ABSTRACT

Before I write down the problem, most people still think that Allah is in one place, first I ask forgiveness from Allah SWT. Here I try to unmask the secret that most people still think that Allah is in one place, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that serve as tools for revealing Allah's secrets about the majority of people still thinking that Allah is in one place, even though angels are a kind of human, namely the following verses:

"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)

"And it is not possible for any human being that Allah can speak to him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Indeed, He is Most High, Most Wise. (Ash Syuura: 42:51)

"When I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourselves (Al Hijr: 15:29)

"And We made a wall before them and behind them a wall, and We covered them so that they could not see." (Yaasiin: 36:9)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

"... We made the apostle an angel... We made him a man... (Al An'aam: 6: 9)

"The angels and Gabriel ascended to God in a day the measure of which was fifty thousand years (Al Ma'aarij: 70:4)

"Allah holds the soul when it dies and the soul that has not died in its sleep; so He holds the soul which He has appointed death and He releases another soul until the appointed time. Verily in that are signs of Allah's power for a people who think (Az Zumar: 39:42)

"And to Allah belongs the east and the west, so wherever you turn there is the face of Allah. Verily Allah is All-Encompassing, All-Knowing. (Al Baqarah: 2:115)

"Then He perfected and breathed into him His spirit and He made for you hearing, sight, and heart; you are very little grateful." (As Sajdah: 32: 9)

In an effort to unmask Allah's secret about the vast majority of people still assuming Allah is in one place, I use a base of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that Allah is everywhere not just in one place, from the point of view of Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

MOST PEOPLE STILL BELIEVE ALLAH IS IN ONE PLACE

Now, we are still concentrating on uncovering the secrets contained behind the verse: *"...to Allah belongs the east and the west, so wherever you turn there is the face of Allah...(Al Baqarah: 2: 115)*

It turns out that here Allah has declared that in fact Allah's existence is not in one place, but Allah is everywhere, including in humans. Wherever the human eye is directed, there is *"... the face of Allah ... (Al Baqarah: 2: 115)*

Now the question arises,

Why is Allah everywhere, including in the human body?

The answer is

Hidden in the secret behind the verse: *"Allah...the light of the skys and the earth...Light upon light... (An Nuur: 24:35) "...He...blows into it His spirit..." (As Sajdah: 32: 9)*

Well, because Allah gave birth to *"... the light of the skys and the earth... Light upon the light... (An Nuur: 24: 35) and Allah "...blows into it His spirit..." (As Sajdah: 32: 9)*, then actually what brings *"... the light of the heavens and the earth... (An Nuur: 24: 35)* is Allah's energy in the form of photons.

So, this photon is Allah's energy which is emitted in the form of *"...Light upon light...(An Nuur: 24: 35)* Or in other words, Allah is everywhere.

Likewise with *"... His spirit..." (As Sajdah: 32: 9)*, which is formed by hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms. Where these atoms are the building blocks of the human body.

Or in other words, Allah is in the human body through *"...His spirit..." (As Sajdah: 32: 9)*

Now it has been revealed, that the assumption of most people about Allah being in one place is not having a strong reason and is not true.

Because Allah is everywhere including in the human body *"Allah...the light of the skys and the earth...(An Nuur: 24:35) "...He...blows into it His spirit..." (As Sajdah: 32:9)*

CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verse: *"...to Allah belongs the east and the west, so wherever you turn there is the face of Allah...(Al Baqarah: 2: 115)*

It turns out that here Allah has declared that in fact Allah's existence is not in one place, but Allah is everywhere, including in humans. Wherever the human eye is directed, there is *"... the face of Allah ... (Al Baqarah: 2: 115)*
