ABSTRACT

Before the author writes down the problem of how Allah actually regulates billions of billions of galaxies in which there are billions of billions of stars, is it only enough to reveal to these galaxies, first the author asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of how Allah actually regulates billions of billions of galaxies in which there are billions of billions of stars, is it enough just to reveal them to galaxies, based on Deoxyribonucleic acid (DNA)

There are several verses that become Allah's secret unlocking about how Allah actually regulates billions of billions of galaxies in which there are billions of billions of stars, is it only enough to reveal them to the galaxies, namely the following verses:

"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)

"Those who remember Allah while standing or sitting or lying down and they think about the creation of the heavens and the earth: "Our Lord, You did not create this in vain, Glory be to You, so protect us from the torment of Hell. (Ali 'Imran: 3:191)

"And verily We have created man from an essence of clay. (Al Mu'minuun: 23:12)

"Then when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and hearts; you are very little grateful. (As Sajdah: 32: 9)

"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Verily, He is Most High, Most Wise. (Ash Shuura: 42: 51)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when he asks Me, then let them fulfill (all My commands) and let them believe in Me. Me, that they may always be in the truth.(Al Baqarah: 2:186)

"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)

"He arranges affairs from the heavens to the earth, then it ascends to Him in one day whose level is a thousand years according to your reckoning (As Sajdah: 32: 5)

"Angels and spirits ascend to God in a day whose measure is fifty thousand years." (Al Ma'aarij: 70:4)

"Who has created the seven heavens in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look over and over again, do you see anything that is not balanced? (Al Mulk: 67: 3)

"And to Allah belongs the east and the west, so wherever you turn there is the face of Allah. Verily Allah is All-Encompassing, All-Knowing. (Al Baqarah: 2:115)

In an effort to open the veil of Allah's secret about how Allah actually regulates billions of billions of galaxies in which there are billions of billions of stars, is it enough to just reveal to those galaxies, the author uses the basis of deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here the author proposes the hypothesis that Allah governs billions of billions of galaxies in which there are billions of billions of stars, by means of Allah's energy, Allah's particles and *"...Allah's spirit...(Shaad : 38:72)*, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on Deoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere.

ALLAH REVEALS TO EVERY SKY THROUGH ALLAH'S ENERGY, ALLAH'S PARTICLES AND ALLAH'S SPIRIT

Now, we are still concentrating on uncovering the secrets contained behind the verses: *"...He made it seven skys...revealing in each sky his affairs...(Fushshilat: 41:12)"... We take care of it as well as possible ... (Fushshilat: 41: 12)" ... each circulating in its orbit (Yaasiin: 36: 40)*

It turns out that Allah has declared *"...revealing in every sky his affairs... (Fushshilat: 41:12)*

So, what is *"...sky...(Fushshilat : 41:12) ?*

The sky is the expanse of space on which the moon surrounds the planets, the planets surround the stars, the stars form a collection of stars, forming galaxies. Galaxies form clusters of galaxies into galaxy clusters.

So, what is called the sky, which is actually the sky is the expanse of space above which there are galaxies, each galaxy consists of millions of stars, each star is surrounded by planets, each planet is surrounded by the moon.

Each sky has billions of galaxies and in the seven skies there are **100 000 000 000** galaxies and **15 010 000 000 000 000 000** stars,

With billions of galaxies and billions of billions of stars, everything must be arranged, so as not to collide with one star with another star.

Well, this is where Allah *"...reveals in each sky his interest... (Fushshilat: 41:12)* in the form of Allah's energy, Allah's particles and gravity, namely the attraction of the moon, the attraction of the planets, the attraction of the stars and the attraction of the stars. galaxy.

With the existence of gravity, the moon and stars circulates in their respective paths regularly, not colliding with each other. *"...bright stars... We take good care of them... (Fushshilat: 41: 12)"...each one circulates in its own orbit (Yaasiin: 36: 40)*

Well, in the presence of gravity, Allah's energy, Allah's particles and *"...Allah's spirit... (Shaad: 38: 72)* become *"...bright stars... (Fushshilat : 41:12)*, where *"...bright stars... (Fushshilat : 41:12)* because of *"...Allah's spirit... (Shaad: 38: 72)* i.e. hydrogen atoms as fuel *"...the stars... (Fushshilat: 41:12)*

With the presence of gravity, Allah's energy, Allah's particles and *"...Allah's spirit... (Shaad: 38: 72)* there are *"seven skys, the earth and all that is in it... (Al Israa': 17: 44))"...balanced... (Al Mulk : 67: 3)*

This is what Allah declared *"The seven skys, the earth and all that is in it glorify Allah ... (Al Israa ' : 17: 44)*

That is, the moon, planets and stars glorify in the form of maintaining balance and staying in their respective orbits with the help of Allah's energy, Allah's particles and *"...Allah's spirit... (Shaad: 38: 72)*

Now it has been revealed, the secret behind the verse: *"...He reveals to every sky his affairs... (Fushshilat: 41:12)*

That is, revelation in the form of Allah's energy, Allah's particles and gravity, which keeps the moon, planets and stars in their respective orbits.

CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verses: *"...He made it seven skys...revealing in each sky his affairs... (Fushshilat: 41:12)"... We take care of it as well as possible ... (Fushshilat: 41: 12)" ... each circulating in its orbit (Yaasiin: 36: 40)*
