ABSTRACT

Before the author writes about is it true that humans are from dead stars that have run out of the fuel of Allah's spirit, the hydrogen atom, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret about is it true that humans are from dead stars that have run out of the fuel of Allah's spirit, the hydrogen atom, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about is it true that humans are from dead stars that have run out of the fuel of Allah's spirit, the hydrogen atom, namely the following verses:

"So when I have perfected the event of Adam and have breathed into Adam my spirit, then you should fall down prostrating to him." (Shaad: 38: 72)

"O mankind, if you are in doubt about the resurrection, then indeed We have created you from soil, then from a drop of semen, then from a clot of blood, then from a lump of flesh which is perfect and imperfect, so that We may explain it to you and determine in the womb, what We will until a predetermined time, then We bring you out as babies, then you come to maturity, and some of you are passed away and some of you have extended their life to senility, so that he will no longer know anything that he knew before. And you see the earth is dry, then when We send down water on it, the earth lives and is fertile and grows all kinds of beautiful plants (Al Hajj: 22: 5)

In an effort to unmask Allah's secret about is it true that humans are from dead stars that have run out of the fuel of Allah's spirit, the hydrogen atom, I use a base of deoxyribonucleic acid.

HYPOTHESIS

Here the author puts forward hypothesis is it true that humans are from dead stars that have run out of the fuel of Allah's spirit, the hydrogen atom, based on Deoxyribonucleic acid (DNA).

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms, and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are abundant around us and in the atmosphere.

IS IT TRUE THAT HUMANS ARE FROM DEAD STARS THAT HAVE RUN OUT OF THE FUEL OF ALLAH'S SPIRIT, THE HYDROGEN ATOM

Now, we are still concentrating on uncovering the secret contained behind the verse: *"...We created you from soil... (Al Hajj: 22: 5).*

It turns out that here Allah has explained to humans that humans were created *"...from soil...(Al Hajj: 22: 5).*

Now, the question arises,

What is actually in *"...soil...(Al Hajj: 22: 5)?*

The answer is,

It is hidden in the secret behind the verse: *"... you see the earth is dry, then when We send down water on it, the earth lives and is fertile and grows all kinds of beautiful plants (Al Hajj: 22: 5).*

Well, it turns out that after the earth gets water, which is a combination of oxygen atoms and hydrogen atoms, then meets the nitrogen atoms and carbon atoms in the earth, then *"...the earth lives and is fertile...(Al Hajj: 22: 5).*

So, actually, humans were created from soil because soil contains hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms. The human body is built with **7000000000 000000000 000000000** atoms, including hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

Or in other words *"...I have perfected the event of Adam and have breathed into Adam my spirit... (Shaad: 38: 72)* where *"...My spirit... (Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* is built by hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms that are in the soil or that are on our earth.

Furthermore, the stars and the sun shine because there are hydrogen atoms as fuel for the stars and the sun.

Now, without hydrogen atoms, there would be no stars and the sun. The stars and the sun shine

because there are hydrogen atoms as fuel for the stars and the sun.

If the stars and the sun run out of hydrogen atoms, then the stars and the sun will die.

Now, when the stars run out of hydrogen atom fuel, and the stars are bigger than the sun, then the stars will die by exploding.

When a star explodes, energy comes out in the form of various rays of light, looking like an explosion and spit of fire.

Now, the explosion and spit of fire that comes out of this dead star is considered by some people as a symbol that when a dead person dies, fire must be emitted, which is done by burning the body.

Now, because the human body is built by oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms, when a dead person is burned, carbon dioxide quickly comes out of the body of the corpse.

Or in other words, with the corpse burned, then "*...My spirit... (Shaad: 38: 72)* or "*...Allah's spirit... (Shaad: 38: 72)* which is built by hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms quickly comes out of the body of the burned corpse.

Now, if a person dies and is buried on earth, then "*...My spirit... (Shaad: 38: 72)* or "*...Allah's spirit... (Shaad: 38: 72)* comes out of the body of the corpse after 30 days.

Well, because "*...My spirit... (Shaad: 38: 72)* or "*...Allah's spirit... (Shaad: 38: 72)* which is built by oxygen atoms, hydrogen atoms, carbon atoms and nitrogen atoms is burned, then "*...My spirit... (Shaad: 38: 72)* or "*...Allah's spirit... (Shaad: 38: 72)* quickly comes out of the body of the burned corpse.

If there are no trees, plants and flowers around the crematorium, then the carbon dioxide that comes out of the body of the crematorium will not be absorbed by anyone. So that carbon dioxide will pollute the environment and damage the ozone.

Now, if there are trees, plants and flowers around the crematorium, then the carbon dioxide that comes out of the body of the crematorium will be absorbed by the trees, plants and flowers. Where only oxygen atoms and carbon atoms that form carbon dioxide or carbonic acid are absorbed by trees, plants and flowers.

Then the trees, plants and flowers only need carbon atoms to be used as glucose as food for plants and flowers. While oxygen atoms are released again.

Well, the stars and the sun are created from hydrogen atoms that are in "*...My spirit... (Shaad: 38: 72)* or "*...Allah's spirit... (Shaad: 38: 72)*, so too with the human body is built with hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

So actually between humans and stars and the sun are the same, built with hydrogen atoms.

