ABSTRACT

Before the author writes the question of whether reincarnation is the law of Allah or the law of nature, which is considered by some humans as a belief, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret about whether reincarnation is really Allah's law or natural law, which is considered by some humans as a belief, based on deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking about whether reincarnation is really Allah's law or natural law, which is considered by some people as a belief, namely the following verses:

"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And if We made the apostle an angel, We would certainly have made him a man and, of course We would have doubted about them what they doubted about themselves (Al An'aam: 6:9)

"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Verily, He is Most High, Most Wise. (Ash Shuura: 42: 51)

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when they ask Me, then let them fulfill (all My commands) and let them believe in - Me, that they may always be in the truth (Al Baqarah: 2: 186)

"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)

"Allah did not create and resurrect you except as one soul. Indeed, Allah is All-Hearing, All-Seeing. (Luqman: 31: 28)

"And We made a wall before them and behind them a wall, and We covered them so that they could not see." (Yaasiin: 36:9)

"And among His signs is that you see the earth dry and arid, so when We send down water on it, it will surely move and thrive. Indeed, God Who gives life to it, surely can bring back the dead... (Fushshilat: 41: 39)

"Allah holds the soul when it dies and the soul that has not died in its sleep; so He holds the soul which He has appointed death and He releases another soul until the appointed time. Verily in that are signs of Allah's power for a people who think (Az Zumar : 39: 42)

"It is He Who created the skys and the earth in six days: Then He resides on the Throne. He knows what enters the earth and what comes out of it and what descends from the heavens and what ascends to Him. And He is with you in wherever you are. And Allah is All-Seeing of what you do. (Al Hadid: 57:4)

"So he put a veil from them; then We sent our spirit to him, and he appeared before him a perfect human being. (Maryam: 19:17)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

In an effort to open the veil of Allah's secret about whether reincarnation is Allah's law or the law of nature, which is considered by some humans as a belief, the author uses the basis of Deoxyribonucleic acid (DNA)

HYPOTHESIS

Here the author proposes the hypothesis that reincarnation is Allah's law or natural law, in which oxygen atoms make up "...my spirit...(Shaad: 38:72) or "...Allah's spirit...(Shaad: 38: 72) that comes out of the dead body then inhaled by humans and animals, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

REINCARNATION THAT IS CONSIDERED AS A BELIEVE BY SOME HUMANS ARE ALLAH'S LAW OR NATURAL LAW, WHERE SOME OF THE OXYGEN ATOMS THAT MAKE ALLAH'S SPIRIT OUT OF THE DEAD HUMAN BODY ARE INHALED BY

HUMANS AND KHEWAN

Now, we are still concentrating on uncovering the secrets contained behind the verse: *"... I breathed into him my spirit... (Shaad: 38: 72)" Allah holds the soul when it dies and the soul that has not died when it sleeps.. (Az Zumar : 39: 42)*

Apparently, Allah has declared that *"Allah holds the soul when it dies and the soul that has not died in its sleep... (Az Zumar: 39: 42)*

What does Allah actually mean by *"...holding the soul...(Az Zumar: 39: 42) ?*

The answer is,

Hidden in the secret behind the verse: *"...I breathed into him my spirit..." (Shaad: 38: 72)*

Well, it turns out that what is meant by Allah *"...holding the soul...(Az Zumar: 39: 42)* is Allah holding *"... my spirit..." (Shaad: 38: 72)* or *"... Allah's spirit...(Shaad : 38:72)*

Now, *"... my spirit..." (Shaad: 38: 72)* or *"... Allah's spirit...(Shaad : 38:72)* this is what when humans die and are buried in the ground after 30 days out of the dead human body.

SOME OF THE OXYGEN, HYDROGEN, CARBON AND NITROGEN ATOMS THAT FOUND MY SPIRIT OUT OF THE BURIED DEAD HUMAN BODY

Well, after 30 days the dead human body was buried, *"... my spirit..." (Shaad: 38: 72)* or *"... Allah's spirit...(Shaad : 38:72)" ...raised you but only like one soul... (Luqman: 31: 28)*

Now, because *"...my spirit..." (Shaad: 38:72)* is made up of oxygen atoms, hydrogen atoms, carbon atoms and nitrogen atoms, then these atoms are what make up *"...my spirit.. "(Shaad: 38:72)* gathered before Allah.

But of course there are oxygen atoms, hydrogen atoms, carbon atoms and nitrogen atoms that come out of the dead human body that is also inhaled by the plants and flowers around the grave.

Only oxygen atoms and carbon atoms that make up coldioxide or carbon dioxide are inhaled by plants and flowers around the graves.

Then plants and flowers only need carbon atoms to make glucose as food for plants and flowers. While the oxygen atom is released again.

Well, it turns out that the oxygen atom reacts with the carbon atom to become coldioxide or carbonic acid that comes out of the dead human body which is then sucked in by the plants and flowers around the grave, but the oxygen atom is released back because it is not used as a source. nourished by plants and flowers.

The oxygen atoms that come out of the dead human body are then inhaled by humans and animals.

Or in other words, the oxygen atoms that come out of the bodies of the dead are reincarnated into other humans and become animals.

So, actually the reincarnation is the oxygen atom that comes out of this dead human body, whether reincarnated into another human or into an animal.

Or in other words, Allah's energy that gives birth to quarks and the atoms that make up buildings "*... my spirit ...*" (*Shaad: 38: 72*) does not disappear, but continues to be the source of life for the universe and all its contents, including humans.

Well, this is what is called Allah's law or natural law.

So reincarnation does not need to be used as a belief, because reincarnation is a law of Allah or natural law.

Whatever is in the seven skys is not lost, the origin of the energy of Allah returns to the energy of Allah and unites with Allah.

CONCLUSION

The conclusions that can be drawn from the explanation above are the secrets contained behind the verse: "*... I breathed into him my spirit... (Shaad: 38: 72)*" *Allah holds the soul when it dies and the soul that has not died when it sleeps.. (Az Zumar : 39: 42)*
