ABSTRACT

Before the author writes about Hinduism, Buddhism, Christianity using the same method to create God through incarnation, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret about Hinduism, Buddhism, Christianity using the same method to create God through incarnation, based on deoxyribonucleic acid (DNA).

There are several verses that reveal the secret of Allah about Hinduism, Buddhism, Christianity using the same method to create God through incarnation, namely the following verses:

"So when I have perfected the creation of Adam and I have breathed into Adam My spirit, then you will fall down prostrating yourself to him. (Shaad: 38: 72).

"And Maryam bint Imran who maintained her honour, then We breathed into Maryam's womb Our spirit, and she confirmed the words of her God and His Books, and she was one of the obedient people. (At Tahrim: 66: 12).

"So Maryam created a veil from them, then We sent Our spirit to Maryam, then Our spirit was incarnated before Maryam as a perfect human being. (Maryam : 19: 17).

"Then He perfected Adam and breathed into Adam His spirit and made for you hearing and sight and hearts, you are very little, be grateful. (As Sajdah: 32: 9).

In an effort to reveal the secret of Allah about Hinduism, Buddhism, Christianity using the same method to create God through incarnation, the author uses the basis of Deoxyribonucleic acid (DNA)

HYPOTHESIS

Here the author proposes hypothesis that Hinduism, Buddhism, Christianity using the same method to create God through incarnation, based on Deoxyribonucleic acid (DNA)

PHOTON

Photon is an elementary particle of the boson type and a carrier of electromagnetic interaction.

QUARK

If we want to know quarks, then we look at one of the hydrogen atoms which is an element of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Furthermore, if this proton is split, then we will find two upper quarks and one lower quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. These nucleotides consist of folate, a 5-carbon sugar and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are found in abundance around us and in the atmosphere.

HINDUISM, BUDDHISM, CHRISTIANITY USING THE SAME METHOD TO CREATE GOD THROUGH INCARNATION

So now, we are still concentrating our minds on uncovering the secret contained behind the verse: *"...Our spirit...incarnated...a perfect human (Maryam: 19: 17)"... I breathed into Adam My spirit... (Shaad: 38: 72) "... We breathed into Maryam's womb Our spirit... (At Tahrir: 66: 12).*

Allah, here, declares *"...Our spirit...incarnated...a perfect human. (Maryam : 19: 17).*

Well, it turns out, from what Allah declared, the real secret of Allah was revealed, namely *"...Our spirit...incarnated...a perfect human (Maryam: 19: 17).*

So, actually what *"...incarnated...a perfect human (Maryam: 19: 17)* is *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17).*

Well, what is in *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17)* is something that is in accordance with the human body.

This means that something that becomes the building of *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17)* is the same as something that becomes the building of the human body.

Well, in this case, Allah, in Allah's form, in the form of *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17)* is something that is the source of human life and the source of life for all seven skys.

Now what is the source of human life and the source of life for all seven skys is matter in the form of hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms. Where hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms are also the building blocks of Deoxyribonucleic acid (DNA). According to human DNA, it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Or in other words, *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17)* is Deoxyribonucleic acid (DNA). Where this DNA is in the human body, animals, plants, fungi, bacteria, amoeba, archaea and viruses.

So, to understand Allah, human must study and think about the form of Allah in the form of "...*Our spirit...*(*Maryam: 19: 17*) or "...*Allah's spirit...*(*Maryam: 19: 17*) which is the source of human life and the source of life for all seven skys. Where the source of human life and the source of life for all seven skys is matter in the form of hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms.

Now, the question arises,

How exactly, incarnation, according to Hinduism, Buddhism and Christianity?

The answer is, Vishnu incarnation becomes one of them, into a fish, into a turtle, into a Buddha or a human.

Well, here, because Vishnu is one, while Vishnu can incarnate, including becoming fish, turtle and Buddha or human, then there is in the form of Vishnu in the form of energy, matter and particle that are the source of life and part of the body of fish, turtle and Buddha or human.

