ABSTRACT

First of all, by asking forgiveness from Allah SWT here I try to reveal the signs of Allah SWT's greatness regarding Allah's secret about, how to prove Allah is one, the only one in the universe, from the point of view of photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid. (DNA)

Signs of the greatness of Allah SWT regarding the secret of Allah about how to prove Allah is one, the only one in the universe, namely the verses:

"So He made it seven heavens in two days. He revealed in each sky its affairs. And We adorn the near sky with bright stars and We take care of it as well as possible. Such is the provision of the Mighty, All-Knowing. (Fushshilat :41:12)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and hearts; you are very little grateful. (As Sajdah: 32: 9)

"He is Allah, Who created all that is on earth for you and He willed (created) the skys, then He made seven skys. And He is All-Knowing of all things "(Al Baqarah: 2:29)

"Indeed, the creation of the skys and the earth is greater than the creation of man, but most people do not know. (Al Mu'min: 40: 57)

"And why do they not think about themselves? Allah did not make the skys and the earth and what is between them except with the truth and the appointed time. And indeed most of the people really deny meeting their Lord. (Ar Ruum: 30:8)

In an effort to unveil the greatness of Allah SWT regarding Allah's secret about how to prove Allah is one, the only one in the universe, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose the hypothesis that Allah is one, the only one in the universe, because the source of the universe is Allah's energy, which makes quarks, these quarks are the core of all atoms in the universe, when viewed from photons, quarks and the molecular structure of acids. nucleic acid or deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms which is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

THE HUMAN BODY IS A REPRESENTING EVIDENCE, ALLAH IS ONE, THE ONLY ONE IN THE UNIVERSE

Now, we are still trying to focus our minds to reveal the secrets that are stored in the verse: "*And why do they not think about themselves?... (Ar Ruum: 30: 8)*"

Why does Allah ask people "*...why don't they think about themselves?... (Ar Ruum: 30:8)?*"

The answer is

Hidden in the secret behind the verse: "*...He perfected and breathed into it His spirit and He made for you hearing, sight and hearts; you are very little grateful. (As Sajdah: 32: 9)*"

Apparently, in the human body is evidence that can reveal that Allah is One.

What is there in the human body, which can be considered as evidence that Allah is One?

The answer is

In the human body there is stored "*... His spirit... (As Sajdah: 32: 9)*" or "*... My spirit... (Al Hizr: 15: 29)*" which is the source of the formation of "*...hearing, sight and heart ... (As Sajdah: 32: 9)*"

Or in other words, in the human body there is Deoxyribonucleic acid (DNA) which describes humans as consisting of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

It turns out that the human body contains 7 000 000 000 000 000 000 000 000 000 atoms.

Now, the source of the nucleus of these atoms is the quark. Where these quarks are formed by energy that comes from Allah. Or in other words, Allah's energy gives birth to quarks which are the source of life "*... His spirit... (As Sajdah: 32: 9)*" or "*... My spirit... (Al Hizr: 15: 29)*"

Likewise in a universe containing billions of galaxies, each galaxy contains billions of stars and

planets, which contain hydrogen atoms, carbon atoms, oxygen atoms, nitrogen atoms. Of all the atoms the nucleus is a quark.

So, from the human body to the universe containing billions of galaxies, the core is quarks. Where this quark is the source of *"... His spirit... (As Sajdah: 32: 9)* or *"... My spirit... (Al Hijr: 15: 29)*

Or in other words, Allah who has the Allah energy that makes quarks, is the only one in the universe. There is no other Allah, or no other quark, apart from the quark born by the energy of Allah.

So, now the secret is revealed in the verse: *"...why don't they think about themselves? Allah did not make the skys and the earth and what is between them except with the truth and the appointed time...(Ar Ruum: 30:8)*

That is, the core of all the atoms that exist in the human body and in the universe are quarks born of Allah's energy.

Allah energy quark, Allah quark energy.

This is what proves Allah is One, the only one in the universe.

CONCLUSION

From what has been described above we can now conclude that the secrets that are stored in the verse: *"And why do they not think about themselves?...(Ar Ruum: 30: 8)*

Why does Allah ask people *"...why don't they think about themselves?...(Ar Ruum: 30:8)?*

The answer is

Hidden in the secret behind the verse: *"...He perfected and breathed into it His spirit and He made for you hearing, sight and hearts; you are very little grateful. (As Sajdah: 32: 9)*

Allah energy quark, Allah quark energy.

This is what proves Allah is One, the only one in the universe.
