## ABSTRACT

Before the author writes about is it true, Hinduism, Buddhism, Christianity through incarnation made God in heaven descend to earth, while according to Islam Allah's spirit incarnates as a human, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret about is it true, Hinduism, Buddhism, Christianity through incarnation made God in heaven descend to earth, while according to Islam Allah's spirit incarnates as a human, based on deoxyribonucleic acid (DNA).

There are several verses that reveal the secret of Allah about is it true, Hinduism, Buddhism, Christianity through incarnation made God in heaven descend to earth, while according to Islam Allah's spirit incarnates as a human, namely the following verses:

*"So when I have perfected Adam and breathed into Adam my spirit, then you will fall down prostrate to him. (Shaad: 38: 72).*

*"And Maryam bint Imran who maintained her honour, then We breathed into Mary's womb Our spirit, and she confirmed the words of her God and His Books, and she was one of those who obey. (At Tahrir: 66: 12).*

*"Then He perfected Adam and breathed into Adam His spirit and He made for you hearing, sight and heart, you are very few, be thankful. (As Sajdah: 32: 9).*

In an effort to uncover Allah's secret about is it true, Hinduism, Buddhism, Christianity through incarnation made God in heaven descend to earth, while according to Islam Allah's spirit incarnates as a human, the author uses the basis of Deoxyribonucleic acid (DNA).

## HYPOTHESIS

Here the author proposes hypothesis is it true, Hinduism, Buddhism, Christianity through incarnation made God in heaven descend to earth, while according to Islam Allah's spirit incarnates as a human, based on Deoxyribonucleic acid (DNA).

## PHOTON

Photon is an elementary particle of the boson type and a carrier of electromagnetic interaction.

## QUARK

If we want to know quarks, then we look at one of the hydrogen atoms which is an element of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Furthermore, if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

## DEOXYRIBONUCLEIC ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. These nucleotides consist of folate, 5-carbon sugar and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are found in abundance around us and in the atmosphere.

## IS IT TRUE, HINDUISM, BUDDHISM, CHRISTIANITY THROUGH INCARNATION MADE GOD IN HEAVEN DESCEND TO EARTH, WHILE ACCORDING TO ISLAM ALLAH'S SPIRIT INCARNATES AS A HUMAN

So now, we are still concentrating our minds on uncovering the secret contained behind the verse: *"...Our spirit...incarnated...a perfect human (Maryam: 19: 17)"...I breathed into Adam my spirit...(Shaad: 38: 72) "...We breathed into Mary's womb Our spirit...(At Tahrir: 66: 12).*

Allah, here, declares *"...Our spirit...incarnated...a perfect human. (Maryam : 19: 17).*

Well, it turns out, from what Allah declared, the real secret of Allah was revealed, namely *"...Our spirit...incarnated...a perfect human. (Maryam : 19: 17).*

So, actually what *"...incarnated...a perfect human (Maryam : 19: 17)* is *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17).*

Well, what is in *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17)* is something that is in accordance with the human body.

This means that something that becomes the building of *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17)* is the same as something that becomes the building of the human body.

Well, in this case, Allah, in Allah's form in the form of *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17)* is something that is the source of human life and the source of life for all seven skys.

Now what is the source of human life and the source of life for all seven skys is matter in the form of hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms. Where hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms are also the building blocks of Deoxyribonucleic acid (DNA). According to human DNA, it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Or in other words, *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17)* is

Deoxyribonucleic acid (DNA). Where this DNA is in the human body, animals, plants, fungi, bacteria, amoeba, archaea and viruses.

So, to understand Allah, human must study and think about Allah's form in the form of *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17)* which is the source of human life and the source of life for all seven skys. Where the source of human life and the source of life for all seven skys is matter in the form of hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms.

Now, the question arises,

How exactly, incarnation, according to Hinduism, Buddhism and Christianity?

The answer is, Vishnu incarnates into one of the forms of a fish, a turtle, a Buddha or a human.

Well, here, because Vishnu is one, while Vishnu can incarnate, among others, into a fish, a turtle and Buddha or a human, then there are in Vishnu's form, for example energy, matter and particles which are the source of life and parts of the body of a fish, turtle and Buddha or a human.

