ABSTRACT

First of all, by asking forgiveness from Allah SWT here I am trying to reveal the signs of Allah SWT about Allah's secret about how prayer actually reaches the dead, based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

In the Qur'an found several verses that are the key to unlocking the secret of Allah's secret about how prayer actually reaches the dead, namely the following verses:

*"Have We not made the earth (a place) to gather, (Al Mursalaat: 77: 25) the living and the dead?
(Al Mursalaat: 77: 26)*

*"... then We bring out because of the rain various kinds of fruit. That is how We raise the dead..."
(Al A'raaf: 7: 57)*

"Allah is the light of the heavens and the earth.

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when he asks Me, then let them fulfill (all My commands) and let them believe in Me. Me, that they may always be in the truth.(Al Baqarah: 2:186)

"And why don't they think about themselves? Allah did not make the heavens and the earth and what is between them except with the truth and at an appointed time. And indeed, most of the people really deny meeting their Lord. (Ar Ruum: 30:8)

"...Then didn't you think? (Ash Shaaffaat: 37:138)

"... We are closer to him than his jugular vein, (Qaaf: 50:16)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourselves (Al Hijr: 15: 29)

"Allah holds the soul when it dies and the soul that has not died in its sleep; so He holds the soul which He has appointed death and He releases another soul until the appointed time. Verily in that are signs of Allah's power for a people who think (Az Zumar : 39: 42)

In an effort to unmask the secrets of Allah, how prayer actually reaches the dead, I based on photons, quarks and deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis of prayer to people who have died through *"... my spirit... (Al Hijr: 15: 29)* viewed from the point of view of photons, quarks and Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide

polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

HOW PLANTS LIVE AND HOW PLANTS DIE

Now, we continue to focus our minds on unlocking the secret that is stored in the verse: *"... then We bring out because of the rain various kinds of fruit. That is how We raise the dead..." (Al A'raf: 7:57)*

Well, it turns out that Allah made a picture to humans, how Allah actually *"...raised people who have died..." (Al A'raaf: 7: 57)*, namely through ways such as *"...We remove because the rain is of various kinds of fruit. In this way We raise up those who have died..." (Al A'raaf: 7: 57)*

So it is revealed now, where rainwater which contains oxygen atoms and hydrogen atoms has given life to plants through the absorption of oxygen atoms, hydrogen atoms plus carbon atoms obtained from the soil, to be used as a kind of sugar or glucose, as food for plants. plants that later produce *"...various kinds of fruits...(Al A'raaf: 7: 57)*

Well, that is to say, oxygen atoms, hydrogen atoms and carbon atoms that give life to plants. Previously, the plants died, in the presence of oxygen atoms, hydrogen atoms and carbon atoms, the plants became alive producing *"...various kinds of fruits...(Al A'raaf: 7: 57)*

Now, if the oxygen atoms, hydrogen atoms and carbon atoms that become food ingredients in the form of glucose have been used for plant food, if it doesn't rain, the plants die.

So, why do plants die?

The answer is

Because there is no more water that contains oxygen atoms and hydrogen atoms to be used as food by plants.

Where is the glucose food that has been used by the plants, the oxygen atoms, hydrogen atoms and carbon atoms are not lost, but come out again from the dead plants.

It means, *"... my spirit... (Al Hijr: 15: 29)* which is in plants, which contains oxygen atoms, hydrogen atoms and carbon atoms, comes out of the plants when the plants die.

BEFORE 30 DAYS "MY SPIRIT" HAS NOT COME OUT FROM THE BODY OF THE PERSON WHO DIED

Now, let's dismantle the secret behind the verse: *"...then He holds the soul that He has decreed for death... (Az Zumar: 39: 42)*

That is, here, Allah holds and pulls back *"... my spirit... (Al Hijr: 15: 29)* from within the body of the person whose death has been determined.

Now the question is

How long does it take "...my spirit...(Al Hijr: 15: 29) to leave the body of a dead person?

The answer is

"... my spirit... (Al Hijr: 15: 29) leaving the body of a dead person is 30 days.

By going through the process:

A few minutes after humans die, the body temperature drops according to the temperature of the surrounding environment. Where the body temperature drops an average of 1.5-2 degrees every hour. The blood in the body begins to cool, freezes, stops, and prevents the muscles from being able to contract.

