ABSTRACT

First of all, by asking for forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding the secret of, was it true that in the beginning, Allah did not glow, from the point of view of photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA)

The signs of Allah's greatness regarding, was it true that in the beginning, Allah did not shine, stored in the verses:

"Allah, there is no god but He Who Lives eternally and continually takes care of; neither sleeps nor sleeps. To Him belongs what is in the heavens and the earth. No one can intercede with Allah without His permission? Allah knows what is before them and behind them, and they know nothing of Allah's knowledge except what He wills. Allah's seat covers the heavens and the earth. And Allah does not find it difficult to maintain them, and Allah is Most High, Most Merciful. Great.(Al Baqarah: 2:255)

"He is Allah, Who made all that is on earth for you and He willed the heavens, then He made seven heavens. And He is All-Knowing of all things. (Al Baqarah: 2:29)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and hearts; you are very little grateful. (As Sajdah: 32: 9)

"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)

"Allah is the light of the skys and the earth...Light upon light...(An Nuur: 24: 35)

"So He made it seven skys in two days. He revealed in each sky its affairs. And We adorn the near sky with bright stars and We take care of it as well as possible. Such is the provision of the Mighty, All-Knowing (Fushshilat: 41:12)

"The angels and Gabriel ascended to Allah in a day which amounted to fifty thousand years (Al Ma'aarij: 70:4)

"Who knows the unseen, then He does not show anyone about the unseen. (Al Jin: 72: 26)

"And they do not glorify Allah with proper exaltation when the whole earth is in His hands on the Day of Resurrection and the heavens are rolled up with His right hand. Glory be to God and exalted is He from what they associate with. (Az Zumar: 39: 67) Indeed, the Day of Judgment will surely come, there is no doubt about it, but most people do not believe (Al Mu'min: 40: 59)

In an effort to unmask the greatness of Allah SWT regarding, in the beginning, Allah does not shine, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose a hypothesis, in the beginning, Allah does not shine, light appears after the birth of stars, seen from photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms which is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

IN THE BEGINNING OF THE DARK UNIVERSE

Now, we are still concentrating on uncovering the secrets that are hidden behind the verse: ***"...He made the seven skys in two days... (Fushshilat: 41:12)***

Apparently, the time it takes for Allah to ***"...make...seven skys...(Fushshilat: 41:12)*** takes ***"...two days... Fushshilat: 41:12)***

Now, the question arises

How long ***"..two days... (Fushshilat : 41:12)*** is that?

The answer is

Hidden behind the verse: ***"The angels and Gabriel ascended to Allah in a day the measure of which is fifty thousand years (Al Ma'aarij: 70:4)***

Apparently, 1 day according to Allah's reckoning is equal to 50 000 years according to human reckoning.

Now, before the creation of "... *the seven skys...* (*Fushshilat: 41: 12*) which is called the universe that is visible to the human eye now, it turns out to be "... *unseen...* (*Al Jin: 72: 26*)

That is, in the beginning, there was only Allah's energy, which gave birth to quarks and atoms. There is no light of Allah. At that time it was pitch black.

ALLAH'S LIGHT APPEARS AFTER THE HYDROGEN ATOMS BORN THE FIRST STAR

So now, let's unravel the secret behind the verse: "*Allah is the light of the skys and the earth...Light upon light...*(*An Nuur: 24: 35*)

It turns out, "Allah is the light of the sky...(An Nuur: 24: 35) was appeared after hydrogen atoms merged to give birth to the first star in the universe.

That is, the first star was fueled by hydrogen atoms.

Well, because the hydrogen atoms collide with each other, with the help of nuclear fusion, they give rise to gamma light, where this gamma light is carried by photons, out of the star, illuminating the natural surroundings.

As the sun's rays today, which arise due to colliding hydrogen atoms through nuclear fusion in the sun, gamma light arises, carried by photons, to the earth, the earth becomes bright.

So, "*Allah is the light of the sky...*(*An Nuur: 24: 35*) was born, after the hydrogen atoms gave birth to the first star.

When was "*Allah the light of the sky...*(*An Nuur: 24: 35*) born?

