ABSTRACT

Before I write down the problem of how Allah actually takes human life, I first ask forgiveness from Allah SWT. Here I try to open the veil that covers the secret of how Allah actually takes human life, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about how Allah actually takes human life, namely the following verse:

"Allah holds the soul when it dies and the soul that has not died in its sleep; so He holds the soul which He has appointed death and He releases another soul until the appointed time. Verily in that are signs of Allah's power for a people who think (Az Zumar : 39: 42)

"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And if We made the apostle an angel, We would certainly have made him a man and, of course We would have doubted about them what they doubted about themselves (Al An'aam: 6:9)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

"... We made the apostle an angel... a man... (Al An'aam: 6: 9)

"Say: "The angel of death entrusted to you will kill you, then only to your Lord you will be returned." (As Sajdah: 32:11)

"What if the angels took their lives while beating their faces and their backs? (Muhammad: 47: 27)

"By the one who plucks out loudly (An Naazi´aat: 79:1)

"and who plucks gently (An Naazi´aat: 79: 2)

"Indeed, those who were killed by the angels in a state of persecuting themselves, the angels asked: "In what state are you in?" They replied: "We are the oppressed in the land." The angels said: "Is not Allah's earth wide, so that you can emigrate in that earth?" For those people the place of Hell is Hell, and Hell is the worst place to return to, (An Nisaa ': 4: 97)

> *"Then He perfected and breathed into him His spirit and He made for you hearing, sight, and heart; you are very little grateful." (As Sajdah: 32: 9)*

In an effort to open the veil about how Allah actually took human life, I based on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that Allah takes human life, by restraining *"...my spirit...(Shaad: 38: 72)* by holding oxygen atoms and through stopping the heart to pump blood containing Deoxyribonucleic acid (DNA), seen from the angle of photons, quarks and deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

HOW ACTUALLY ALLAH TAKES HUMAN LIFE

Now, we are still concentrating on revealing the secrets that are stored in the verse: *"God holds the soul when it dies and the soul that has not died while sleeping; so He holds the soul He has appointed for death and He releases another soul until the appointed time. ...(Al An'aam: 6: 9)*

It turns out, it is clearly illustrated, that *"Allah holds the soul when it dies... (Al An'aam: 6: 9)*

That is, Allah holds *"... my spirit... (Shaad: 38: 72)*

Why does Allah hold *"...my spirit...(Shaad: 38:72)* when Allah will take human life?

Because *"... my spirit... (Shaad: 38: 72)* which is the source of life for humans and which is the building of Deoxyribonucleic acid (DNA) where humans based on DNA consist of 32.20% carbon

atoms, 25.43% atoms nitrogen, 6.78% oxygen atoms and 35.59% hydrogen atoms.

When *"...my spirit...(Shaad: 38: 72)* conveys information to Allah through frequency waves with the speed of light 109 502 073 292.0968 km per second, that the condition of the human body is no longer able to sustain life, then Allah , wherever the human is, decides by means of a frequency wave the speed of light 5 475 103 664 604.84 km per second to hold and hold *"... my spirit...(Shaad : 38: 72)* through the stopping of the oxygen atom which is the source of human life. . In just a few seconds, without oxygen atoms as the source of human life, the body's functions can no longer run, which eventually makes the whole body paralyzed and dead.

The living remains *"...my spirit...(Shaad: 38:72)* , where *"...my spirit...(Shaad: 38:72)* will come out of the body of the dead person after 30 days of being buried in land.

CONCLUSION

Based on the description above, we can conclude that the secrets that are stored in the verse: *"God holds the soul when it dies and the soul that has not died while sleeping; so He holds the soul He has appointed for death and He releases another soul until the appointed time. ...(Al An'aam: 6: 9)*

It turns out, it is clearly illustrated, that *"Allah holds the soul when it dies... (Al An'aam: 6: 9)*

That is, Allah holds *"... my spirit... (Shaad: 38: 72)*

Why does Allah hold *"...my spirit...(Shaad: 38:72)* when Allah will take human life?

Because *"... my spirit... (Shaad: 38: 72)* which is the source of life for humans and which is the building of Deoxyribonucleic acid (DNA) where humans based on DNA consist of 32.20% carbon atoms, 25.43% atoms nitrogen, 6.78% oxygen atoms and 35.59% hydrogen atoms.

The living remains *"...my spirit...(Shaad: 38:72)* , where *"...my spirit...(Shaad: 38:72)* will come out of the body of the dead person after 30 days of being buried in land.
