... (Al Mulk : 67: 5)* or sky 1, is the information lost?

The answer is in the secret behind the verse: "*...He made seven skys... (Fushshilat: 41: 12)*

Well, it turns out, the solution made by Allah to store all information from whatever is in "*...the nearest sky... (Al Mulk : 67: 5)* or sky 1, Allah "*...made seven skys... (Fushshilat : 41: 12)*

So, sky 1 is "*...the nearest sky... (Al Mulk : 67: 5)* which has **100 000 000 000** galaxies, each galaxy consists of **150 100 000** stars, while sky 2 to sky 7 is used as a place to store all information from whatever is in "*...the nearest sky... (Al Mulk : 67: 5)* or sky 1.

Another question arises,

How did Allah "*...made seven skys... (Fushshilat: 41: 12)*?

Well, it turns out that Allah's evidence in "*...seven skys... (Fushshilat: 41: 12)* contains 72% dark energy, 23% dark matter and 5% is a neutrino element or elementary particle which has a very small mass and atoms atom (*Universe, Martin Rees, Dorling Kindersley Limited, London, 2005*).

So, actually, most of it is dark energy, or Allah's energy, 72%, then dark matter 23%, where this matter is invisible to the human eye, the remaining 5% is atoms like hydrogen atoms, carbon atoms, oxygen atoms, nitrogen atoms, and other atoms.

Well, now, based on Allah's declaration "*God created the skys and the earth with haq (rights)... (Al 'Ankabuut: 29: 44)*, then whatever is in these seven skys, can be counted with definitely and correctly.

It turns out that after calculating, the total mass of dark matter (23%) is added to the mass of "*...the nearest sky... (Al Mulk : 67: 5)* which contains **100 000 000 000** galaxies (5%), a total of **28** is found. %

of the total percentage as a whole.

Then, if we divide this 28% of mass into several skies that have the same mass, we will find 7 skies that have the same mass, namely each sky has the same 4% mass.

So, in fact, after human calculations, it turns out that "...the nearest sky...(Al Mulk : 67: 5) which contains 100 000 000 000 galaxies is only (4%) in mass. Then, the 2nd – 7th sky have 4% dark matter mass each.

This, Allah's secret, that almost all people in the world do not understand.

"God created the sky and the earth with haq (rights)...(Al 'Ankabuut: 29: 44). Where "...seven skies... (Fushshilat: 41:12) which consists of sky 1 is "...the nearest sky...(Al Mulk : 67: 5) which contains 100 000 000 000 galaxies, while sky 2 – sky 7 is to store all information from whatever is in "...the nearest sky...(Al Mulk : 67: 5) or sky 1.

So, now, another question arises,

How does Allah store all information from anything that is in "...the nearest sky...(Al Mulk : 67: 5) or sky 1?

The answer is in the secret behind the verse: **"...recorded in the notebooks (Al Qamar: 54: 52)**

So, whatever is in "...the nearest sky...(Al Mulk : 67: 5) which contains 100 000 000 000 galaxies is copied or recorded in the form of **"...notebooks (Al Qamar : 54: 52)**

Or in other words, whatever is in "...the nearest sky...(Al Mulk : 67: 5) which contains 100 000 000 000 galaxies are copied or recorded stored in database and placed in sky 2 – sky 7 .

So, how to make an imitation or record of all information from whatever is in **"...the nearest sky...(Al Mulk : 67: 5) or the 1st sky?**

The answer is, because whatever is in **"...the nearest sky...(Al Mulk : 67: 5) or in sky 1 is built by atoms, just as humans are built by 7 000000000 000000000 000000000 atoms, then information from these atoms are imitated or recorded every 0.5 nanoseconds.**

By using Allah's particle **0,000000000 000000000 000000000 000000000 00000 3335917542091889** grams, which has speed of light **5 475 103 664 604.84** km per second, absorbing Allah's energy **0.000000000 000000000 000000000 01** gram, to do imitation or recording of anything that is in **"...the nearest sky...(Al Mulk : 67: 5) or sky 1, including humans and all actions, both visible and invisible, where the results of imitation or recording is stored in the form of "...notebooks (Al Qamar: 54: 52) and stored in sky 2 - sky 7.**

Well, it turns out, what is called **"... notebooks (Al Qamar: 54: 52) or databases that contain imitations or recordings of anything in "...the nearest sky...(Al Mulk : 67: 5) or sky 1 is stored in sky 2 - sky 7 which contains 23% dark matter, where this dark matter is invisible to the human eye.**

This is the secret of Allah, which most people in the world do not understand and do not yet know.

