ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding, how in fact, Allah is far away, but Allah is closer than the jugular vein, seen from the point of view of photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (deoxyribonucleic acid). DNA)

The signs of Allah's greatness regarding Allah's secret about how it really is, Allah is far away, but Allah is closer than the jugular vein, namely in the verses:

"The angels and Gabriel ascended to God in a day the measure of which was fifty thousand years (Al Ma'aarij: 70: 4)

"... We made the apostle an angel, ... he was a man ... (Al An'aam: 6: 9)

"Who has created the seven heavens in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look over and over again, do you see anything that is not balanced? (Al Mulk: 67: 3)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein (Qaf: 50:16)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

In an effort to unmask the greatness of Allah SWT regarding, how truly, Allah is far away, but Allah is closer than the jugular vein, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I put forward the hypothesis that Allah is far away, but Allah is closer than the jugular vein, because *"... my spirit... (Al Hijr: 15: 29)* exists throughout the universe, seen from photons, quarks and the molecular structure of nucleic acids. or deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms,

2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

ALLAH IS AWAY, BUT ALLAH IS CLOSER THAN HUMAN'S JUGULAR VEIN

Now, we are still focusing our minds on uncovering the secret hidden behind the verse: *"The angels and Gabriel ascended to Allah in a day whose level is fifty thousand years (Al Ma'aarij: 70: 4)*

Apparently, if we calculate according to the speed of light, one day according to Allah's speed of light is equal to 50 000 light years according to human calculations.

The speed of light is 299 792.458 kilometers per second.

Now, where exactly, Allah is, if you use the calculation of 50 000 light years according to human calculations?

The answer is,

Allah is 50 000 light years from earth. The distance between Earth and the center of the Milky Way galaxy is 25 000 light years. That means, Allah is in a place that is 25 000 light years from the center of the Milky Way galaxy.

So, the center of the Milky Way galaxy is between the earth and the place where Allah is.

Now, the question is,

Why is Allah closer than the jugular vein of man, when Allah is in a place 50 000 light years from the earth?

The answer is

Hidden in the secret behind the verse: *"... I... have blown into it my spirit... (Al Hijr: 15: 29)*

It turns out, *"... my spirit... (Al Hijr: 15: 29)* contains carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms, which are present throughout the universe, including in the human body.

So, actually, Allah is where *"... my spirit... (Al Hijr: 15: 29)* is.

Because *"... my spirit... (Al Hijr: 15: 29)* is in one place which is 50 000 light years from the earth, then *"Angels and Gabriel... (Al Ma'aarij: 70: 4)* directs the light frequency waves towards the place where *"...my spirit... (Al Hijr: 15: 29)* is located.

Because, "...*angel...a man...*(*Al An'aam: 6:9*) then, angels cannot fly, but angels use their light frequency waves to meet and talk with Allah.

Likewise, Allah "... *is nearer to him than his jugular vein (Qaaf: 50:16)*

It means, "... *my spirit...* (*Al Hijr: 15: 29*) is in the human body.

So, wherever it is directed, the view of the human eye and the frequency waves of light directed by angels, then there is "... *my spirit...* (*Al Hijr: 15: 29*)

Or in other words, Allah is everywhere, in this universe.

Now, it has been revealed, the secret that is hidden behind the verses: "*the angels and Gabriel ascend to God in a day whose level is fifty thousand years (Al Ma'aarij: 70: 4) "... We are closer to him than the jugular vein (Qaf: 50:16)*

That is, wherever it is directed, the view of the human eye and the frequency waves of light directed by angels, then there is "... *my spirit...* (*Al Hijr: 15: 29*) Allah is everywhere, in this universe.

CONCLUSION

From what has been described above we can now conclude that the verse: "*The angels and Gabriel ascended to Allah in a day whose level is fifty thousand years (Al Ma'aarij: 70: 4)*

Apparently, if we calculate according to the speed of light, one day according to Allah's speed of light is equal to 50 000 light years according to human calculations.

So, the center of the Milky Way galaxy is between the earth and the place where Allah is.

Now, the question is,
