ABSTRACT

Before the author writes about Islamic education to find Allah who is in every human body, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secrets of Islamic education to find Allah who is in every human body, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secrets regarding Islamic education to find Allah who is in every human body, namely the following verses:

"Those who remember Allah while standing or sitting or lying down and they think about the creation of the sky and the earth: "Our God, You did not create this in vain, Glory be to You, so protect us from the torment of Hell. (Ali 'Imran : 3: 191).

"So when I have perfected the life of Adam and breathed into Adam my spirit, then you will fall down and prostrate yourself to him. (Shaad : 38: 72).

"And indeed We have created human and know what his heart whispers, and We are closer to human than his jugular vein. (Qaf: 50:16).

"And when My servants ask you about Me, I am near. I grant the request of those who pray when they ask Me, so they will fulfill it and they will have faith in Me, so that they will always be in truth (Al Baqarah: 2: 186).

"Allah is the First and the Last, the Real and the Inner and He is All-Knowing of everything. (Al Hadiid: 57: 3).

"Who has created the seven skies in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look again and again, you see something that is not balanced (Al Mulk: 67: 3).

"And We did not create the sky and the earth and everything between them by playing around (Al Anbiyaa': 21: 16).

"Allah created the sky and the earth with haq (right). Indeed, in these are the signs of Allah's power for the believers (Al 'Ankabuut: 29: 44).

"And thus We showed Abraham signs of greatness in the sky and the earth and so that he would be among those who believed. (Al An'aam: 6: 75).

"Then when he saw the moon rising he said: "This is my God" But after the moon had set, he said: "Surely if my God had not guided me, I would surely have been one of those who went astray." (Al An'aam: 6: 77).

"When the night was dark, he saw a star he said: "This is my God", but when the star sank he said: "I do not like those who drown." (Al An'aam: 6: 76).

"Then when he saw the sun rising, he said: "This is my God, this is the greater." So when the sun

set, he said: "O my people, indeed I am free from what you associate. (Al An'aam: 6: 78).

"When his God said to him: "Submit obediently" Abraham answered: "I submit obediently to the God of the worlds. (Al Baqarah: 2: 131).

In an effort to uncover the secrets of Allah regarding Islamic education to find Allah who is in every human body, the author uses the basis of deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes hypothesis Islamic education to find Allah who is in every human body, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARKS

If we want to know quarks then we pay attention to one of the hydrogen atoms which is a building element of the human body, animals, plants and fruit as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules which are composed repeatedly of nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where Carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere.

ISLAMIC EDUCATION TO FIND ALLAH WHO IS IN EVERY HUMAN BODY

Now, we are still concentrating on dismantling the secrets contained behind the verses: *"... We showed Ibrahim the great signs in the sky and the earth and so that he would be among those who believe (Al An'aam: 6: 75)"...**he saw a star he said: "This is my God"...(Al An'aam: 6: 76)"...he saw the moon rising he said: "This is my God"...(Al An' aam: 6: 77)"...he saw the sun rise he said: "This is my God..."...(Al An'aam: 6: 78)"those who remember Allah standing or sitting or lying down and they think about the creation of the sky and the earth...(Ali 'Imran : 3: 191).*

Apparently, Allah declared *"... We showed Ibrahim the great signs in the sky and the earth...(Al An'aam:*

6: 75).

Well, here, Allah has opened Allah's secret to all people in the world, that in order to understand the real Allah, one must first seek Allah, just as Abraham did when Abraham was still a child.

Now the question arises,

Where should children look for Allah?

Now the answer is in the secret behind the verse: *"...We showed Ibrahim the great signs in the sky and the earth...(Al An'aam: 6: 75)*.

Apparently, Allah opened wide the door for children to understand the real Allah, namely *"...the great signs in the sky and the earth...(Al An'aam: 6: 75)*.

Well, that means, whatever is in the skies and the earth, it's all *"...the great signs... (Al An'aam: 6: 75)*.

So, whatever things are on earth, those are *"...the great signs... (Al An'aam: 6: 75)*.

Not only inanimate objects, but also living organisms, such as humans, plants, flowers, animals, fungi, archaeal bacteria, these are *"...the great signs... (Al An'aam: 6: 75)*.

So, children are given the opportunity to open their minds to seek and understand life itself. That is, why do humans, plants, flowers, animals, fungi, archaeal bacteria, those all live. How do humans, plants, flowers, animals, fungi, archaeal bacteria, those all live. Who actually created humans, plants, flowers, animals, fungi, archaeal bacteria.