Every muscle in the body, from the eyelids to the large muscles, becomes inflexible and the joints stay in place, the whole body stiffens. A few minutes after the heart stops, oxygen levels in the body begin to run low, cells self-destruct, caused by the body's enzymes.

Loss of all color, is caused when blood cells start to break away from blood vessels, then gravity pulls them into smaller blood vessels and capillaries. As a result, the color changes in certain areas of the body. Changes in body color occur gradually and in line with the process of destruction in the body, green, blue, red, purple and finally black appear.

Putrefaction occurs when blood vessels and tissues are damaged. gas and fluid build up and swell causing the body to become swollen in certain areas.

For example, the eyeball is pushed out a little or the tongue slowly comes out of the mouth. Then the swelling is most noticeable in the abdomen. Billions of billions of bacteria take part in this process of decaying dead bodies.

AFTER 30 DAYS "MY SPIRIT" WAS OUT OF THE BODY OF THE DEAD PERSON

Well, the next process is

A month after death, the whole body basically becomes liquid, the organs and large vessels in it become solid. When enough fluid has accumulated the body becomes fractured.

This is the breeding ground for billions of billions of bacteria.

In this decomposition process, carbon atoms and oxygen atoms form carbon dioxide or carbon dioxide. Then this carbonic acid is absorbed by plants and converted into oxygen and glucose through the process of photosynthesis with the help of sunlight, water and chloroplasts.

Chloroplasts are found in the green parts of plants. Where this glucose is used as food by plants while oxygen is used for food through the respiratory process by humans and animals.

In this process of decay too, the dead person's body turns into ammonia. Furthermore, this ammonia is converted into nitrite by nitrosoma bacteria.

Then the nitrite is converted into nitrate by nitrobacter bacteria. Finally, nitrate through the denitrification process returns to nitrogen and rises to the atmosphere.

So the picture above is the secret behind the verses:

"...the earth (where) gathers, (Al Mursalaat: 77:25) ...the dead" (Al Mursalaat: 77:26)

Furthermore, when the carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms which are the building materials for the bodies of the dead people come back out and gather around us and some rise up into the atmosphere.

Now, it has been revealed that in fact, *"... my spirit... (Al Hijr: 15: 29)* which comes out of the body of a person who has died, after 30 days or a month.

So *"... my spirit... (Al Hijr: 15: 29)* which consists of carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms, which actually comes out of the body of the deceased person.

PRAYER THAT IS A VOICE VIBRATION WITH A PARTICULAR FREQUENCY, TOWARDS "MY SPIRIT", WILL BE RECEIVED, AFTER 30 DAYS, WHEN "MY SPIRIT" HAS BEEN OUT OF THE BODY OF THE DEAD PERSON

Now, let's unveil the secret behind the verse: *"Did We not make the earth (a place) to gather, (Al Mursalaat: 77: 25) the living and the dead? (Al Mursalaat: 77: 26)*

It turns out, *"... my spirit... (Al Hijr: 15: 29)* that comes out of the body of a person who has died, after 30 days or a month *"... We made the earth (a place) gather, (Al Mursalaat: 77 : 25) the living and the dead (Al Mursalaat: 77:26)*

So, now it is revealed, that *"... my spirit... (Al Hijr: 15: 29)* which comes out of the body of a person who has died, after 30 days or a month *"... gathers, (Al Mursalaat: 77: 25)* in this *"...earth...(Al Mursalaat: 77:25).*

CONCLUSION

Based on the description above, we can conclude that the secret that is stored in the verse: *"... then We bring out because of the rain various kinds of fruit. That is how We raise the dead..." (Al A'raf: 7:57)*

Well, it turns out that Allah made a picture to humans, how Allah actually *"...raised people who have died..." (Al A'raf: 7: 57)* , namely through ways such as *"...We remove because the rain is of various kinds of fruit. In this way We raise up those who have died..." (Al A'raf: 7: 57)*

So it is revealed now, where rainwater which contains oxygen atoms and hydrogen atoms has given life to plants through the absorption of oxygen atoms, hydrogen atoms plus carbon atoms obtained from the soil, to be used as a kind of sugar or glucose, as food for plants. plants that later produce *"...various kinds of fruits...(Al A'raf: 7: 57)*

Well, that is to say, oxygen atoms, hydrogen atoms and carbon atoms that give life to plants. Previously, the plants died, in the presence of oxygen atoms, hydrogen atoms and carbon atoms, the plants became alive producing *"...various kinds of fruits...(Al A'raf: 7: 57)*

Now, if the oxygen atoms, hydrogen atoms and carbon atoms that become food ingredients in the form of glucose have been used for plant food, if it doesn't rain, the plants die.

