ABSTRACT

Before the author writes about human have existed since the stars were created, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil covering secrets about human have existed since the stars were created, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secrets about human have existed since the stars were created, namely the following verses:

"So when I have perfected the life of Adam and breathed into Adam my spirit, then you will fall down and prostrate to him." (Shaad: 38: 72)

"And indeed We have created human from dry soil from black mud which was given shape. (Al Hijr: 15: 26)

"Then He perfected Adam's body and breathed into Adam His spirit and He made for you hearing, sight and heart, you're a handful, be thankful. (As Sajdah : 32: 9)

In an effort to uncover Allah's secrets about human have existed since the stars were created, the author uses Deoxyribonucleic acid (DNA)

HYPOTHESIS

Here the author proposes hypothesis human have existed since the stars were created, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARKS

If we want to know quarks then we pay attention to one of the hydrogen atoms which is a building element of the human body, animals, plants and fruit as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules which are composed repeatedly of nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere.

HUMANS HAVE BEEN THERE SINCE THE STARS WERE CREATED

So now, we are still concentrating our minds on uncovering the secrets contained behind the verses: *"...We have created human from dry soil from black mud that was given shape. (Al Hijr : 15: 26) "...I breathed into Adam my spirit...(Shaad : 38: 72).*

Well, here Allah has declared *"...We have created human from dry soil from black mud that was given shape. (Al Hijr : 15: 26).*

So now, the question is,

What does Allah actually mean by *"...dry soil from black mud...(Al Hijr: 15: 26)?*

Well, the answer is in the secret behind the verse: *"...I breathed into Adam my spirit...(Shaad : 38: 72).*

This means, *"...dry soil from black mud...(Al Hijr: 15: 26)* is *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit... (Shaad : 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms, where hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms are formed with quarks, quarks are formed with Allah's energy.

Well, it turns out that *"...soil...(Al Hijr: 15: 26)* contains hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which are formed with quarks, quarks are formed with Allah's energy.

So, because humans were created from *"...soil...(Al Hijr: 15: 26)* which contains hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms, then in fact, before humans were born on earth, humans already existed from since the stars were created. Why ?

Because stars are built with Allah's spirit. This means that stars are built with hydrogen atoms. Where hydrogen atoms are the fuel of stars.

Well, stars shine, because hydrogen atoms collide with each other to form new atoms called helium atoms.

So, when hydrogen atoms collide with each other, they create energy, where the energy in the form of light is carried by photons everywhere, including to the earth.

Or you could say, the sun was created with hydrogen atoms, where hydrogen atoms are the sun's fuel, when hydrogen atoms collide with other hydrogen atoms, energy is generated in the form of light, where the light is carried by photons to the earth, then human on earth feel the heat of the sun's rays.

So, in fact, hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms to create human have existed since the stars or the sun were created.

Or in other words, before human existed on earth, there have been human since the stars or the sun were created.

Well, this is something that almost all people on earth, including almost all Muslims in the world, do not understand.

So now, if there is human who say that human existed after human is born on earth, then that human assumption is the assumption of human who do not understand that human was created from **"...soil...(Al Hijr: 15: 26).**

Or in other words, if there is human who say that human existed after human was born on earth, then that human assumption is the assumption of human who do not understand that human is built with **7000000000 000000000 000000000** atoms including hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms.

CONCLUSION

Based on the description above we can conclude that the secrets contained behind the verses: **"...We have created human from dry soil from black mud that was given shape. (Al Hijr : 15: 26) "...I breathed into Adam my spirit...(Shaad : 38: 72).**
