ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding how humans actually know that Allah is truly one, seen from the point of view of photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

Signs of the greatness of Allah SWT regarding how humans actually know that Allah really is one can be found in several verses, namely:

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"The angels and Gabriel ascended to God in a day the measure of which was fifty thousand years (Al Ma'aarij: 70:4)

"He is the First and the Last, the Outward and the Inward, and He is All-Knowing of all things. (Al Hadid: 57:3)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And Mary, the daughter of Imran, who kept her honor, so We breathed into her some of Our spirits, and she confirmed the words of her Lord and His Books, and she was one of the obedient ones. (At Tahrir: 66:12)

"Allah is the light of the heavens and the earth...Light upon light...(An Nuur: 24:35)

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when they ask Me, then let them fulfill (all My commands) and let them believe in - Me, that they may always be in the truth (Al Baqarah: 2: 186)

"... We are closer to him than his jugular vein, (Qaf: 50:16)

"He is Allah, Who created all that is on earth for you and He willed the heavens, then He made the seven heavens. And He is All-Knowing of all things. (Al Baqarah: 2:29)

"Say: "He is Allah, the One and Only (Al Ikhlaash: 112: 1)

"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)

In an effort to unveil the greatness of Allah SWT regarding how humans actually know that Allah is truly one, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose the hypothesis that Allah really is one with the creation of quarks which become the universe, seen from photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

BASED ON THE CREATION OF QUARK PROVE ALLAH IS THE ONE ALMIGHTY

Now, we are still concentrating on uncovering the secret behind the verse: *"He is the First...(Al Hadiid: 57:3) "...He is Allah, the One and Only (Al Ikhlash: 112: 1)*

Now the question arises

How can humans prove that Allah is the original and the Supreme?

The answer is

It is hidden in a secret hidden behind the verse: *"He is Allah, Who created all that is on earth for you and He willed the heavens, then He made seven heavens... (Al Baqarah: 2: 29)*

Well, it turns out that the universe and all its contents that now exist and humans live on earth, did not exist before.

So, the universe and everything in it that now exists, previously came from a single nucleus, which is called a quark.

Well, this core called quark is actually the basis and beginning of the creation of the universe and all that is in it.

Or in other words, Allah who made "... *the seven skys... (Al Baqarah: 2: 29)* , meaning the seven heavens which are now called the universe with its contents consisting of billions of galaxies, where each galaxy consists of billions of galaxies. -billions of stars, planets and moons.

Now, the question arises again,

How did Allah create quarks?

The answer is that Allah created quarks with Allah's energy.

When were these quarks created?

The answer is,

Quarks that form the basis of the building of the universe were created about 13 800 000 000 years ago according to human calculations. Meanwhile, according to Allah's calculation it was about 756 years ago, because according to Allah's reckoning 1 day is 50 000 years according to human calculations "...*a day whose content is fifty thousand years (Al Ma'aarij: 70: 4)*

Well, by creating quarks about 13 800 000 000 years ago according to human calculations or 756 years ago according to Allah's calculations, it proves that there is only one energy that provides energy for the creation of quarks, namely energy that comes from Allah.

So, now it is proven that it is indeed Allah "... *the First... (Al Hadiid: 57: 3)* who gives energy to be used for the creation of quarks. Where these quarks are the core of atoms and these atoms are the building blocks of the universe and all it includes humans.

Well, because "...*The Beginning...(Al Hadiid: 57:3)* is Allah who gives energy to be used to create quarks, and there is no other energy used to create quarks other than Allah's energy, then this Allah's energy is which is proof that there is only One Allah.

Or in other words "*He is the First ... (Al Hadiid: 57: 3)* "... *He is Allah, the One and Only (Al Iklash: 112: 1)*

ALLAH CANNOT BE COMBINED WITH OTHERS

Well, because "...The Beginning...(Al Hadiid: 57:3) is Allah who gives energy to be used to create quarks, then Allah cannot be equated with others.

From the very beginning, there was only one Allah who gave the energy to create quarks.

Quarks are created with Allah's energy, Allah's energy is throughout the universe including all that is in it, and Allah's energy will return to Allah.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: "*He is the First... (Al Hadiid: 57:3)* "...*He is Allah, the One and Only (Al Iklash: 112: 1)*

Now the question arises

How can humans prove that Allah is the original and the Supreme?