So, why do plants die?

The answer is

Because there is no more water that contains oxygen atoms and hydrogen atoms to be used as food by plants.

Where is the glucose food that has been used by the plants, the oxygen atoms, hydrogen atoms and carbon atoms are not lost, but come out again from the dead plants.

It means, "*... my spirit... (Al Hijr: 15: 29)*" which is in plants, which contains oxygen atoms, hydrogen atoms and carbon atoms, comes out of the plants when the plants die.

Now, let's dismantle the secret behind the verse: "*...then He holds the soul that He has decreed for death... (Az Zumar: 39: 42)*"

That is, here, Allah holds and pulls back "*... my spirit... (Al Hijr: 15: 29)*" from within the body of the person whose death has been determined.

Now the question is

How long does it take "*...my spirit...(Al Hijr: 15: 29)*" to leave the body of a dead person?

The answer is

"*... my spirit... (Al Hijr: 15: 29)*" leaving the body of a dead person is 30 days.

By going through the process:

A few minutes after humans die, the body temperature drops according to the temperature of the surrounding environment. Where the body temperature drops an average of 1.5-2 degrees every hour. The blood in the body begins to cool, freezes, stops, and prevents the muscles from being able to contract.

Every muscle in the body, from the eyelids to the large muscles, becomes inflexible and the joints stay in place, the whole body stiffens. A few minutes after the heart stops, oxygen levels in the body begin to run low, cells self-destruct, caused by the body's enzymes.

Loss of all color, is caused when blood cells start to break away from blood vessels, then gravity pulls them into smaller blood vessels and capillaries. As a result, the color changes in certain areas of the body. Changes in body color occur gradually and in line with the process of destruction in the body, green, blue, red, purple and finally black appear.

Putrefaction occurs when blood vessels and tissues are damaged. gas and fluid build up and swell causing the body to become swollen in certain areas.

For example, the eyeball is pushed out a little or the tongue slowly comes out of the mouth. Then the swelling is most noticeable in the abdomen. Billions of billions of bacteria take part in this process of decaying dead bodies.

Well, the next process is

A month after death, the whole body basically becomes liquid, the organs and large vessels in it

become solid. When enough fluid has accumulated the body becomes fractured.

This is the breeding ground for billions of billions of bacteria.

In this decomposition process, carbon atoms and oxygen atoms form carbon dioxide or carbon dioxide. Then this carbonic acid is absorbed by plants and converted into oxygen and glucose through the process of photosynthesis with the help of sunlight, water and chloroplasts.

Chloroplasts are found in the green parts of plants. Where this glucose is used as food by plants while oxygen is used for food through the respiratory process by humans and animals.

In this process of decay too, the dead person's body turns into ammonia. Furthermore, this ammonia is converted into nitrite by nitrosoma bacteria.

Then the nitrite is converted into nitrate by nitrobacter bacteria. Finally, nitrate through the denitrification process returns to nitrogen and rises to the atmosphere.

So the picture above is the secret behind the verses:

"...the earth (where) gathers, (Al Mursalaat: 77:25) ...the dead" (Al Mursalaat: 77:26)

Furthermore, when the carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms which are the building materials for the bodies of the dead people come back out and gather around us and some rise up into the atmosphere.

Now, it has been revealed that in fact, ***"... my spirit... (Al Hijr: 15: 29)*** which comes out of the body of a person who has died, after 30 days or a month.

So ***"... my spirit... (Al Hijr: 15: 29)*** which consists of carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms, which actually comes out of the body of the deceased person.

Now, let's unveil the secret behind the verse: ***"Did We not make the earth (a place) to gather, (Al Mursalaat: 77: 25) the living and the dead? (Al Mursalaat: 77: 26)***

It turns out, ***"... my spirit... (Al Hijr: 15: 29)*** that comes out of the body of a person who has died, after 30 days or a month ***"... We made the earth (a place) gather, (Al Mursalaat: 77 : 25) the living and the dead (Al Mursalaat: 77:26)***

So, now it is revealed, that ***"... my spirit... (Al Hijr: 15: 29)*** which comes out of the body of a person who has died, after 30 days or a month ***"... gathers, (Al Mursalaat: 77: 25)*** in this ***"...earth...(Al Mursalaat: 77:25).***
