ABSTRACT

Before the author writes about is it true that Adam was created from one cell, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil covering the secret of is it true that Adam was created from one cell, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about is it true that Adam was created from one cell, namely the following verses:

"He created you from one self and from him He created his wife, so that he would be pleased with her...(Al A'raaf: 7:189)

"And indeed We created human from the essence of the earth. (Al Mu'minuun: 23: 12)

"So when I have perfected the life of Adam and breathed into Adam my spirit, then you will fall down and prostrate to him." (Shaad: 38: 72)

"Then He perfected the body and breathed into Adam His spirit and He made for you hearing, sight and heart, you are very few, grateful. (As Sajdah: 32: 9)

"Who has created the seven skys in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look again and again, do you see anything that is not balanced? (Al Mulk: 67: 3)

In an effort to uncover Allah's secret about is it true that Adam was created from one cell, the author uses the basis of deoxyribonucleic acid.

HYPOTHESIS

Here the author puts forward the hypothesis is it true that Adam was created from one cell, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARKS

If we want to know quarks then we pay attention to one of the hydrogen atoms which is a building element of the human body, animals, plants and fruit as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules which are composed repeatedly of nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere.

IS IT TRUE THAT ADAM WAS CREATED FROM ONE CELL

So now, we still continue to focus our minds on uncovering the secret contained behind the verses: *"He created you from one self...(Al A'raaf: 7:189)"... We created human from the essence of the earth (Al Mu'minuun: 23: 12)*

Well, it turns out here, Allah or YHWH has revealed the true secret about how Adam was created with the declaration *"He created you from one self...(Al A'raaf: 7:189)*

Well, now, the question arises,

What does Allah or YHWH actually mean by *"...one self...(Al A'raaf: 7:189)?*

Apparently, the secret of *"...one self...(Al A'raaf: 7:189)* is in the secret behind the verse: *"...He perfected the body and breathed into Adam His spirit and He made for you hearing, sight and heart...(As Sajdah: 32: 9)*

So it turns out, *"...His spirit...(As Sajdah: 32: 9)* or *"...Allah's spirit...(As Sajdah: 32: 9)* or the spirit of YHWH is Deoxyribonucleic acid (DNA) which is the source of *"...hearing, sight and heart...(As Sajdah: 32: 9)*

So, actually, what Allah or YHWH means by *"...one self...(Al A'raaf: 7:189)* is Deoxyribonucleic acid (DNA) which contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms .

Or in other words, Adam's creation from *"...one self...(Al A'raaf: 7:189)* is from hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Where the creation of Adam is the same as the creation of *"...seven skys...(Al Muluk: 67: 3)* which was initially from quarks, then from hydrogen atoms, until it became *"...seven skys...(Al Muluk: 67 : 3)* like now.

So, the creation of Adam and his wife was a chain of creation *"...seven skys...(Al Muluk: 67 : 3)* which continues to this day.

So, now to look for traces of human creation from this *"...one self...(Al A'raaf: 7:189)*, we can use the

genetic code contained in the molecular structure of nucleic acid or DNA (Deoxyribonucleic acid) and through RNA (Ribonucleic acid) which has a role in synthesizing proteins and carrying out catalytic activities.

This genetic code is used by almost all types of living organisms, from archaea, bacteria, plants, amoebas, fungi, animals to humans today. Because the genetic code is universal, the same genetic code applies to all types of living organisms. With this similarity in genetic code, we can say that humans living today have similarities in their genetic code with all other types of living organisms.

In other words, humans, including Adam and his wife, have a family relationship with all types of living organisms, from archaea, bacteria, plants, amoeba, fungi to animals.

Living organisms that first appeared on earth several billion years ago passed on their characteristics to their descendants. Examples of this genetic code or codon include CAA and CAG which are amino acids or glutamine amino acids.

The existence of familial relationships between humans and all other types of living organisms proves the secret truth of Allah which is behind the verse *"He created you from one self...(Al A'raaf: 7:189)*. Where Allah created human from self one, meaning from the beginning a type of living organism that only had one cell.

This is empirical evidence of how Adam was created in paradise, which most people in the world still do not understand.

CONCLUSION

Based on the description above we can conclude that the secret contained behind the verses: *"He created you from one self...(Al A'raaf: 7:189)"... We created human from the essence of the earth (Al Mu'minuun: 23: 12)*

Well, it turns out here, Allah or YHWH has revealed the true secret about how Adam was created with the declaration *"He created you from one self...(Al A'raaf: 7:189)*

Well, now, the question arises,

What does Allah or YHWH actually mean by *"...one self...(Al A'raaf: 7:189)?*

Apparently, the secret of *"...one self...(Al A'raaf: 7:189)* is in the secret behind the verse: *"...He perfected the body and breathed into Adam His spirit and He made for you hearing, sight and heart...(As Sajdah: 32: 9)*

So it turns out, *"...His spirit...(As Sajdah: 32: 9)* or *"...Allah's spirit...(As Sajdah: 32: 9)* or the spirit of YHWH is Deoxyribonucleic acid (DNA) which is the source of *"...hearing, sight and heart...(As Sajdah: 32: 9)*

So, actually, what Allah or YHWH means by *"...one self...(Al A'raaf: 7:189)* is Deoxyribonucleic acid (DNA) which contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms .

Or in other words, Adam's creation from *"...one self...(Al A'raaf: 7:189)* is from hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Where the creation of Adam is the same as the creation of *"...seven skys...(Al Mulk: 67: 3)* which was initially from quarks, then from hydrogen atoms, until it became *"...seven skys...(Al Mulk: 67 : 3)* like

now.

So, the creation of Adam and his wife was a chain of creation "...seven skys...(Al Mulk: 67 : 3) which continues to this day.

So, now to look for traces of human creation from this "...one self...(Al A'raaf: 7:189), we can use the genetic code contained in the molecular structure of nucleic acid or DNA (Deoxyribonucleic acid) and through RNA (Ribonucleic acid) which has a role in synthesizing proteins and carrying out catalytic activities.

This genetic code is used by almost all types of living organisms, from archaea, bacteria, plants, amoebas, fungi, animals to humans today. Because the genetic code is universal, the same genetic code applies to all types of living organisms. With this similarity in genetic code, we can say that humans living today have similarities in their genetic code with all other types of living organisms.

In other words, humans, including Adam and his wife, have a family relationship with all types of living organisms, from archaea, bacteria, plants, amoeba, fungi to animals.

Living organisms that first appeared on earth several billion years ago passed on their characteristics to their descendants. Examples of this genetic code or codon include CAA and CAG which are amino acids or glutamine amino acids.

The existence of familial relationships between humans and all other types of living organisms proves the secret truth of Allah which is behind the verse "**He created you from one self...(Al A'raaf: 7:189)**. Where Allah created human from self one, meaning from the beginning a type of living organism that only had one cell.

This is empirical evidence of how Adam was created in paradise, which most people in the world still do not understand.