Now if there are humans who think that humans are created from star fragments, it is true, because stars are built with hydrogen atoms, so are humans built with hydrogen atoms.

However, it does not mean that when humans die they must be burned like stars when they run out of fuel, hydrogen atoms, explode and release energy in the form of various rays of light, looking

like an overflow and spit of fire.

It is better, when humans die they are returned to the soil, because the soil contains hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

Or in other words, the soil contains "*...My spirit... (Shaad: 38: 72)* or "*...Allah's spirit...(Shaad: 38: 72)*).

So if humans dead and then burned, carbon dioxide that comes out of human corpses will pollute the environment and damage the ozone.

Now this is what is not understood by humans who carry out corpse burning.

CONCLUSION

The conclusion that can be drawn from the explanation above is the secret contained behind the verse: "*...We created you from soil... (Al Hajj: 22: 5)*).

It turns out that here Allah has explained to humans that humans were created "*...from soil...(Al Hajj: 22: 5)*).

Now, the question arises,

What is actually in "*...soil...(Al Hajj: 22: 5)*)?

The answer is,

It is hidden in the secret behind the verse: "*... you see the earth is dry, then when We send down water on it, the earth lives and is fertile and grows all kinds of beautiful plants (Al Hajj: 22: 5)*).

Well, it turns out that after the earth gets water, which is a combination of oxygen atoms and hydrogen atoms, then meets the nitrogen atoms and carbon atoms in the earth, then "*...the earth lives and is fertile...(Al Hajj: 22: 5)*).

So, actually, humans were created from soil because soil contains hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms. The human body is built with **7000000000 000000000 000000000** atoms, including hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

Or in other words "*...I have perfected the event of Adam and have breathed into Adam my spirit... (Shaad: 38: 72)* where "*...My spirit... (Shaad: 38: 72)* or "*...Allah's spirit...(Shaad: 38: 72)* is built by hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms that are in the soil or that are on our earth.

Furthermore, the stars and the sun shine because there are hydrogen atoms as fuel for the stars and the sun.

Now, without hydrogen atoms, there would be no stars and the sun. The stars and the sun shine because there are hydrogen atoms as fuel for the stars and the sun.

If the stars and the sun run out of hydrogen atoms, then the stars and the sun will die.

Now, when the stars run out of hydrogen atom fuel, and the stars are bigger than the sun, then the stars will die by exploding.

When a star explodes, energy comes out in the form of various rays of light, looking like an explosion and spit of fire.

Now, the explosion and spit of fire that comes out of this dead star is considered by some people as a symbol that when a dead person dies, fire must be emitted, which is done by burning the body.

Now, because the human body is built by oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms, when a dead person is burned, carbon dioxide quickly comes out of the body of the corpse.

Or in other words, with the corpse burned, then *"...My spirit... (Shaad: 38: 72)* or *"...Allah's spirit... (Shaad: 38: 72)* which is built by hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms quickly comes out of the body of the burned corpse.

Now, if a person dies and is buried on earth, then *"...My spirit... (Shaad: 38: 72)* or *"...Allah's spirit... (Shaad: 38: 72)* comes out of the body of the corpse after 30 days.

Well, because *"...My spirit... (Shaad: 38: 72)* or *"...Allah's spirit... (Shaad: 38: 72)* which is built by oxygen atoms, hydrogen atoms, carbon atoms and nitrogen atoms is burned, then *"...My spirit... (Shaad: 38: 72)* or *"...Allah's spirit... (Shaad: 38: 72)* quickly comes out of the body of the burned corpse.

If there are no trees, plants and flowers around the crematorium, then the carbon dioxide that comes out of the body of the crematorium will not be absorbed by anyone. So that carbon dioxide will pollute the environment and damage the ozone.

Now, if there are trees, plants and flowers around the crematorium, then the carbon dioxide that comes out of the body of the crematorium will be absorbed by the trees, plants and flowers. Where only oxygen atoms and carbon atoms that form carbon dioxide or carbonic acid are absorbed by trees, plants and flowers.

Then the trees, plants and flowers only need carbon atoms to be used as glucose as food for plants and flowers. While oxygen atoms are released again.

Well, the stars and the sun are created from hydrogen atoms that are in *"...My spirit... (Shaad: 38: 72)* or *"...Allah's spirit... (Shaad: 38: 72)*, so too with the human body is built with hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

So actually between humans and stars and the sun are the same, built with hydrogen atoms.

Now if there are humans who think that humans are created from star fragments, it is true, because stars are built with hydrogen atoms, so are humans built with hydrogen atoms.

However, it does not mean that when humans die they must be burned like stars when they run out of fuel, hydrogen atoms, explode and release energy in the form of various rays of light, looking like an overflow and spit of fire.

It is better, when humans die they are returned to the soil, because the soil contains hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

Or in other words, the soil contains *"...My spirit... (Shaad: 38: 72)* or *"...Allah's spirit... (Shaad: 38: 72)*.

So if humans dead and then burned, carbon dioxide that comes out of human corpses will pollute the environment and damage the ozone.

Now this is what is not understood by humans who carry out corpse burning.
