## ABSTRACT

Before the author writes about jinn = human have knowledge about the creation of the sky and the earth, Allah challenges jinn and human to explore the universe, first the author asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret about jinn = human have knowledge about the creation of the sky and the earth, Allah challenges jinn and human to explore the universe, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about jinn = human have knowledge about the creation of the sky and the earth, Allah challenges jinn and human to explore the universe, namely the verses:

*"O congregation of jinns and humans, if you are able to explore the corners of the sky and the earth, then explore, you cannot explore except with power. (Ar Rahmaan: 55: 33).*

*"And verily, there were the males among humans who sought protection from the males among jinns, but they increased them in sin and transgression. (Al Jin: 72: 6).*

*"And indeed among jinns are righteous and among jinns are not so. Jinn have taken different paths. (Al Jin: 72: 11).*

*"And indeed among jinns are obedient and there are jinns who deviate from the truth. Whoever is obedient, then they have truly chosen a straight path. (Al Jin: 72: 14).*

*"And We created jinn before from a very hot fire. (Al Hijr: 15: 27).*

*"Nymph in paradise have never been touched by human before nor by jinn. (Ar Rahmaan: 55: 74).*

*"And indeed We created human from dried clay from black mud given shape. (Al Hijr: 15: 26).*

*"And we used to occupy some places in the sky to listen. But now whoever listens will certainly find the arrows of fire lurking. (Al Jin: 72: 9).*

*"And gathered for Solomon his armies of jinn, men and birds, and they were arranged in order. (An Naml: 27: 17).*

In an effort to uncover jinn = human have knowledge about the creation of the sky and the earth, Allah challenges jinn and human to explore the universe, the author bases it on deoxyribonucleic acid.

## HYPOTHESIS

Here I propose hypothesis jinn = human have knowledge about the creation of the sky and earth,

Allah challenges jinn and human to explore the universe, from the point of deoxyribonucleic acid (DNA).

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms, and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are abundant around us and in the atmosphere.

## **JINN = HUMAN HAVE KNOWLEDGE ABOUT THE CREATION OF THE SKY AND EARTH, ALLAH CHALLENGES JINN AND HUMAN TO EXPLORE THE UNIVERSE**

Now, we are still trying to focus our minds to uncover the secrets hidden in the verse: *"...We created jinn before from a very hot fire. (Al Hijr: 15: 27).*

It turns out that jinn was created by Allah *"... from a very hot fire. (Al Hijr: 15: 27)*

This means that jinn was created from carbon atoms and hydrogen atoms.

While human was created *"... from dried clay from black mud given shape.. (Al Hijr: 15: 26).*

*"...clay...(Al Hijr: 15: 26)* contains hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms.

So, Allah prioritizes mentioning the name of jinn *"O congregation of jinn and human... (Ar Rahmaan: 55: 33)*, because jinn was created before Adam.

So, actually, there is no difference between jinn and human. The human body contains carbon atoms, hydrogen atoms, oxygen atoms and nitrogen atoms. Also in the body of jinn there are carbon atoms and hydrogen atoms.

Jinn build family, have wife and children *"Nymph in paradise have never been touched by human before nor by jinn. (Ar Rahmaan: 55: 74).*

This means that jinn have never married nymph who is in paradise.

Here Allah describes that jinn build family and have offspring.

Jinn believe in Allah *"...among jinns are righteous and among jinns are not so. Jinn have taken different paths. (Al Jin: 72: 11) "....among jinns are obedient and there are jinns who deviate from the truth. Whoever is obedient, then they have truly chosen a straight path. (Al Jin: 72: 14).*

Likewise *"...gathered for Solomon his armies of jinns...(An Naml: 27: 17).*

So, in fact, there is no difference between human and jinn. What human do is done by jinn . What human believe, jinn believe. Even *"...there were the males among humans who sought protection from the males among jinns, but they increased them in sin and transgression. (Al Jin: 72: 6).*

Now, let's reveal the secret behind the verse: *"O congregation of jinns and humans, if you are able to explore the corners of the sky and earth, then explore, you cannot explore except with power. (Ar Rahmaan: 55: 33).*

It turns out, it is clearly depicted here, that jinn have knowledge about the creation of the sky and the earth, about the universe.

Why do jinn have knowledge about the creation of the sky and the earth?

The answer is

It is hidden in the secret behind the verse: *"...we used to occupy some places in the sky to listen...(Al Jin: 72: 9).*

It turns out, jinn with knowledge of the universe can already *"...listen to ....(Al Jin: 72: 9)* what is happening on the planets, the stars in the Milky Way galaxy.

So, why does Allah challenge the jinn and humans *"O congregation of jinns and humans, if you are able to explore the corners of the sky and earth, then explore...(Ar Rahmaan: 55: 33)?*

Because, it turns out, jinn have knowledge about the creation of the sky and the earth and about the universe.

Human and jinn will not be able to research, navigate, explore the planets, stars in the Milky Way galaxy, if human and jinn do not have *"... power. (Ar Rahmaan: 55: 33).*

This means that human and jinn will not be able to research, navigate, explore the planets, stars in the Milky Way galaxy without having knowledge about the creation of the sky and the earth and about the universe.

Now, the secret hidden in the verse has been revealed *"O congregation of jinns and humans, if you are able to explore the corners of the sky and earth, then explore, you cannot explore except with power. (Ar Rahmaan: 55: 33).*

Namely, jinn and human have knowledge about the creation of the sky and the earth and about the universe.

## CONCLUSION

Based on the description above, we can conclude that the secrets hidden in the verse: *"...We created jinn before from a very hot fire. (Al Hijr: 15: 27).*

It turns out that jinn was created by Allah *"... from a very hot fire. (Al Hijr: 15: 27)*
