## ABSTRACT

Before the author writes about human do not die, but live through Allah's spirit until the age of a billion billion billion billion years, until the universe disappears and returns to Allah's energy, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret about human do not die, but live through Allah's spirit until the age of a billion billion billion billion years, until the universe disappears and returns to Allah's energy, based on Deoxyribonucleic acid (DNA).

There are several verses that reveal the secret of Allah about human do not die, but live through Allah's spirit until the age of a billion billion billion billion years, until the universe disappears and returns to Allah's energy, namely the following verses:

*"So when Allah has perfected the events of Adam, and has breathed into Adam Allah's spirit, then you bow down to him by prostrating (Al Hijr: 15: 29).*

*"Then Allah perfected and breathed into Adam Allah's spirit and Allah made for you hearing, sight and heart, you are very little grateful. (As Sajdah: 32: 9).*

*"And there is no life in this world, apart from playing and joking. And really afterlife village is better for those who are pious. So don't you understand it? (Al An'aam: 6: 32).*

*"Do not think that those who are killed in the way of Allah are dead, they are alive with their God with sustenance. (Ali 'Imran: 3: 169).*

In an effort to open the veil of Allah's secret about human do not die, but live through Allah's spirit until the age of a billion billion billion billion years, until the universe disappears and returns to Allah's energy, the author uses the basis of deoxyribonucleic acid.

## HYPOTHESIS

Here the author proposes hypothesis human do not die, but live through Allah's spirit until the age of a billion billion billion billion years, until the universe disappears and returns to Allah's energy, based on Deoxyribonucleic acid (DNA)

## PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interaction.

## QUARK

If we want to know about quarks, then we have to look at one of the hydrogen atoms, which is the building element of the human body, animals, plants and fruits, as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if this

proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

## **DEOXYRIBONUCLEATED ACID (DNA)**

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 atom of phosphorus, 4 atoms of oxygen and 2 atoms of hydrogen. A 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on Deoxyribonucleic acid (DNA) humans are composed of 32.20 % atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere.

## **HUMAN DO NOT DIE, BUT LIVE THROUGH ALLAH'S SPIRIT UNTIL THE AGE OF A BILLION BILLION BILLION BILLION BILLION YEARS, UNTIL THE UNIVERSE DISAPPEARS AND RETURNS TO ALLAH'S ENERGY**

Now, we are still concentrating on dismantling the secrets contained behind the verses: *"Do not think that those who are killed in the way of Allah are dead, they are alive with their God with sustenance. (Ali 'Imran: 3: 169)"...Allah...breathed into Adam Allah's spirit...(Al Hijr : 15: 29).*

Apparently, Allah has declared *"Do not think that those who are killed in the way of Allah are dead, they are alive with their God... (Ali 'Imran: 3: 169).*

Well, it turns out, clearly Allah has revealed to all humans including all Muslims in the world, that in fact humans *"... do not die... they live... (Ali 'Imran: 3: 169).*

Now the question arises,

Why did Allah declare that human *"... do not die... they live... (Ali 'Imran: 3: 169)?*

Well, the answer is in the secret behind the verse: *"...Allah...breathed into Adam Allah's spirit...(Al Hijr : 15: 29).*

Then, another question arises,

Why did *"...Allah...breathed into Adam Allah's spirit...(Al Hijr : 15: 29),* whereas *"...those who are killed in the way of Allah...they are alive...(Ali 'Imran : 3: 3: 169) ?*

The answer is in the secret behind the verse: *"...Allah...breathed into Adam Allah's spirit and Allah made for you hearing, sight and heart...(As Sajdah : 32: 9).*

Well, it turns out, *"...Allah made for you hearing, sight and heart ...(As Sajdah: 32: 9)* sourced from *"...Allah's spirit...(Al Hijr : 15: 29).*

Or in other words, "...Allah made for you hearing, sight and heart...(As Sajdah: 32: 9) sourced from Deoxyribonucleic acid (DNA). Human DNA is composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

So, "...Allah's spirit...(Al Hijr : 15: 29) is made up of carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms.

Where carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms are in every human body.