The answer is

Hidden in the secret of the verse: "*So He made the seven skys in two days...* (*Fushshilat: 41:12*)

That is, before "...*the seven skys...*(*Fushshilat: 41:12*) was created, "*Allah the light of the sky...*(*An Nuur: 24:35*) was already shining, about 200 000000 years according to human calculations, but if Allah's reckoning is 11 days.

So, 11 days according to Allah's reckoning, from the moment the quark appeared through Allah's energy, then the hydrogen atom was born, and the first star was born in this universe.

Now, after 11 days according to Allah's reckoning, "*Allah is the light of the sky...* (*An Nuur: 24: 35*)

Now it has been revealed, the secret behind the verse: "*Allah is the light of the skys and the earth...Light above the light...*(*An Nuur: 24:35*) is arising, after the first star was born, through hydrogen atoms, 11 days according to calculations Allah or 200 000000 years according to human calculations, from the time the first quark appeared through the energy of Allah.

Or in other words, 11 days according to Allah's reckoning or 200 000000 years according to human reckoning, from the time this universe was created, through the energy of Allah that gave birth to quarks, a new "*Allah of skys and earth light was born...Light upon light...* (*An Nuur : 24:35*)

CONCLUSION

From what has been described above we can now conclude that the secrets that are hidden behind the verse: *"...He made the seven skys in two days... (Fushshilat: 41:12)*

Apparently, the time it takes for Allah to *"...make...seven skys...(Fushshilat: 41:12)* takes *"...two days... Fushshilat: 41:12)*

Now, the question arises

How long *"..two days... (Fushshilat : 41:12)* is that?

The answer is

Hidden behind the verse: *"The angels and Gabriel ascended to Allah in a day the measure of which is fifty thousand years (Al Ma'aarij: 70:4)*

Apparently, 1 day according to Allah's reckoning is equal to 50 000 years according to human reckoning.

Now, before the creation of *"... the seven skys... (Fushshilat: 41: 12)* which is called the universe that is visible to the human eye now, it turns out to be *"... unseen... (Al Jin: 72: 26)*

That is, in the beginning, there was only Allah's energy, which gave birth to quarks and atoms. There is no light of Allah. At that time it was pitch black.

So now, let's unravel the secret behind the verse: *"Allah is the light of the skys and the earth...Light upon light...(An Nuur: 24: 35)*

It turns out, "Allah is the light of the sky...(An Nuur: 24: 35) was appeared after hydrogen atoms merged to give birth to the first star in the universe.

That is, the first star was fueled by hydrogen atoms.

Well, because the hydrogen atoms collide with each other, with the help of nuclear fusion, they give rise to gamma light, where this gamma light is carried by photons, out of the star, illuminating the natural surroundings.

As the sun's rays today, which arise due to colliding hydrogen atoms through nuclear fusion in the sun, gamma light arises, carried by photons, to the earth, the earth becomes bright.

So, *"Allah is the light of the sky...(An Nuur: 24: 35)* was born, after the hydrogen atoms gave birth to the first star.

When was *"Allah the light of the sky...(An Nuur: 24: 35)* born?

The answer is

Hidden in the secret of the verse: *"So He made the seven skys in two days... (Fushshilat: 41:12)*

That is, before *"...the seven skys...(Fushshilat: 41:12)* was created, *"Allah the light of the sky...(An Nuur: 24:35)* was already shining, about 200 000000 years according to human calculations, but if Allah's reckoning is 11 days.

So, 11 days according to Allah's reckoning, from the moment the quark appeared through Allah's energy, then the hydrogen atom was born, and the first star was born in this universe.

Now, after 11 days according to Allah's reckoning, *"Allah is the light of the sky... (An Nuur: 24: 35)*

Now it has been revealed, the secret behind the verse: *"Allah is the light of the skys and the earth...Light above the light...(An Nuur: 24:35)* is arising, after the first star was born, through hydrogen atoms, 11 days according to calculations Allah or 200 000000 years according to human calculations, from the time the first quark appeared through the energy of Allah.

Or in other words, 11 days according to Allah's reckoning or 200 000000 years according to human reckoning, from the time this universe was created, through the energy of Allah that gave birth to quarks, a new *"Allah of skys and earth light was born...Light upon light... (An Nuur : 24:35)*
