### ABSTRACT

Before I write down the problem of what is actually meant by, how Allah actually sees, I first ask forgiveness from Allah SWT. Here I try to unmask the secret of how Allah actually sees, from the point of view of the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about how Allah actually sees, namely the following verses:

*"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)*

*"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)*

*"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)*

*"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)*

*"And Mary, the daughter of Imran, who kept her honor, so We breathed into her some of Our spirits, and she confirmed the words of her Lord and His Books, and she was one of the obedient ones. (At Tahrir: 66:12)*

*"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when they ask Me, then let them fulfill (all My commands) and let them believe in - Me, that they may always be in the truth (Al Baqarah: 2: 186)*

*"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)*

*"Allah did not create and resurrect you except as one soul. Indeed, Allah is All-Hearing, All-Seeing. (Luqman: 31:28)*

*"Indeed We see your face looking up to the sky, then We will turn you to the Qibla that you like. Turn your face towards the Grand Mosque. And wherever you are, turn your face towards it. And indeed those who were given the Book do know, that turning to the Grand Mosque is true from their Lord, and Allah is never unaware of what they are doing (Al Baqarah: 2:144)*

*"And We made a wall before them and behind them a wall, and We covered them so that they could not see." (Yaasiin: 36:9)*

*"...We have adorned the sky near the stars...(Al Mulk: 67: 5)*

*"Creator of the heavens and the earth. He made for you from your own kind pairs and pairs of livestock, He made you breed in that way. There is nothing like Him, and He is the Most High. Hearing and Seeing (Asy Shuura: 42:11)*

*"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)*

In an effort to unmask Allah's secret about what it really means, Allah hears and sees, I use a base of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## **HYPOTHESIS**

Here I put forward the hypothesis that Allah hears through the vibration of the light layer, and Allah sees through the light layer, from the point of view of Deoxyribonucleic acid (DNA).

## **PHOTON**

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

## **QUARK**

If we want to know quarks, then we consider one of the hydrogen atoms which is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

## **DEOXYRIBONUCLIC ACID (DNA)**

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **HOW ALLAH REALLY SEE**

Now, we are still concentrating on uncovering the secrets contained behind the verse: "*Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)*"

It turns out that Allah is "*... the light of the skys and the earth... (An Nuur: 24: 35)*"

That is, with the presence of "*... light... (An Nuur: 24: 35)*" Allah, then you can see what is in this universe.

Now, the question arises,

Where does Allah's light come from?

The answer is,

Kept in a secret hidden behind the verse: "*... I... have blown into it my spirit... (Al Hijr: 15: 29)*"

Well, apparently, Allah's light is from "... *my spirit...* (*Al Hijr: 15: 29*)

What does it look like in "... *my spirit...* (*Al Hijr: 15: 29*) ?

The answer is

"... *my spirit...* (*Al Hijr: 15: 29*) contains the source of life for all that exists in this universe.

Namely "... *my spirit...* (*Al Hijr: 15: 29*) contains hydrogen atoms, nitrogen atoms, carbon atoms and oxygen atoms.

Well, with hydrogen atoms, nitrogen atoms, carbon atoms and oxygen atoms created by Allah "...*the skys and the earth...*(*Asy Syuura: 42:11*) without hydrogen atoms, nitrogen atoms, carbon atoms and oxygen atoms will not exist. happen or not, this universe will be created.

Now, "...*light...*(*An Nuur : 24: 35*) Allah comes from "... *my spirit...*(*Al Hijr : 15: 29*) which contains a hydrogen atom.

Well, with this hydrogen atom created "...*light...*(*An Nuur: 24: 35*) Allah .

How does it happen "...*light...*(*An Nuur : 24: 35*) Allah uses hydrogen atoms?

The answer is

Hidden in the secret behind the verse: "... *We have adorned the sky close to the stars...* (*Al Mulk: 67: 5*)

## **ALLAH SEE THROUGH MY SPIRIT**

Well, it is in these stars that Allah's light is born, through the hydrogen atom.

It is because of these hydrogen atoms that the stars, billions of which are in the universe, emit their rays, including the sun, which because of the hydrogen atom fuel, is the birth of light rays that reach the earth and to our bodies.

Now it has been revealed, "*Allah... the light of the skys and the earth...*(*An Nuur: 24: 35*) is from "... *my spirit...* (*Al Hijr: 15: 29*) which contains hydrogen atoms.

It is with this hydrogen atom that Allah's light is born which illuminates "... *the skys and the earth...* (*An Nuur: 24: 35*)

Or in other words "...*Allah...Seeing. (Luqman: 31: 28)* through "... *the light of the sky...* (*An Nuur: 24: 35*) which comes from "... *my spirit...* (*Al Hijr: 15: 29*) in which there is a hydrogen atom .

## **CONCLUSION**

Based on the description above, we can conclude that the secrets contained behind the verse: "*Allah... the light of the skys and the earth... the light upon the light...* (*An Nuur: 24: 35*)

It turns out that Allah is "... *the light of the skys and the earth...* (*An Nuur: 24: 35*)