Well, something that is in the form of Vishnu in the form of energy, matter and particles is what incarnates into a fish, turtle and Buddha or human.

Well, because according to Hindu teachings, Vishnu is invisible, then after Vishnu incarnates into a fish, turtle and Buddha or human, it can be seen by humans.

So, according to Hindu teachings, Vishnu is the same as a fish or a turtle or Buddha or a human.

While according to Buddhist teachings, human can incarnate as other human and as animal.

Well, according to Buddhist teachings, the spirit in human is incarnated as human and as animal.

Well, according to Buddhist teachings, it is not empirically explained what a human spirit is that incarnates as human and as animal. Where the human spirit can incarnate many times, or what is called reincarnation as human and animal.

According to Christian teachings, God or the spirit in heaven through the holy spirit incarnates as flesh in human form.

Well, incarnation according to Christian teachings is no different from incarnation in Hindu and Buddhist teachings.

According to Christian teachings, God or the invisible spirit, in order to be visible to humans, then God or the spirit through the holy spirit incarnates as humans.

So, according to Hinduism, Buddhism and Christianity, God or the spirit or Vishnu incarnates as human and animal.

Or it can be written mathematically,  $\text{God} = \text{spirit} = \text{human}$ .

Now, according to Islam, *"...Our spirit...incarnated...a perfect human (Maryam: 19: 17)*.

Where *"...Our spirit...(Maryam: 19: 17)* or *"...Allah's spirit...(Maryam: 19: 17)* is something that is in

accordance with the human body.

Now something that is in accordance with the human body is hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms. Where hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms are also the building blocks of Deoxyribonucleic acid (DNA). According to DNA, humans are composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Or in other words, "...*Our spirit...(Maryam: 19: 17)* or "...*Allah's spirit...(Maryam: 19: 17)* is Deoxyribonucleic acid (DNA). Where this DNA is in the human body, animals, plants, fungi, bacteria, amoeba, archaea and viruses.

So according to Islam the incarnation is not Allah but "...*Our spirit...(Maryam: 19: 17)* or "...*Allah's spirit...(Maryam: 19: 17)* which is built with hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms, where hydrogen atoms, carbon atoms, oxygen atoms are formed with quarks, quarks are formed with Allah's energy.

Different from the incarnation according to the teachings of Hinduism, Buddhism and Christianity. According to the teachings of Hinduism, Buddhism and Christianity, God or spirit or Vishnu is incarnated as human and animal.

Therefore, according to the teachings of Hinduism, Buddhism and Christianity, God is not one, but there are several Gods in various forms.

Now, another question arises,

Is there only one God in the universe or are there several Gods in the universe?

Well, the answer is there is only one God in the universe, why?

Because, before the universe was created, there was only one God with God's energy in a time span of **0.0000000000 0000000000 0000000000 0000000000 001** seconds, quarks were created, which would become the nucleus of the atom.

Well, if there was something other than God before the universe was created, with energy that in a time span of **0.0000000000 0000000000 0000000000 0000000000 001** seconds, created quarks, which will become the nucleus of atoms, then God is not just one.

However, because there was nothing other than God before the universe was created, with energy that in a time span of **0.0000000000 0000000000 0000000000 0000000000 001** seconds, created quarks, which will become the nucleus of atoms, then God is only one in the universe.

So, actually there is only one God in the universe.

Or in other words, there is only one Allah in the universe.

## CONCLUSION

The conclusion that can be drawn from the explanation above is the secret contained behind the verse: "...*Our spirit...incarnated...a perfect human (Maryam: 19: 17)*"..."*I breathed into Adam my spirit...(Shaad: 38: 72)* "...*We breathed into Mary's womb Our spirit...(At Tahrim: 66: 12)*.

Allah, here, declares “...*Our spirit...incarnated...a perfect human. (Maryam : 19: 17).*

Well, it turns out, from what Allah declared, the real secret of Allah was revealed, namely “...*Our spirit...incarnated...a perfect human. (Maryam : 19: 17).*

So, actually what “...*incarnated...a perfect human (Maryam : 19: 17)* is “...*Our spirit...(Maryam: 19: 17)* or “...*Allah's spirit...(Maryam: 19: 17).*
