## ABSTRACT

Before the author writes about is it true that Allah's spirit in paradise and hell weighs 1.775 grams, first ask forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of is it true that Allah's spirit in paradise and hell weighs 1.775 grams, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about is it true that Allah's spirit in paradise and hell weighs 1.775 grams, namely the following verses:

*"And indeed We created human from a quintessence of clay. (Al Mu'minuun: 23: 12).*

*"Then when I had perfected the creation of Adam and breathed into Adam of My spirit, you would have fallen prostrate to him." (Shaad: 38: 72).*

*"So when I have perfected the existence of Adam and have breathed into Adam my spirit, then you will submit to him by prostrating (Al Hijr: 15: 29). "Then He perfected and breathed into Adam his spirit and He made for you hearing, sight and heart, you are very few, grateful. (As Sajdah: 32: 9).*

In an effort to uncover Allah's secret about is it true that Allah's spirit in paradise and hell weighs 1.775 grams, the author uses the basis of deoxyribonucleic acid.

## HYPOTHESIS

Here the author proposes hypothesis is it true that Allah's spirit in paradise and hell weighs 1.775 grams, based on Deoxyribonucleic acid (DNA)

## PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interaction.

## QUARK

If we want to know about quarks, then we have to look at one of the hydrogen atoms, which is the building block of the human body, animals, plants and fruits, as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

## DEOXYRIBONUCLATED ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The

nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 atom of phosphorus, 4 atoms of oxygen and 2 atoms of hydrogen. A 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on Deoxyribonucleic acid (DNA) humans are composed of 32.20 % atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere.

## **IS IT TRUE THAT ALLAH'S SPIRIT IN PARADISE AND HELL WEIGHS 1,775 GRAMS**

Now, we are still concentrating on uncovering the secrets contained behind the verses: *"...We have created human from the essence of the soil(Al Mu'minuun: 23: 12)"... He...breathed into Adam His spirit and He made for you hearing, sight and hearts... (As Sajdah: 32: 9).*

Well, this is Allah's declaration about *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* which *"...is breathed into Adam... (Shaad : 38: 72)*

Now the question arises,

How is it Allah *"...breathed into Adam Allah's spirit...(As Sajdah : 32: 9) ?*

The answer is *"... He made for you hearing, sight and heart ... (As Sajdah: 32: 9).*

Well, here, the key that is given to all people in the world, to unlock the secret of Allah, actually, how Allah *"...breathed into Adam Allah's spirit...(As Sajdah : 32: 9).*

What is the key given by Allah to all people in the world?

The answer is Allah *"...made for you hearing, sight and heart ... (As Sajdah: 32: 9).*

So, what is the source of Allah *"...made for you hearing, sight and heart ... (As Sajdah: 32: 9)* is Deoxyribonucleic acid (DNA). Where human DNA is composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

So, actually, the declaration of Allah *"...breathed into Adam Allah's spirit...(As Sajdah : 32: 9)* refers to *"... He made for you hearing, sight and heart ... (As Sajdah: 32: 9).*

Or in other words, the declaration of Allah *"...breathed into Adam Allah's spirit...(As Sajdah : 32: 9)* refers to Deoxyribonucleic acid (DNA) which is in the human body, animals, plants, fungi, amoebas, bacteria and things that are in *"...seven skys...(Al Mulk : 67: 3).*

So, actually, when human were still in the form of a fetus, in the womb *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* already exists in Deoxyribonucleic acid (DNA) in the sperm from the father's side and in the egg from the mother's side.

Or in other words, *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* already exists in Deoxyribonucleic acid (DNA) in the sperm of Adam and in the egg from Adam's wife.

Where Deoxyribonucleic acid (DNA) is in the chromosomes in the cell. When a cell divides, the chromosomes, which contain DNA, also divide.

Or in other words, when a cell divides, its chromosomes and DNA make copies of it.

So, each cell has the same chromosome and DNA.

So, in the human brain, which has **65 000 000 000** nerve cells, each nerve cell has the same chromosomes and DNA.

Well, this is actually what is meant by "*...my spirit...(Shaad : 38: 72)* or "*...Allah's spirit...(Shaad : 38: 72)* which "*...is breathed into Adam...(As Sajdah : 32: 9)* by Allah.

Or in other words, "*...my spirit...(Shaad : 38: 72)* or "*...Allah's spirit...(Shaad : 38: 72)* is already Deoxyribonucleic acid (DNA) which is in the sperm of the father's side and what is in the egg from the mother.

So, in fact, when a cell divides and the chromosomes as well as Deoxyribonucleic acid (DNA) in the cell also divide by making copies of the same, the Deoxyribonucleic acid (DNA) in the form of copies is getting bigger and heavier.

Or in other words, the weight of "*...my spirit...(Shaad : 38: 72)* or "*...Allah's spirit...(Shaad : 38: 72)* that "*...is breathed into human...(Shaad: 38: 72)* in the human brain reaches **1.755** grams. Where the weight of **1** nerve cell = **0.000000000027** grams. So **65 000 000 000** nerve cells in the human brain weigh **65 x 0.027** grams = **1,755** grams.

Now, when "*...my spirit...(Shaad : 38: 72)* or "*...Allah's spirit...(Shaad : 38: 72)* that comes out of the body of a deceased human, it reaches a weight of **1.755** grams.

This is Allah's secret, which is still not understood by almost all humans in the world including all Muslims in the world.

## CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the secrets contained behind the verses: "*...We have created human from the essence of the soil(Al Mu'minuun: 23: 12)*" "*... He...breathed into Adam His spirit and He made for you hearing, sight and hearts... (As Sajdah: 32: 9)*.

Well, this is Allah's declaration about "*...my spirit...(Shaad : 38: 72)* or "*...Allah's spirit...(Shaad : 38: 72)* which "*...is breathed into Adam... (Shaad : 38: 72)*

Now the question arises,

How is it Allah "*...breathed into Adam Allah's spirit...(As Sajdah : 32: 9)* ?

The answer is "*... He made for you hearing, sight and heart ... (As Sajdah: 32: 9)*.

Well, here, the key that is given to all people in the world, to unlock the secret of Allah, actually, how Allah "*...breathed into Adam Allah's spirit...(As Sajdah : 32: 9)*.

What is the key given by Allah to all people in the world?

The answer is Allah *"...made for you hearing, sight and heart ... (As Sajdah: 32: 9).*

So, what is the source of Allah *"...made for you hearing, sight and heart ... (As Sajdah: 32: 9)* is Deoxyribonucleic acid (DNA). Where human DNA is composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

So, actually, when human were still in the form of a fetus, in the womb *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* already exists in Deoxyribonucleic acid (DNA) in the sperm from the father's side and in the egg from the mother's side.
