**ABSTRACT**

Before I write down the problem of how Allah actually breathed my spirit into a woman's womb, I first asked forgiveness from Allah SWT. Here I try to open the veil that covers the secret of how Allah actually breathed my spirit into a woman's womb, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about how Allah actually breathed my spirit into a woman's womb, namely the following verses:

*"And verily We have created man from an essence from the ground. (Al Mu'minuun: 23:12)*

*"Then We made the essence of semen in a solid place. (Al Mu'minuun: 23:13)*

*"So when I have perfected the event and I have breathed into it My spirit; then you should fall down prostrating to it." (Shaad : 38:72)*

*"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourselves (Al Hijr: 15: 29)*

*"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)*

*"Then He perfected and breathed into it His spirit and He made for you hearing, sight and hearts you have little gratitude. (As Sajdah: 32: 9)*

*"...Indeed the Messiah, Jesus the son of Mary, is the messenger of Allah and His words which He conveyed to Mary, and a spirit from Him... (An Nisaa ': 4:171)*

*"O mankind, if you are in doubt about the resurrection, then indeed We have created you from clay, then from a drop of semen, then from a clot of blood, then from a lump of flesh which is perfect and imperfect, so that We may explain it to you and determine in the womb, what We will until a predetermined time, then We bring you out as babies, then you come to maturity, and some of you are passed away and some of you have extended their life to senility, so that he will no longer know anything that is wrong. he knew before. And you see the earth is dry, then when We send down water on it, the earth lives and is fertile and grows all kinds of beautiful plants. (Al Hajj: 22: 5)*

*"Didn't We create you from despicable water (Al Mursalaat: 77:20)*

*"Then We made the essence of semen in a solid place. (Al Mu'minuun: 23:13)*

*"And does man not notice that We created him from a drop of water, then suddenly he becomes a real challenger (Yaasiin: 36: 77)*

*"His companion said to him while he was conversing with him: "Do you disbelieve in the one who created you from clay, then from a drop of semen, then He made you a perfect man? (Al Kahf: 18: 37)*

*"And Maryam, the daughter of Imran, who kept her honor, so We breathed into her a portion of Our spirit, and she confirmed the words of her Lord and His Books, and she was one of the obedient. (At Tahrir: 66:12)*

In an effort to open the veil of Allah's secret about how Allah actually breathed my spirit into a woman's womb, I used the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## **HYPOTHESES**

Here I propose a hypothesis that how Allah breathed my spirit into a woman's womb is a symbol, which refers to the sperm from the male side meeting the egg from the female side, viewed from the basic point of Deoxyribonucleic acid (DNA).

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **PHOTON**

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

## **QUARK**

As for if we want to know quarks, then we look at one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects.

Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

## **WHAT REALLY IS MY SPIRIT IS BLOWN BY ALLAH INTO WOMEN'S WOMB**

Now, we are still concentrating on trying to uncover the secret hidden behind the verse: *"...We have created man from an essence from the ground. (Al Mu'minuun: 23:12) "...then from a drop of semen. .. (Al Hajj : 22: 5) "... I breathed into him my spirit... (Shaad : 38: 72)"... into the womb... (At Tahrir: 66: 12)*

Apparently, here Allah has declared that humans were created from the essence of soil.

Now the question arises,

What is the essence of soil?

The answer is,

The essence of soil is carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms.

So, why were humans created from carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms?

Because, indeed the universe and everything in it was created from carbon atoms, nitrogen atoms, hydrogen atoms, oxygen atoms, neon atoms, helium atoms.

Then *"...from...the essence of soil. (Al Mu'minuun: 23:12) became "...a drop of semen...(Al Hajj: 22:5) and "...I breathed into him my spirit. ... (Shaad: 38:72)"...into the womb...(At Tahrir: 66:12)*

It turns out, from carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms are formed *"...a drop of semen...(Al Hajj: 22: 5)* then from *"...a drop of semen...(Al Hajj: 22: 5)* is blown *"...to him my spirit... (Shaad: 38:72)* enters *"...into the womb...(At Tahrir: 66:12)*

So, actually, *"...my spirit... (Shaad: 38: 72)* that is blown *"...into the womb...(At Tahrir: 66:12)* is *"...a drop of semen... (Al Hajj: 22: 5)* or sperm from the male side.

Where in *"...a drop of semen...(Al Hajj: 22:5)* or sperm from the male side contains carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms.

Or in other words, *"... my spirit... (Shaad : 38: 72)* is a sperm from the male side which contains carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms.

Now, it has been revealed, that the secret that is kept well behind the verse: *"...I breathed into him my spirit... (Shaad: 38:72)* is *"...a drop of semen...(Al Hajj: 22:5)* or sperm from the male side containing carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms.

### **MY SPIRIT CONTAINS HYDROGEN ATOM, CARBON ATOM, OXYGEN ATOM AND NITROGEN ATOM IS IN THE ENTIRE UNIVERSE AND IN ALL ITS CONTENTS**

Now, because in *"... my spirit... (Shaad : 38: 72)* contains carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms, then *"... My spirit... (Shaad : 38: 72)* exists in the universe including all its contents, both living things and inanimate objects.

Or in other words, Allah breathed *"... my spirit... (Shaad: 38: 72)* into the universe and all its contents, both living creatures and inanimate objects.

### **MY SPIRIT THAT ALLAH BLOWS INTO A WOMEN'S WOMB IS A DROP OF SEEM OR SPERM FROM THE MAN THAT CONTAINS DNA**

Now, it is increasingly clear, where Allah has declared that humans were created from *"...semen in a solid place. (Al Mu'minuun: 23:13)* which refers to *"...I breathed into him my spirit...(Shaad :38:72)*

Now, it is becoming clearer and clearer, that Allah breathed *"...My spirit...(Shaad: 38:72) "...into the womb...(At Tahrir: 66:12)* women referring to *".. .semen ... (Al Mu'minuun: 23: 13)* which is released from the male side and stored *"...in a solid place (Al Mu'minuun: 23: 13)*

So, in *"...semen...(Al Mu'minuun: 23: 13)* or sperm contains Deoxyribonucleic acid (DNA). Where in human DNA contains 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and

35.59% hydrogen atoms.

Now, it is increasingly clear that *"...my spirit...(Shaad : 38: 72)* is Deoxyribonucleic acid (DNA) which contains 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78 % oxygen atoms and 35.59% hydrogen atoms.

## CONCLUSION

Based on the description above, we can conclude that the secret hidden behind the verse: *"...We have created man from an essence from the ground. (Al Mu'minuun: 23:12) "...then from a drop of semen. ..(Al Hajj : 22: 5) "... I breathed into him my spirit... (Shaad : 38: 72)"... into the womb... (At Tahrir: 66: 12)*

So, actually, *"...my spirit... (Shaad: 38: 72)* that is blown *"...into the womb...(At Tahrir: 66:12)* is *"...a drop of semen... (Al Hajj: 22: 5)* or sperm from the male side.

Where in *"...a drop of semen...(Al Hajj: 22:5)* or sperm from the male side contains carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms.

So, in "*...semen...(Al Mu'minuun: 23: 13)*" or sperm contains Deoxyribonucleic acid (DNA). Where in human DNA contains 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.