Well, something that is in the form of Vishnu in the form of energy, matter and particle that incarnate into fish, turtles and Buddha or human.

Well, because according to Hindu teachings, Vishnu is invisible, then after Vishnu incarnated into fish, turtle and Buddha or human, it can be seen by human.

So, according to Hindu teachings, Vishnu is the same as fish or turtle or Buddha or human.

While according to Buddhist teachings, humans can incarnate as other human and as animal.

Well, according to Buddhist teachings, the spirit that exists in human is incarnated as human and as animal.

Well, according to Buddhist teachings, it is not explained empirically, what is the human spirit that incarnates as human and as animal. Where the human spirit can incarnate many times, or what is called reincarnation as human and animal.

According to Christian teachings, God or the spirit in heaven through the holy spirit incarnates as flesh in human form.

Well, incarnation according to Christian teachings is no different from incarnation in Hinduism and Buddhism.

According to Christian teachings, God or the invisible spirit, in order to be visible to human, then God or the spirit through the holy spirit incarnated as human.

So, according to Hinduism, Buddhism and Christianity, God or the spirit or Vishnu incarnated as human and animal.

Or in other words, Hinduism, Buddhism, Christianity use the same method to create God through incarnation.

Now, another question arises,

What does Islam think about incarnation?

The answer is, according to Islam, "...*Our spirit ... incarnated ... a perfect human. (Maryam: 19: 17).*

Where "...*Our spirit... (Maryam: 19: 17)* or "... *Allah's spirit...(Maryam: 19: 17)* is something that is in accordance with the human body.

Well, something that is in accordance with the human body is hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms. Where hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms are also the building blocks of Deoxyribonucleic acid (DNA). According to DNA, humans are composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Or in other words, "...*Our spirit... (Maryam: 19: 17)* or "...*Allah's spirit...(Maryam: 19: 17)* is Deoxyribonucleic acid (DNA). Where this DNA is in the human body, animals, plants, fungi, bacteria, amoeba, archaea and viruses.

So according to Islam, the incarnation is not God but "...*Our spirit... (Maryam: 19: 17)* or "... *Allah's spirit... (Maryam: 19: 17)* which is built with hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms, where hydrogen atoms, carbon atoms, oxygen atoms are formed with quark, quark is formed with the energy of Allah.

Different from the incarnation according to Hindu, Buddhist and Christian teachings. According to Hindu, Buddhist and Christian teachings, God or spirit or Vishnu is incarnated as human and animal.

Therefore, according to Hindu, Buddhist and Christian teachings, God is not one, but there are several Gods in various forms.

Now the question arises again,

Is there only one God in the universe or are there several Gods in the universe?

Well the answer is there is only one God in the universe, why?

Because, before the universe was created, there was only one God with God's energy in a time span of 0.0000000000 0000000000 0000000000 0000000000 001 seconds, quarks were created, which would become the nucleus of the atom.

Well, if there was something other than God before the universe was created, with energy in a time span of 0.0000000000 0000000000 0000000000 0000000000 001 seconds, quarks were created, which would become the nucleus of the atom, then God is not just one.

But, because there was nothing but God before the universe was created, with the energy that in a time span of 0.0000000000 0000000000 0000000000 0000000000 001 seconds, created quark, which will become the nucleus of the atom, then God is only one in the universe.

So, actually there is only one God in the universe.

Or in other words, there is only one Allah in the universe.

CONCLUSION

The conclusion that can be drawn from the explanation above is the secret contained behind the verse: *"...Our spirit...incarnated...a perfect human (Maryam: 19: 17)"... I breathed into Adam My spirit... (Shaad: 38: 72) "... We breathed into Maryam's womb Our spirit... (At Tahrir: 66: 12).*

Allah, here, declares *"...Our spirit...incarnated...a perfect human. (Maryam : 19: 17).*

So, actually what *"...incarnated...a perfect human (Maryam: 19: 17)* is *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17).*

Well, what is in *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17)* is something that is in accordance with the human body.

This means that something that becomes the building of *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17)* is the same as something that becomes the building of the human body.