So, starting with the children opening their minds freely, the children will try and find out for themselves what is outside of themselves and what is inside of them.

Well, this is where the role of mothers, fathers and teachers is to give directions and ways to children about what is on this earth that is made and created *"...not...by playing around (Al Anbiyaa':21: 16)*, but *"...with haq (rights)...(Al 'Ankabuut : 29: 44)*.

So, children are brought to the path that leads to creation, not only to creation made by humans, but also to creation made by Allah. Children must be taken on a path of thinking, who is Allah and how does Allah exist and be close to humans, plants, flowers and animals. How is the relationship between human and Allah associated with *"...Allah's spirit...(Shaad : 38: 72)*. What is *"...Allah's spirit...(Shaad : 38: 72)*, how *"...Allah's spirit...(Shaad : 38: 72)* exists in every human body. How *"...Allah's spirit...(Shaad : 38: 72)* can enter into every human body.

Well, as Allah declared about Abraham as a child looking for Allah *"...he saw a star he said: "This is my God"...(Al An'aam: 6: 76)"...he seeing the rising moon he said: "This is my God"...(Al An'aam: 6: 77)"...he saw the rising sun he said: "This is my God..."...(Al An'aam: 6:78)*.

When Abraham as a child, looking for Allah, asks, is *"...star...is God...(Al An'aam: 6: 76)"...moon...is God...(Al An'aam: 6: 77)"...the sun...is God..."...(Al An'aam: 6: 78)*.

Apparently, Abraham as a child came to a conclusion that *"...the stars...(Al An'aam: 6: 76)"...the moon...(Al An'aam: 6:77)"...the sun(Al An'aam: 6: 78)* is not Allah.

Why did Abraham as a child come to the conclusion that *"...the stars...(Al An'aam: 6: 76)"...the moon...(Al An'aam: 6:77)"...the sun...(Al An'aam: 6: 78)* is not Allah?

Now the answer is in the secret behind the verse: *"... We showed Ibrahim the great signs in the skys and the earth...(Al An'aam: 6: 75).*

Apparently, when Abraham as a child was looking for who Allah was, through *"...the stars...(Al An'aam: 6: 76)"...the moon...(Al An'aam: 6: 77)"...the sun....(Al An'aam: 6: 78)*, it turns out that at the same time Allah gave the way and instructions to Abraham as a child, that *"...the stars...(Al An'aam: 6: 76)"... the moon...(Al An'aam: 6: 77)"...the sun....(Al An'aam: 6: 78)* is uneternal, what is eternal is *"Allah is the First and the Last...(Al Hadiid : 57: 3).*

Well, here there is a law of *"...balanced...(Al Mulk: 67: 3).* Meaning, Abraham as a child seeks Allah, while Allah gives way with *"...the great signs in the sky and the earth ...(Al An'aam : 6: 75).*

Well, this is what is called the law of *"...balanced...(Al Mulk: 67: 3).*

So, because there was already *"...balanced...(Al Mulk: 67: 3)* between Abraham's mind and Allah's mind, then *"When his God said to him: "Submit to obedience" Abraham replied: "I submit to God of the Worlds." (Al Baqarah: 2: 131)*

This, is Allah's secret, to reach and understand the real Allah, human must first seek Allah and understand the real Allah.

So, in Islamic education for children, children are first given freedom in thinking to seek Allah, with guidance from fathers, mothers and teachers. After the children understand Allah, then they will talk about what is in Allah's religion. How was the life of the Prophet Muhammad saw and other Prophets. How to obey Allah. How to remember Allah. How to carry out Allah's commands. How to behave in accordance with what is commanded by Allah and exemplified by the Prophet Muhammad saw.

KESIMPULAN

Berdasarkan uraian diatas kita dapat mengambil kesimpulan bahwa the secrets contained behind the verses: *"...We showed Ibrahim the great signs in the sky and the earth and so that he would be among those who believe (Al An'aam: 6: 75)"...he saw a star he said: "This is my God"...(Al An'aam: 6: 76)"...he saw the moon rising he said: "This is my God"...(Al An' aam: 6: 77)"...he saw the sun rise he said: "This is my God..."...(Al An'aam: 6: 78)"those who remember Allah standing or sitting or lying down and they think about the creation of the sky and the earth...(Ali 'Imran : 3: 191).*
