ABSTRACT

Before I write down the problem of understanding how humans want to feel to meet Allah, I first ask forgiveness from Allah SWT. Here I try to open the veil that covers the secret of how humans want to feel to meet Allah, from the point of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about how humans want to feel meeting Allah, namely the verses:

"So when I have perfected the event and I have breathed into it My spirit; then you should fall down prostrating to it." (Shaad : 38:72)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and hearts you have little gratitude. (As Sajdah: 32: 9)

"... Allah knows what is before them and what is behind them, and they know nothing of Allah's knowledge except what He wills... (Al Baqarah: 2:255)

In an effort to open the veil of Allah's secret about how humans want to feel to meet Allah, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that humans want to experience meeting Allah, they must understand *"... my spirit... (Al Hijr: 15: 29)*, seen from the basic point of Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

As for if we want to know quarks, then we look at one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects.

Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

THE HUMAN BODY IS FILLED BY MY SPIRIT

Now, we are still concentrating on trying to uncover the secret hidden behind the verse: *"... Allah knows what is in front of them and what is behind them... (Al Baqarah: 2:255)*

Well, why *"...Allah knows what is before them and behind them...(Al Baqarah: 2:255) ?*

The answer is,

Hidden behind the secret that lies behind the verse: *"... I... have breathed into it my spirit... (Al Hijr: 15: 29)*

Apparently, Allah knows *"...what is in front of them and behind them...(Al Baqarah: 2:255)*, because Allah has *"...blowed into it my spirit... (Al Hijr: 15 :29)*

So, actually Allah with *"... my spirit... (Al Hijr: 15: 29)* knows what is *"... in front of them and behind them... (Al Baqarah: 2:255)*

Now, what exactly is *"... my spirit...(Al Hijr: 15: 29) ?*

The answer is,

"...my spirit...(Al Hijr: 15: 29) is a spirit that comes from Allah, which contains hydrogen atoms, nitrogen atoms, carbon atoms and oxygen atoms. Where these atoms are the source of raw materials for creating the universe and all its contents, including humans.

So, *"...my spirit...(Al Hijr: 15: 29)* is what fills the entire human body, because humans contain carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms in the form of Deoxyribonucleic acid (DNA), where humans is composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

HUMANS WANT TO FEEL MEET GOD, MUST UNDERSTAND MY SPIRIT

Now, actually humans to experience meeting Allah, must first understand my spirit, because my spirit is from Allah and is the source of life for the universe and everything in it, including humans.

Actually, Allah is very close and can be felt by humans, if humans understand my spirit. Without understanding my spirit, humans will not understand and cannot feel directly meeting Allah.

Even though Allah is *"...closer to him than his jugular vein, (Qaaf: 50:16)* , but if humans do not

understand about "... *my spirit...*(*Al Hijr: 15: 29*) then humans will not feel they meet directly with Allah, but humans feel far away, that Allah is far beyond human reach.

Because "... *my spirit...* (*Al Hijr: 15: 29*) is present throughout the human body, including in the human veins in which there is blood, then humans will actually know and meet Allah through the beating of the heart.

Here the secret is revealed behind the verse: "...*closer to him than the jugular vein, (Qaaf: 50: 16)*, namely the heartbeat is the pulse of "... *my spirit...* (*Al Hijr: 15: 29*) which Direct is a pulse that can be felt by humans how humans feel meeting directly with Allah.

This is, the secret, how humans actually want to meet Allah directly. But most people don't understand, because humans don't understand "... *my spirit...* (*Al Hijr: 15: 29*)

CONCLUSION

Based on the description above, we can conclude that the secret hidden behind the verse: "... *Allah knows what is in front of them and what is behind them...* (*Al Baqarah: 2:255*)

Well, why "...*Allah knows what is before them and behind them...*(*Al Baqarah: 2:255*) ?