So actually, "...Allah...(not only) breathed into Adam Allah's spirit...(As Sajdah : 32: 9) but also, "...Allah...breathes into every human being Allah's spirit...(As Sajdah : 32: 9)

Well, because carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms will live until they reach the age of **10 00000000 00000000 00000000 00000000 00000000 00000000 00000000 00000000 00000000 00000000** years

Or it could also be said, "...Allah's spirit...(Al Hijr: 15: 29) which is built with carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms will live until it reaches the age of **10 00000000 00000000 00000000 00000000 00000000 00000000 00000000 00000000 00000000 00000000** years.

Now, since the human body is made up of **7 00000000 00000000 00000000** atoms, then what is called the human body is a building of atoms, hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms and other atoms that make up bones and flesh.

So, when the bones and flesh that make up the human body no longer function, then **7 00000000 00000000 00000000** atoms including "...Allah's spirit...(Al Hijr: 15: 29) that is in the human body comes out of the human body.

This is the secret declared by Allah, humans "... do not die...they live...(Ali 'Imran : 3: 169).

Now, because human do not die, it is necessary "...afterlife village...(Al An'aam: 6: 32).

It means, "...afterlife village...(Al An'aam: 6: 32) is a place where all "...Allah's spirit...(Al Hijr: 15: 29) comes out of the human body which it doesn't work anymore.

Where "...afterlife village...(Al An'aam: 6: 32) is in the body of a human who is still alive on earth.

This means that in our bodies live the spirits of our ancestors who lived hundreds of thousands of years ago through Allah's spirit in the form of YDNA from the father's side and mitochondrial DNA from the mother's side.

So, when Allah declares in "...afterlife village...(Al An'aam: 6: 32) there is "...paradise with rivers flowing in it... (Al Baqarah: 2:25) refers to the spirits of our ancestors who lived hundreds of thousands of years ago through Allah's spirit in the form of YDNA from the father's side and mitochondrial DNA from the mother's side that are in our bodies, where we live on earth where there are "...rivers... (Al Baqarah: 2:25).

Also because "...paradise...(Al Baqarah: 2:25) is on earth and in our bodies, then through our bodies the spirits of our ancestors who lived hundreds of thousands of years ago through Allah's spirit in the form of YDNA from the father and mitochondrial DNA from the mother feel "...paradise with rivers flowing in it...(Al Baqarah: 2:25).

Or it could also be said, “*...Allah's spirit...(Al Hijr: 15: 29)* which is built with carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms will live until it reaches the age of **10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000** years.

Now, since the human body is made up of **7 000000000 000000000 000000000** atoms, then what is called the human body is a building of atoms, hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms and other atoms that make up bones and flesh.

So, when the bones and flesh that make up the human body no longer function, then **7 000000000 000000000 000000000** atoms including “*...Allah's spirit...(Al Hijr: 15: 29)* that is in the human body comes out of the human body.

This is the secret declared by Allah, humans “*... do not die...they live...(Ali 'Imran : 3: 169)*).

Now, because human do not die, it is necessary “*...afterlife village...(Al An'aam: 6: 32)*).

It means, “*...afterlife village...(Al An'aam: 6: 32)* is a place where all “*...Allah's spirit...(Al Hijr: 15: 29)* comes out of the human body which it doesn't work anymore.

Where “*...afterlife village...(Al An'aam: 6: 32)* is in the body of a human who is still alive on earth.

This means that in our bodies live the spirits of our ancestors who lived hundreds of thousands of years ago through Allah's spirit in the form of YDNA from the father's side and mitochondrial DNA from the mother's side.

So, when Allah declares in “*...afterlife village...(Al An'aam: 6: 32)* there is “*...paradise with rivers flowing in it... (Al Baqarah: 2:25)* refers to the spirits of our ancestors who lived hundreds of thousands of years ago through Allah's spirit in the form of YDNA from the father's side and mitochondrial DNA from the mother's side that are in our bodies, where we live on earth where there are “*...rivers... (Al Baqarah: 2:25)*).

Also because “*...paradise...(Al Baqarah: 2:25)* is on earth and in our bodies, then through our bodies the spirits of our ancestors who lived hundreds of thousands of years ago through Allah's spirit in the form of YDNA from the father and mitochondrial DNA from the mother feel “*...paradise with rivers flowing in it...(Al Baqarah: 2:25)*).

So, what we feel on earth, will also be felt by the spirits of our ancestors who lived hundreds of thousands of years ago through Allah's spirit in the form of YDNA from the father and mitochondrial DNA from the mother that are in our bodies.

Now this is the great secret of Allah, where in fact humans “*... do not die...they live... (Ali 'Imran: 3: 169)*).