CONCLUSION

Based on the description above we can conclude that the secrets contained behind the verses: **"...He**

made the seven skys in two days...(Fushshilat: 41: 12)"...we belong to Allah and to Allah we return (Al Baqarah: 2: 156).

Well, here, Allah has declared *"...He made seven skys in two days...(Fushshilat: 41: 12)"...we belong to Allah and to Allah we return (Al Baqarah: 2: 156).*

So now, the question arises,

What is actually called a lanite?

The answer is, the sky is an expanse of space above which there are the sun, stars, earth, planets and moon.

This, is Allah's secret that was opened to all people in the world, *"... He made the seven skys...(Fushshilat: 41: 12)" ...we belong to Allah and to Allah we return (Al Baqarah: 2: 2: 156).*

Now, with Allah's declaration *"...seven skys...(Fushshilat: 41: 12)"...to Allah we return (Al Baqarah: 2: 156) proves that whatever is in "...the nearest sky...(Al Mulk : 67: 5) not lost, everything "...to Allah...return (Al Baqarah: 2: 156).*

Well, *"...the nearest sky...(Al Mulk : 67: 5) is "...the sky...(Al Mulk : 67: 5) that exists"...the stars...(Fushshilat : 41: 12)*

Or in other words, *"...the nearest sky...(Al Mulk : 67: 5) is the sky that has 100 000 000 000 galaxies, each galaxy consists of 150 100 000 stars.*

Well, *"...the nearest sky...(Al Mulk : 67: 5) is skys 1, which has the Milky Way galaxy, in which there are the sun, earth, moon and other planets that surround the sun.*

Now the question arises,

Why did Allah *"...create seven skys...(Fushshilat: 41: 12) is it not enough for "...the nearest sky...(Al Mulk : 67: 5) that there are 100 000 000 000 galaxies, each galaxy consists of 150 100 000 stars ?*

The answer is in the secret behind the verse: *"... we belong to Allah and to Allah we return (Al Baqarah: 2: 156)*

Well, because whatever is in *"...the nearest sky...(Al Mulk : 67: 5) or sky 1, comes from Allah's energy "...wherever you turn there is the face of Allah...(Al Baqarah: 2: 115), then it will return "...to Allah's energy...(Al Baqarah: 2: 156)*

So, whatever is in *"...the nearest sky...(Al Mulk : 67: 5) or sky 1 does not disappear, but returns again to become Allah's energy "...wherever you turn there is the face of Allah...(Al Baqarah : 2: 115)*

Now another question arises,

What about information from anything in *"...the nearest sky...(Al Mulk : 67: 5) or sky 1, is the information lost?*

The answer is in the secret behind the verse: *"...He made seven skys...(Fushshilat: 41: 12)*

Well, it turns out, the solution made by Allah to store all information from whatever is in *"...the nearest sky...(Al Mulk : 67: 5) or sky 1, Allah "...made seven skys...(Fushshilat : 41: 12)*

So, sky 1 is "*...the nearest sky... (Al Mulk : 67: 5)* which has **100 000 000 000** galaxies, each galaxy consists of **150 100 000** stars, while sky 2 to sky 7 is used as a place to store all information from whatever is in "*...the nearest sky... (Al Mulk : 67: 5)* or sky 1.

Another question arises,

How did Allah "*...made seven skys... (Fushshilat: 41: 12)*?

Well, it turns out that Allah's evidence in "*...seven skys... (Fushshilat: 41: 12)* contains 72% dark energy, 23% dark matter and 5% is a neutrino element or elementary particle which has a very small mass and atoms atom (*Universe, Martin Rees, Dorling Kindersley Limited, London, 2005*).

So, now, another question arises,

How does Allah store all information from anything that is in "*...the nearest sky... (Al Mulk : 67: 5)* or sky 1?

The answer is in the secret behind the verse: "*...recorded in the notebooks (Al Qamar: 54: 52)*
